WHAT THE PEOPLE SAY:

Perfectly Delighted With Suit.

CHILLICOTHE, MO.

SEARS, ROEBUCK & CO.

GENTLEMEN:—My suit of clothes XXXX have been received and money paid to express agent over a week ago. I am perfectly delighted with them. It is a splendid fit, and all O. K. in every respect. This will be a large add for you. I ask you to receive my kindest thanks therefore. I have also received your Catalogue No. 103. Respectfully yours, JOHN FLORY.

Clothes Just as Recommended.

FEDERAL, OHIO.

DEAR SIRS:—I received the suit of clothes today and I am well pleased with them. They fit nicely and I think they are just as you recommended them. Yours, C. E. MCCUNE.

"Suit Fits Me As Well As Any Suit I Ever Had."

DERBY, KAS.

SEARS, ROEBUCK & CO., Chicago, Ill,

DEAR SIRS:—I hereby notify you that I received my Suit this morning, and I can say that I am well pleased with it in every way, it fits me as good as any Suit I ever had. I remain,
Yours truly, R. N. JORGENSEN.

"Fit and Quality O.K."

TOLEDO, ILL.

SEARS, ROEBUCK & CO., Chicago, Ill.

DEAR SIRS:—The fit and quality are O.K. The suit is excellent, considering price. I shall need a summer suit, but I presume it is too late to order for the coming summer.

Thanking you for your long continued favor, I remain,
Most cordially yours,
S. S. FREDERICK.

I Compliment Your Tailor on Such Expert Cutting and Fitting.

GREENSBORO, MO.

MESSRS. SEARS, ROEBUCK & CO.

DEAR FRIENDS:—Your goods that were forwarded me on December 18th were received on December 21st, safe and all right. I find the suit forwarded me was packed with care and fitted me completely to a dot. I do not wish to receive a suit that fits me any better than it does. I now compliment your tailor on such expert cutting as to fit a person so complete. I will endeavor to do all that I can to aid your concern.
Yours respectfully,
GEO. L. GALLAWAY.

The Suit Fits Exactly.

BOZEMAN, ALA.

SEARS, ROEBUCK & CO.

KIND SIRS:—I received my goods on the 22d of December and was well pleased. The suit fits exactly. I hope to send another order soon.
Respectfully,
MISS EVA MORRIS.

Saves 75 Cents on a Pair of Shoes for $1.25.

GARDI, GA.

SEARS, ROEBUCK & CO.

DEAR SIRS:—Will advise you concerning the order which was sent to me by you. The shoes which I ordered for $1.25 were equal to any $2.00 shoes in this town. The mackintosh is just as nice as it can be, it fits just as nice as it can fit, and the other articles can not be beaten. I shall do all my ordering from you, and when my friends want to order I shall point them to the Cheapest Supply House on Earth, Sears, Roebuck & Co., Chicago, Ill. I am well pleased and shall send to you for all my dry goods and shoes and such like. Yours respectfully,
J. L. AVENT.

"What I Paid for the Overcoat Would Not Pay for the Cloth in It."

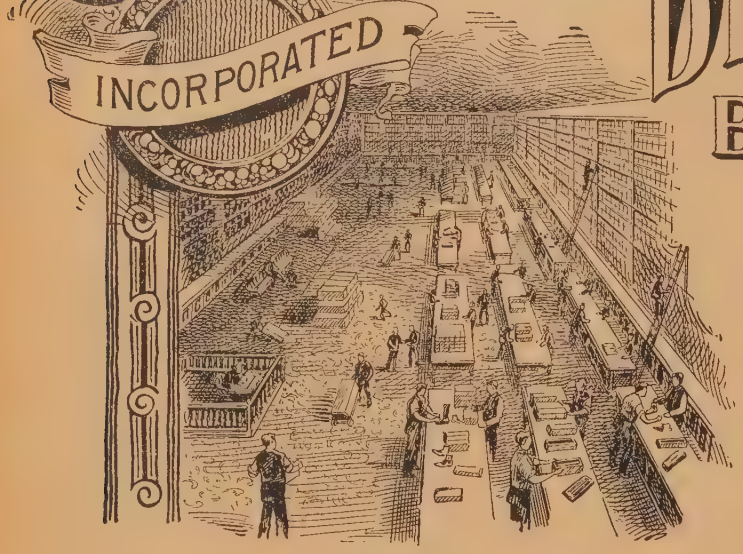
MARSFIELD, PA.

SEARS, ROEBUCK & CO., Chicago, Ill.

DEAR SIRS:—Received the overcoat and it is a dandy. What I paid for it would not pay for the cloth in it, besides to say nothing about the cost of making and your profit. I shall send for one of the $15,00 overcoats as soon as I can, and possibly a watch. Shall buy all my clothing hereafter if I can, and will get others to buy of you too. Yours truly.
ERWIN J. VERMILYEA.

Neighbors Surprised at the Quality for the Money.

ST. CLAIR CITY, MICH.



SEARS, ROEBUCK & CO.

SIRS:—Wife's blue suit, Invoice No. 333645, received Jan. 6, and found them very satisfactory both in quality and fit, in fact more than could be expected in the quality and beauty of the goods for the price, $6.25, and discount in the bargain. Wife more than pleased, being a gift on her wedding day. Neighbors surprised at the fit and quality for the money. Please accept thanks. Very respectfully, PETER WOOD.

THESE TESTIMONIALS COME TO US VOLUNTARILY. WE HAVE THOUSANDS OF THEM ON FILE, AND ANYONE CALLING AT OUR STORE CAN SEE THEM.

SEARS, ROEBUCK & CO. INCORPORATED

DEPARTMENT OF BOOTS — SHOES — AND RUBBERS

ABOUT SHOES. HOW AND WHEN TO WEAR THEM.

TO THE MEN; Shoes to wear well should be adapted in make, material and weight to the kind of use to which they are to be subjected. For instance: A good many men buy a fine calf or kangaroo shoe and expect it to give the same service as a plow shoe. A fine shoe is not intended for heavy wear any more than a top carriage is intended to carry a load of wheat. Following are a few things which should not be done: **Don't** wear a thin shoe for street or rough wear. **Don't** wear shoes too narrow for your feet. **Don't** fit your shoes short; especially the ones with the pointed toes. On the contrary, they should be fitted very long. Make your foot much more stylish in appearance. **Don't** put your shoes on the stove, steampipe or register, especially if they are damp. Leather will burn, if damp, even where you can hold your hand.

HOW TO CARE FOR THEM. If your shoes are wet they should never be dried quickly, but allowed to dry slowly and then a little oil or vaseline should be carefully rubbed into the leather. This will keep them soft and prevent their cracking. Mud or dirt should always be carefully removed before the shoes are put away. If your feet perspire, the same pair of shoes should never be worn two days in succession. You should have two pairs, wearing one pair one day and the other the next, thus allowing the shoes to dry out during the alternate days. Your shoes will last much longer by doing this, and your feet will not get sore. Perspiration or sweaty feet will always cause shoes to crack sooner or later, particularly if the shoes are light weight. We would recommend tan shoes for such feet, particularly during the summer, as the tan stock is porous and consequently much cooler. The blacking for men's shoes is not injurious for calf skin, but is for kid or kangaroo.

A WORD TO THE LADIES. Ladies often complain that the soles of their shoes do not wear well. This is undoubtedly because they wear a light hand-turned shoe, when they really should have a Goodyear Welt or a McKay sewed shoe. The hand-turned shoe has a very thin sole and is designed principally for indoor and dress wear. The McKay sewed shoe has a heavier sole, and consequently will wear longer. Use as little blacking as possible, as it will do your shoes more harm than good. Tan shoes, however, should be cleaned and polished often, as the preparations used for this purpose nearly always act as a preservative to tan and Russian leathers.

ABOUT RUBBERS AND OVERSHOES. We will handle this season both first and second quality of rubber goods. We have always handled strictly first quality, but owing to the fact that a great many dealers handle only seconds and sell them at about the same price that firsts are worth, we have decided to handle both, so that our patrons, who wish the cheaper grade can be supplied at wholesale price. For the benefit of those who are not familiar with these goods, we will say that every rubber factory makes two grades of goods. They are termed firsts and seconds. The firsts are made from the pure Gumrubber and consequently cost more and will wear longer than the seconds. The second quality which we handle, however, is of extra quality and come in all the latest and most desirable styles. Below we name some of the best known Firsts and Seconds. These are firsts, and if genuine every pair should be stamped. "Boston Rubber Shoe Co.," "Woonsocket Rubber Co.," "Wales Goodyear Rubber Co.," "Candee Rubber Co.," "American Rubber Co." and "New Brunswick."

Below are seconds:

"Bay State Rubber Co.," "Rhode Island Rubber Co.," "Connecticut Rubber Co.," "Federal Rubber Co." and "Essex."

Note the above very carefully and don't let your dealer sell you second quality goods and make you believe they are just as good as firsts.

Rubber loses its wearing qualities when old, hence it is to your advantage to buy from a firm who always have fresh stock. Our output is so large that we are constantly receiving fresh goods. **DON'T WAIT UNTIL IT SNOWS,** and then pay your dealer a big profit, but order your rubbers and overshoes when you buy your shoes or other goods, then you will be prepared, and besides you will get them at the regular wholesale price. **Just as cheap** as any retail dealer can buy them.

ABOUT GUARANTEED GOODS. We wish to call special attention to those goods marked "Warranted." If at any time a pair of warranted boots or shoes give out without just cause, report the fact to us, and we will repair them, replace them with others, or refund the amount paid for them according to the circumstances of the case, if shoes are sent to us to show where the fault lies.

IF YOU ARE DISSATISFIED with any shoes, or if any mistake is made in filling your order, don't hesitate to notify us at once. We sell such a large quantity of shoes that we may make a few mistakes. We are only too glad to rectify them, however, if given an opportunity.

WE THANK OUR MANY PATRONS for past favors and we assure you that it is your liberal patronage which has made success possible and placed our Shoe Department in a position where we can offer you reliable footwear lower than it can possibly be obtained elsewhere.

WHEN ORDERING be sure to state size you want, when you know it; otherwise send us the length and shape of your foot, drawn with a pencil while standing on a piece of white paper. Instep, ball and other measurements not necessary. From length and shape of outline we can determine from our knowledge of measurements what size and width will fit your feet best.

THE WIDTHS RUN AA, extremely narrow; A, extra narrow; B, very narrow; C, narrow; D, medium; E, wide; EE, very wide.

OUR TERMS ARE VERY LIBERAL. We will ship Boots or Shoes C. O. D. subject to examination, on receipt of 50 cents per each pair, as a guarantee of good faith balance and express to be paid at express office, provided they are exactly as represented and better value than you can possibly obtain elsewhere. Otherwise they can be returned at our expense, and the amount paid will be promptly refunded, or you can have it applied on other goods.

A SPECIAL DISCOUNT of 3 per cent. will be allowed if **CASH IN FULL** accompanies your order (except on rubber goods, which are net), in which case you can deduct the three per cent. from our prices. You not only save the 3 per cent. by so doing, but also the return charges on money sent to us.

NEARLY ALL OUR CUSTOMERS SEND CASH IN FULL, AND WHY NOT? If you are not perfectly satisfied, we immediately refund your money.

IT IS CHEAPER to send ladies' shoes, slippers, etc., by mail than by express. The postage rate is **ONE CENT** for each ounce. When you wish goods sent by mail always send cash in full, deduct 3 per cent. discount, and include enough extra to pay postage, and we will ship by mail, postpaid. Be sure to inclose enough extra to pay postage; if you send too much we will promptly return what is over.

POSTAGE NECESSARY is given under each description, that you may know the amount necessary to send.

THE QUALITY OF A SHOE does not depend solely upon its appearance. **A fine shoe always looks fine,** but a poor shoe can be made to look fine. **We sell no counterfeits. The genuine worth of our Ladies' shoes** is attested by the scores and hundreds of voluntary letters of commendation. We sell such shoes as will reflect credit on this department, such goods as will **stand the test of wear.**

Our Terms: Send 50 cents with your order, and we will send any pair of shoes **C. O. D.** subject to examination. **3 per cent discount** when cash in full accompanies order. **If you wish** your order delayed, **forget to state size wanted.**

The line of School Shoes quoted below is without doubt the very best ever sold. They are made from the best quality of kangaroo calf, half double soles and box sole leather tips. They are the only school shoes on the market which have a **heavy back stay on outside and inside,** making them the **strongest yet produced.** They also have an extremely low heel. and bottoms cut from the **finest oak sole leather.** The stock from which these shoes are made is much more tough than either dongola or pebble grain stock, is as near water proof as leather can be made, and the shoe, as a whole, **is without a doubt the best ever produced.** We quote elsewhere a cheaper school shoe, but recommend these as the **very best that money can buy. Every pair warranted.**

This shoe, like the one preceding, is made from **best kangaroo stock,** sole leather box tip, and has the new improved back stay. For complete description see above. **We guarantee every pair of these shoes to give entire satisfaction, also to be the best school shoe ever produced, no matter what the price.**

THE GENUINE FARGO'S BALL-BEARING BICYCLE SHOES.

EVERYBODY HAS HEARD OF 'EM

The firm of C. H. FARGO & CO. has gone out of bnsiness, and knowning the FARGO BALL-BEARING BICYLE SHOE to be the best ever produced at any price, we bought for spot cash the entire lot. We have only 8,000 pairs left, and intend to give our patrons the benefit of our foresight. WE RECEIVE LETTERS daily from dealers who handled these shoes last season, begging us to sell them a few dozen to supply their customers who know the shoe and will have nothing else, and we could sell the entire lot to dealers at a handsome profit in a week; but we feel that our customers deserve the preference, and we therefore offer them to you for LESS THAN THE WHOLESALE RRICE.

WE ARE THE EXCLUSIVE AGENTS.

DON'T DELAY. We have ONLY 8,000 PAIRS and when these are gone there will be no more at any price.

THEY WILL GO QUICKLY—There are a thousand times more Bicycle Riders than we can supply.

Our Crack Proof Shoe.

No. 3950. The best tanners in America have been experimenting for years, trying to discover a leather which would be crack proof. One at least has been successful, and has discovered a new method of tanning calf skin which not only makes it absolutely crack proof, but improves its looks. The stock has a heavy pebbled surface, is very soft and pliable, and will take a polish much better than the ordinary calf skin. The shoe is made over the Bull Dog last, which is the newest thing out, is a Goodyear welt, and the bottoms are the best oak sole leather with extended edges. It has a calf back stay and top facing, and we can recommend it to those who want one of the latest shoes out. Every pair warranted crack proof. Sizes, 6 to 11; widths, C, D, E and EE. Price per pair.... **$3.45**

Men's Cordovan Lace, Opera Toe.

$6 VALUE FOR $4.50

No. 3952 Men's Shell Cordovan Bals, made from finest selection of cordovan, or horse hide. This shoe has the new opera toe, which is between the needle and the Yale toes, and a great many prefer it to any other style. The bottoms are cut from the best oak sole leather and sewed on by hand, making it a very handsome and durable shoe. The horse hide leather being very tough will retain its shape much better than any other leather. Sizes, 6 to 11; widths, C, D, E and EE; weight, 32 oz. Price, per pair..... **$4.50**

Bankers' Shoes.

No. 3962. We have decided this season to have this shoe made from llama skin, as we believe it will give much better service than kangaroo and at the same time is fully as soft and pliable. The stock has a **fine pebbled surface,** looking exactly like the kangaroo stock, and is as tough as horse-hide. The shoe is made with Adelphia last with tip, **genuine Goodyear welt bottoms** and there is nothing easier for bankers, lawyers and others who are doing office work. Sizes, 5½ to 11; widths, C, D, E and EE; weight, 32 oz. Price, per pair... **$3.25**

Men's Kangaroo Lace, Plain Toe.

No. 3965. This Shoe is made from the genuine Kangaroo skin, which is very soft and glovelike and at the same time tough, which will wear equally as well as stock much heavier, and will give much more comfort to the wearer. Our Corn Cure Shoe.

No. 3973. This Shoe we make for our own trade. This stock is a first-class selection of calf-skin, with dongola top, Goodyear welt bottom. The chief feature of this shoe is the toe, as it runs extra wide, being about the same width as it is across the ball of the foot, giving the toes abundance of room to lie in their natural shape without being cramped as they are in a narrow toe shoe. This shoe will create no corns or ingrowing nails, but on the other hand will cure them if you wear a pair of these shoes. Very neat in appearance, and made of the very best material. If you are after a comfortable and at the same time serviceable shoe, order this one. Sizes, 6 to 11; widths, D, E and EE; weight, 35 ounces. Price, per pair, $2.98.

Invisible Cork Sole Calf Lace.

No. 3982 This Shoe has been very popular the past season, from the fact that it has the same appearance as an ordinary shoe, and at the same time is absolutely water-proof. It is made from selected calf-skin, Goodyear welt, has the new opera toe with tip, and has a genuine cork sole between the outer and inner soles, making it very warm and thoroughly water-proof. When you want a cork sole shoe do not overlook this one. Sizes, 5 to 11; widths, C, D, E and EE. Weight 38 oz. Per pair..... $3.25

Men's Calf Lace, Case Cork Soles.

No. 3985 Made from Satin Calf, opera toe with tip, glove top, machine sewed and has the case cork sole, made from genuine sheet cork, but is visible. This shoe, while not quite so sightly as the one preceding, will give good service. Sizes 5 to 11; widths, D, E and EE. Weight 38 oz. Per pair..... $2.00

Men's Satin Calf Lace, Cork Sole

We have this Shoe made from the finest selection of Satin Calf, with Needle Toe and Tip.

No. 3986 The soles are made extra heavy and with extended edges, which give it the appearance of a much higher priced shoe. It has fine Dongola tops and a genuine cork sole placed between the outer and inner soles, thereby making it very warm and damp proof. We can recommend it as the best cork sole shoe we have ever seen for the price. Sizes, 6 to 11; widths, D, E and EE. Weight 38 oz. Price per pair..... $2.50

Imported Russia Colt Skin Shoes.

No. 3990 The Stock in this Shoe is Imported directly from Russia, and tanned here in Chicago. Our house has not secured all of the skins, but have been fortunate enough to secure such a quantity as will supply our patrons. The stock is thoroughly crack proof, very soft, and has a fine grain surface, similar to a kangaroo, and is very tough. We warrant each pair not to crack, and if they do, without just cause, we will replace them with new ones. The shoe has the long, drawn out needle toe, with tip, McKay sewed bottoms, and we can recommend it as being a first-class shoe. Sizes, 6 to 11; widths, D, E and EE. Weight 32 oz. Price, per pair..... $2.60

A Good Thing.

No. 3991. This Shoe we have called "A Good Thing," because the name signifies just exactly what we believe the shoe is.

It is made from genuine Russia colt skin, which is very soft and pliable, and has a fine grain surface, similar to a kangaroo.

It is also said to be crack proof. This shoe is made with plain, medium toe (congress), and has the best of bottom stock. We can commend it as being first-class in every particular. Sizes, 6 to 11; widths, D, E and EE. Weight 32 oz. Price per pair..... $2.60

RUBBERS AND OVERSHOES.

We have always handled strictly first quality of Rubbers and Overshoes, and will continue to do so this season. For the benefit of those of our patrons who wish something a little cheaper, however, we have decided to quote also one of the best brands of second quality rubbers on the market. They are fully as good as a great many so-called firsts. It will be to your interest to order your rubbers early, then when you need them you will not be obliged to pay a big profit to your local dealer. We quote all rubber goods at wholesale prices. Your dealer can't buy 1000 pairs any cheaper than you can buy one pair from us.

THE OLD RELIABLE SNAG PROOF BOOTS.

No. 31388. The accompanying cut represents the old reliable snag proof rubber boot which we have handled ever since we opened our shoe department, except for the spring season, which has just past. We were led to believe that the boot we quoted would give better service than this one. After giving the new boot a fair trial we are thoroughly convinced that there is no rubber boot made which will give as much wear as the old reliable. Made from heavy imported snag proof duck, covered with the very best of rubber, thoroughly waterproof, with heavy sole and tap, heavy rolled edge, which protects the uppers to a great extent, and altogether makes a boot which cannot be excelled. Every pair is warranted for a fair and reasonable amount of service and also warranted not to crack or snag. Sizes, 6 to 12, Short boot, $3.50. Hip boot, $4.50.

SPECIAL COMBINATION.

No. 31389. Men's felt boot and perfection combination. Consists of a good felt boot, and Lumberman's one buckle perfection of second quality. MEN'S FURNISHING GOODS DEPARTMENT

WE TAKE PRIDE IN CALLING YOUR ATTENTION to what we believe to be the most complete and up to date **Furnishing Goods Department** ever placed before the buying public in Catalogue form.

AMONG THE DESIRABLE GOODS IN FURNISHINGS FOR 1897 we do not think there is an item omitted. Our professional buyers have been in the market constantly since the new styles began being made, and neither time nor expense has been spared in our efforts to give our customers an opportunity of securing the very latest and most desirable merchandise and at the very minimum price as well as on liberal terms of shipment.

AGAIN, WE INVITE YOU TO A CLOSE COMPARISON OF OUR PRICES WITH THOSE OF ANY OTHER CONCERN. We would ask you to carefully study our Catalogue, our descriptions, illustrations and prices, to compare them with others, and then send your order where, in your judgment, you can get the most desirable goods and the greatest value for your money. **We are perfectly willing that our goods, our descriptions, illustrations and prices should stand on their merits,** and on their merits alone we anticipate the largest trade in this line we have ever enjoyed.

OUR PREPARATIONS FOR THE COMING SEASON HAVE BEEN FAR MORE EXTENSIVE than ever before. Every item we have listed has been contracted for direct with the manufacturer on the basis of large quantities for Spot Cash, and to this we have added only our one small conservative percentage of profit, which alone enables you to buy the goods for even less than dealers can buy in quantities, and on this basis we earnestly speak for your trade.

OUR GUARANTEE. **We guarantee every article quoted to be exactly as represented,** and if not found so you are at liberty to return it and we will cheerfully refund your money.

OUR TERMS. **Our Terms are very Liberal.** Any goods will be sent to any addrees by freight or express C. O. D., subject to examination, on receipt of a sufficient deposit to cover transportation charges both ways. As a rule $1.00 deposit with order is sufficient with express shipments. Where goods are sent C. O. D. you examine them at your nearest railroad station, and if found perfectly satisfactory and exactly as represented, pay the express agent our price and charges, less the amount sent with order.

DISCOUNT FOR CASH. **We allow a Discount of 3%** if cash in full accompanies your order. If you send the full amount of cash with your order you may deduct 3% from our price. Nearly all our customers send cash in full. You take no risk, for if the goods are not perfectly satisfactory you are at liberty to return them to us and we will cheerfully refund your money.

WE ARE EXTREMELY ANXIOUS TO RECEIVE YOUR ORDER FROM THIS DEPARTMENT, not so much for the little profit there is in the goods to us for they are sold on a very small margin, but for the good it will do us as an advertisement. We know we carry a much better line of merchandise than is carried by the average dealer, and yet we are able to sell it to you at far less than inferior goods can be had at home, and if we get one order from you we know you will be so well pleased that you will not only favor us with your future orders but will use your kind influence among your friends in our behalf.

THIS DEPARTMENT IS IN CHARGE OF A MAN WHO HAS MADE FURNISHING GOODS HIS LIFE'S BUSINESS. He is assisted by a large number of able clerks, and nothing is allowed to come in or go out of this department unless it passes a very critical inspection. No goods are bought except those that are manufactured by concerns of established and well known reputation.

WE THANK YOU IN ADVANCE IN ANTICIPATION OF YOUR ORDER, at the same time assuring you of such values and service as cannot be had elsewhere.

MEN'S AND BOYS' SWEATERS.

OPEN THE PORES.

WE SELL SWEATERS GOOD ONES TOO....

Nothing Will open them quite so well as a SWEATER. No garment in the whole world has ever attained such universal popularity as the SWEATER of to-day. All sorts and conditions of mankind are numbered among its devotees.

They are the very best that human skill can devise. Our sweaters have more special features and are made from finer yarns than any other line of sweaters known. Its never wise to be boastful and we try to be modest about our sweaters, but we cannot help feeling enthusiastic over the pleasant surprise that awaits a purchaser of one of these garments. Every garment we quote is strictly up-to-date and will give thorough satisfaction. Our prices are based on the lowest possible percentage, and you will find them from 25 to 40% lower than you can possibly purchase the same grade of goods for elsewhere.

All that is New and Fashionable We Have in Stock.

UP-TO-DATE STYLES AT UP-TO-DATE PRICES. **We are the Largest importers of Neckwear Silks in America.** Our shelves are loaded down with rich and novel Brocades, Satins, Japanese Silks, Persian Novelties, French Fancies, Kai, Kais, Taffetas, and many others too numerous to enumerate. We import the silks direct and have them made up into the latest shapes, in Tecks, De Joinvilles, Four-in-hands, Puffs, Bows, Club Ties, etc. Our prices are in many instances lower than your local merchant could buy the same qualities at wholesale.

OUR PATTERNS are far ahead of anything ever shown in this line of goods in this country. They are really superb. You will be more than pleased if you place your order with us for neckwear this season. Aside from the fact that we save you all middlemen's profits and sell you the goods at less than wholesale prices, the fact is worthy your consideration that we carry the largest assortment of neckwear of any one concern in this country, perhaps in the world. There is hardly a style or shape manufactured but what we can supply it.

No. 2205. THE FAMOUS DE JOINVILLE SCARF. The most popular and swellest gentleman's scarf ever produced. These scarfs are 6 inches wide and 38 inches long, and are made from purest woven silk specially imported by us, and without any exception they are the handsomest line of silks ever brought to this country. We have an immense assortment, comprising more than three hundred different designs; all light and medium colorings in nearly every color and shade ever thought of. They consist mostly of combination colors, just a few of which are, blue, lavender, light green, cherry, strawberry, olive, myrtle, moss green, torquoise, opal, red, etc., all combined with light contrasting shades of cream, white, bright sunshiny yellow, pale blue and a host of other beautiful shades; handsome brocade patterns in Persian effects, Oriental figures, Dresden fancies, Chamelon grotesques, Roman novelties, Scotch and Highland checks, and an almost endless variety of artistic and fashionable designs; our own special importations and not to be found elsewhere in this country. The De Joinville scarf is popular with fashionable gentlemen, because of its exclusiveness and because it can be tied into several different shapes. Illustration No. 2205 shows the De Joinville as worn with an ordinary finger ring. No. 2206 shows it tied in Prince of Wales knot. It can also be tied into shapes like illustrations No. 2201 and 2203 and into beautiful puffs similar to No. 2207. Retail value of these scarfs, $1.00.

For Ladies and Misses.

In this Department we have selected for the coming season a line of gloves of exceptional quality, rare beauty, and of surpassing excellence in finish, and absolute correctness as regards style. We are strictly up-to-date on ladies' gloves, as you will see by the quotations below. Perfection in fit is one of our strong points. Every glove we send out we guarantee to be the exact size it is marked. Our gloves all run true in size. In ordering always be careful to state the exact size you wish, you will then secure a perfect fit.

Ladies' Sizes are 5½ to 8 only.

Misses' Sizes are 4¾ to 6½ only.

The size is determined by drawing a tape line around the fleshy part of the hand, close to the knuckles. The number of inches around the hand determines the size of gloves required. Draw tape medium tight.

SPECIAL NOTICE:—We cannot furnish Ladies' Kid Gloves larger than size 8. They are not manufactured.

Nutria Fur Hats.

The Finest Hats in the World are Made in America, and the Finest American Hats are Made from Clear Nutria Fur.

Nutria Fur comes from a small South American animal, greatly resembling the beaver, but much more plentiful. The skins of these animals are imported into this country in immense quantities by manufacturers of **Fine Hats.** The fur is thoroughly cleaned, combed and pounced, being finally transformed into felt, out of which the finest hats are made. **Nutria fur** is particularly desirable for this purpose, as it is very fine, soft and silky, and when prepared into felt contains no lumps, impurities or other objectionable matter. A clear Nutria fur hat is as soft and smooth as a piece of silk, will retain its shape and color and will outwear any other kind of hat made. Our connections with one of the largest fur hat manufacturers in this country make it possibla for us to sell these **Nutria fur hats** direct to the consumer at about one-third ordinary retail prices. **In ordering always mention catalogue number, size and color desired.**

INFANTS' AND CHILDRENS' SUMMER UNDERWEAR.

No. 2993 The Ruben's Shirt is simplicity itself, Is made without any buttons whatever, and is so constructed that double protection is given to the vital parts—the chest, lungs and abdomen. This is by all odds, the most sensible and practical infant's shirt ever made. The highest medical authorities pronounce it healthful and as being particularly desirable for delicate infants. They are made from fine, white merino and lamb's wool, and contain about 40% pure wool. Cream white, with double stitched edges to prevent raveling. The straps fasten at back with small safety pin, and can be adjusted **almost as quick as a cat can wink her eye.**

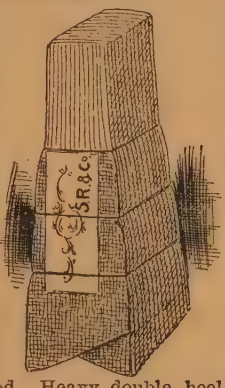
HOSIERY DEPARTMENT.

THE LARGEST STOCK OF HOSIERY EVER UNDER ONE ROOF.



PROGRESS IS THE WATCHWORD OF THE HOUR.

Ours is a progressive Hosiery Department. It is the largest exclusive hosiery department in the world. Our warerooms are full to overflowing and are full of good things, too. Never in the history of hosiery buying have we ever before been able to offer our customers such exceptionally good values as we hold out to them this season. We control the entire output of three of the largest and best hosiery and knitting mills in the world. Two in America and one in Europe. The products of these mills have attained a lasting reputation throughout two continents. We believe that the great majority of the people appreciate good hosiery and we are going to give them a chance to buy the best hosiery made at prices that will at once appeal to shrewd and economical buyers.

DRY GOODS DEPARTMENT

DO ✦ NOT ✦ OVERLOOK ✦ THIS ✦ DEPARTMENT

WHEN MAKING UP YOUR ORDER. For this Season We Believe We Show the Most Complete Dry Goods Department to be Found in Any Catalogue. We have spared neither time nor expense to make this department thoroughly attractive with the most complete line of everything conceivable, everything the market contains which goes to make up a complete dry goods department, and we believe there is nothing wanting in any of the little details. Our artist has used the greatest care to clearly and correctly illustrate all the different articles quoted, and in such a way that you can order from us almost as intelligently as if you were in our store selecting the goods from stock.

ABOUT PRICES. **We are Determined in Every Department to Maintain Our Well Earned Reputation of The Cheapest Supply House on Earth,** and that our prices may be below all others our dry goods buyers have made this season's purchases direct from mills and manufacturers on the basis of very large quantities for spot cash. **The Department is so Organized that it can be run very Economically,** and to the actual cost to produce we add simply our one small percentage of profit, and offer you your choice of this great collection on our one small profit manufacturer-to-consumer plan. **Compare Our Prices With Those of Other Houses Before Making up Your Order. We Claim to be the Cheapest Supply House on Earth;** we would like for you to make the comparison. If we are not the cheapest house we will not expect your order. **If Everyone Before Ordering Would Look Over the Different Catalogues,** inquire of their home markets and ascertain the financial standing and reputation of the house to whom they are about to send an order, they would be very sure of placing their orders in the hands of people whose reputation is unquestioned whose ability to make the lowest prices is the best, and where they would get the greatest satisfaction. We always urge our customers to this precaution, and we think this alone is a guarantee for our ability to save you money.

OUR SPECIAL TERMS. **We will Ship Any Goods from this Department** (except cut piece goods) **by Freight or Express C. O. D.,** subject to examination on receipt of a sufficient deposit to cover freight or express charges both ways. **You can Examine Goods at Your Nearest Railroad Depot,** and if found to be perfectly satisfactory and exactly as represented, pay the agent our price and charges less amount sent with order, and the goods are yours. **Three Per Cent. Discount Allowed if Cash in Full Accompanies Your Order.** If you send the full amount of cash with your order you may deduct 3 per cent. from our price. Nearly all our customers send cash in full. **In Comparing Our Prices with Those of Other Houses,** please consider this **THREE PER CENT. CASH DISCOUNT.** It makes quite a difference in the price of the goods and will nearly always more than pay the freight or express charges.

ABOUT FREE SAMPLES. **When Requested We will Furnish Cloth Samples of Dry Goods, Carpets, etc.,** but we would consider it a special favor if you would confine your requests to the exact styles interested in. **We are Anxious that You Should Have the Samples Needed** to make up your order, but as a matter of economy of time we are compelled to urge our customers to **Confine Themselves Strictly to the Exact Number, Kind and Price of Goods Wanted,** and not ask for samples which would be of no use to you and considerable expense to us. The time used in supplying one applicant with samples amounts to very little, but in supplying several thousand daily it is very great; in order to prevent delay we trust you will adhere as closely as possible to this request. **Furthermore,** the cost of material used in supplying several thousand requests for samples daily is considerable, and you will be benefited by preventing the necessity for advancing the prices of the goods, as the cost of samples very materially increases the cost of the goods. **At the Same Time, We Assure You We will Deem it a Privilege to Supply You with the Needed Samples,** and would thank you in advance for this privilege as well as for your consideration in making your requests for samples as inexpensive for us as possible.

WE OFFER YOU THE FOLLOWING ADVANTAGES. **By Selecting the Goods Wanted from this Department** you are sure of getting the very **Latest Styles. Everything We Offer** is brand new, **Manufactured Expressly for this Season's Use,** the very latest styles direct from the largest and most reliable American and European manufacturers. **There is Nothing Old,** no last season's goods, nothing that is shop-worn. **When You Send Your Order to Us** you are assured of getting the very latest, and that at a **SAVING OF FROM 25 TO 50 PER CENT. IN PRICE. You Have the Benefit of Selecting from One of the Largest Assortments** in the country, and you have our **Guarantee** that if the goods are not exactly as represented, if they are not satisfactory in every way, you can return them at our expense.

IF YOU ARE UNACQUAINTED WITH US **AND HAVE ANY DOUBTS** as to our responsibility, you are at liberty if you choose to send your order and money to any **Express Company** in this city, to the **Metropolitan National Bank** or the **National Bank of Commerce** of this city, with instructions not to turn it over to us unless they know us to be thoroughly reliable. **Your Attention is also Called to the Two Bank Letters** in the front of this book, reproduced from photographs and the testimonials shown on several of the pages in this book from customers of ours who have, of their own free will, written us saying how much they have saved and what advantages they have gained by sending their orders to us.

IF YOU HAVE NEVER ORDERED DRY GOODS FROM US, **We are More Than Anxious** to receive an order if ever so small, not for the little profit there will be in it for us, for these goods are sold on very close margin, but for the good it will do us as an advertisement. **We will endeavor to send you such goods as have never been seen in your section at anything like the price, send you so much value for your money that you will of your own free will recommend our house to your friends, and in this way increase our sales of dry goods in your neighborhood.**

Note—Embroideries come in such endless variety of patterns, that it is impossible, even with the immense stock we carry, to always have each pattern. Should we be out of a certain pattern, we shall always substitute a prettier and more expensive one without any additional charge.

Special Mention—We have all those fine numbers of spool cotton for dainty work on under garments and infants wear, i. e. numbers 100 to 200.

Ladies' Ready-to-Wear Clothing

FOR SPRING AND SUMMER OF 1897.

For the Spring and Summer of 1897 we offer a line of Ladies' Waists, Skirts, Wrappers, Cloaks and Dresses, which for style, quality of material and make cannot be equalled elsewhere at anything like the price. We have made our preparations for the coming season's business on such an extensive scale that we have been able to reduce the cost of production to the very lowest mark, and by adhering strictly to our one small profit plan we are prepared to supply our customers with anything in this line for even less money than the average dealer is compelled to pay when ordering in quantities.

STYLES GUARANTEED THE VERY LATEST FOR SPRING AND SUMMER.

The garments we offer in the following pages are cut on the very latest style patterns and made up in the best possible manner. **The quality of material used is of the very latest.** We have made our selections with great care and with a view to insuring perfect satisfaction in every case. **We employ only the most skilled cutters and tailors** and make a class of goods that will compare favorably with the lines handled by the most fashionable tailors in large cities where fancy prices are always secured.

DO NOT PAY RETAIL PRICES

For this class of merchandise. With our facilities for securing material at first cost to produce, and being in position to manufacture the same at the minimum cost and always in the very latest style, we can supply you with any garment wanted for spring and summer at about what the material alone would cost you if bought of your local dealer.

YOU CAN NOT AFFORD

To buy the material and make a waist, skirt, wrapper, dress or other garment, nor can you afford to **pay a dressmaker** for making such garments, when you can buy from us the finished garments for the price of the material alone in your own market.

You will Find our Garments Distinctively Different from those Carried by the Average Retail Dealer.

They will not only be made of the very latest material, fabrics which have been woven expressly for this season's wear, but they will be cut on the very latest style patterns, the same as are used by the best tailors in metropolitan cities. They will be made up in the finest style and best possible manner, and as a rule you will get a **better fitting, more stylish and better made** garment and always at the price you would have to pay for material alone if you were to have it made by your local tailor or dressmaker. **Look at the grand array of bargains on the following pages.**

We show a Line of Ladies' Waists on the two fashion plates following at from **25c to $3.98,** which for **style, quality of material and workmanship** can not be equalled elsewhere at anything like the price.

We would ask you to carefully compare our prices, descriptions and illustrations on this line with anything offered by others at anything like the price, and if you do not conclude that we can save you money and furnish you more stylish garments than you could get elsewhere we will not expect your order.

We will send any waist by mail postage prepaid where cash in full accompanies your order at 12c extra to pay postage. Please observe this in ordering, and by sending cash in full with your order you can deduct 3 per cent from our price.

To insure a perfect fit when ordering a waist, state your height and number of inches around body at **bust and waist. We furnish waists in all sizes ranging from 32 to 42 inches bust measure. Extra sizes will be made to order at 20 per cent extra. (Note our special C. O. D. terms as given below.)**

Look at our Bargains in Ladies' Spring and Summer Skirts on the Following Pages

We show a line of ladies' spring and summer skirts in the very latest styles at prices ranging from **$1.19 to $9.25,** skirts that you can not buy elsewhere at anything like the price. We wish to say that we have selected the materials for these skirts with great care, and we feel confident we can supply you **a more stylish, better made and better fitting skirt** for less money than any other house in existence. Every skirt we carry from the cheapest to the best is thoroughly well made and guaranteed in every respect, and as for the price, we would ask you to carefully compare our prices with those of any other house and favor us with your order only if you find our prices lower.

When skirts are ordered we must know the number of inches around the body at waist, lenght of skirt from waist to bottom, and weight. With this information we can guarantee to furnish a perfect fitting garment. We furnish skirts in lengths from 38 to 44. **Larger size will be made to order and are 20 per cent extra.** Please note our 3 per cent discount for cash, which will nearly cover express charges. (Note our special C. O. D terms as given below).

OUR SEVEN BIG BARGAINS IN LADIES' WRAPPERS

will be found on the following plate. We show a line of ladies' wrappers in the very latest style for spring and summer of 1897 at prices ranging from **69c to $1.75,** wrappers that you can not buy elsewhere at anything like the price. We wish to say that these goods are made from the very latest style fabrics, they are nicely tailored, well trimmed and finished, and are far superior to the goods carried by the average retail dealer. We would only ask that you carefully compare the **illustrations, descriptions and prices** with those of any other concern, and if you do not conclude we can save you money we will not expect your order. **We guarantee every garment to be exactly as represented and more value for the money than you can possibly get elsewhere. These wrappers come in sizes, 32 to 42 bust, and in lengths 54 to 58 inches. Larger sizes will be made to order and furnished at 20 per cent extra.**

In ordering, state number of inches around the body at bust, your height and and weight, and we can guarantee a perfect fit.

Wrappers will be sent by mail postpaid when cash in full accompanies your order and **25c extra** to pay postage. When you send the full amount of cash with your order you may deduct 3 per cent from our prices which will help you to pay the postage **(Note our special C. O. D. terms as given below.)**

LOOK AT OUR LINE OF INFANT'S, CHILDREN'S, MISSES' AND LADIES' SPRING AND SUMMER CLOAKS AND WRAPS.

We show all the Latest Styles and most desirable goods and the greatest value ever offered. Compare our prices on these goods with those of any other concern and judge for yourself as to the money saving argument we give in every price quotation.

In ordering infant's long cloaks no size is necessary. In ordering children's reefer jackets, state age of child, and say whether large or small of age. **In ordering children's summer jackets, state age** and say whether large or small of age. **In ordering ladies' or misses' spring or summer wraps, viz.** cloaks and capes, follow our rules for measurement as given below, or if **bust measure** and **weight** is given us we can guarantee a perfect fit.

We wish to say that our cloaks and capes are of the very latest style for spring and summer. They are cut by expert cutters on the very latest style patterns, made by the very best tailors we can employ and such goods as you will find only in the finest retail houses in large cities. We are extremely anxious to receive your order for one of these garments, not so much for the little profit there will be in it to us as for the good it will do us as an advertisement. We know that you will be so well pleased that you will favor us with your orders for other goods. (Note our special C. O. D. terms below.)

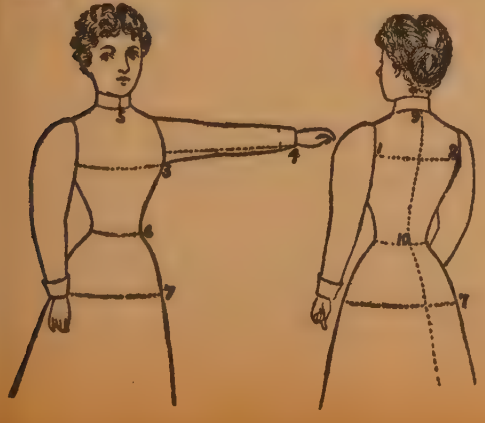
GREAT BARGAINS IN LADIES' TAILOR MADE SUITS.

For the spring and summer of 1897 we offer a line of ladies' strictly high grade tailor made suits, which for style, quality and price will not be equalled elsewhere. Every garment is of the very latest style, cut on the latest style patterns by expert cutters, made by the very best tailors and such goods as you will find only in the largest cities and there in the most fashionable stores.

We have figured our prices on the basis of actual cost of material bought direct from the mills and labor, with our one small profit added, and on this basis we can furnish you a tailor made suit for about the cost of the material alone if bought from your local dealer.

We would call your attention especially to the three plates shown in this catalogue which show a line of ladies' suits at from **$2.75 to $18.00,** which are equal to anything you can buy at retail for double the money.

In ordering suits, it is only necessary for us to have your bust measure, your waist measure, length of skirt from waist to bottom, your height and weight, and we can guarantee a perfect fit; or, if you will follow our rules for measurement as given below it will be preferred.



(Note our special C. O. D. terms as given below.)

OUR SPECIAL C. O. D. TERMS.

We will send any garment illustrated in this catalogue, fill any order for ladies' waists, skirts, wrappers, cloaks, dresses, etc., shipped by express C. O. D. subject to examination on receipt of $1.00 as a guarantee of good faith. **You can examine the goods at the express office,** and if found perfectly satisfactory, exactly as represented and such value as you have never seen before at anything like the price, pay the express agent our price and express charges less **the $1.00** sent with order, and the goods are yours.

DISCOUNT FOR CASH.

We allow a discount of 3 per cent if cash in full accompanies your order. If you send the full amount of cash with your order you can deduct 3 per cent from our price. The best way is to send cash with your order, for you not only save the three per cent cash discount, but you also save return charges on money to us. You take no risk whatever, for we will immediately refund your money if you are not perfectly satisfied.

HOW TO ORDER.

Select the style wanted by number, follow our rules for measurement closely, enclose the necessary remittance of $1.00 as a guarantee of good faith, or our advertised price, less 3 per cent discount, and we will send the goods to your nearest express office by express, and if sent C. O. D. your agent will allow you to examine the garment and satisfy yourself in every way before paying the balance.

Silk Embroidered Flannels.

New Designs. Note Reduced Prices.

Embroidery is done with a smooth twisted silk, giving more service and is more showy than the flat silk usually used. The work is all done on a specially selected cream white 36-inch all wool flannel, with 2-inch folded edge. Designs are all new and are handsomer and greater width embroidery than can be found elsewhere at the same price.

It is not customary to sample embroidered flannels, as very accurate descriptions are given and expense of sampling is great. However, where selections cannot otherwise be made, we will send samples upon request.

Cotton Batting.

Almost all dealers sell Cotton Batting by the roll, and while nothing may be said regarding their weight, people suppose they are getting 16 ounce rolls, as they have always been put up in that way. **Almost all dealers have their batts put up to-day with but 12 ounces, or three-fourths of a pound to the roll,** which makes comparisons of prices by the roll obviously unfair, unless weight is taken into consideration.

All our rolls weigh about 16 ounces—1 pound each (except the cheapest), We say about 16 ounces, as they are as near that uniform weight as can be put up; some may exceed that while others may be a trifle under; the average is one pound each. Our batts are Patent folded, and are not simply a wad of cotton to be repicked and put into the quilt in bunches; each batt is nicely papered, is folded, and will open up all the same thickness; 36 inches wide and 7 feet long.

Cotton batting is put up 50 pounds to the bale, and if sold in that quantity an extra discount of 5 per cent will be allowed.

Special Order Shade Department.

An extra department under our personal supervision, adopted to supply the great demand for shades in extra widths and lengths, and for those who desire less than one dozen of one color and size. We use nothing but the very best hand made, oil painted cloth in this department. The following colors are always carried in stock: dark green, olive, terra cotta, stone, pea green, Spanish olive, ecru.

State whether width given is cloth or roller measure. Roller measure means from end to end of tips. Say whether inside or outside brackets. Add to length of window 6 inches to cover cloth in hem and one turn around roller. Shade cloth 48 inches and wider is made of heavier fabrics and will not always be a perfect match in color.

Unless otherwise ordered, shades will be cut six inches longer to allow for hemming and charged accordingly. **Prices are for Single Shades.**

At no time in the history of wall paper were they so beautiful and cheap as now.

As we buy only from the leading factories, and in car load lots, our customers are thus assured of the best and latest designs at the lowest possible price.

Wall paper should be shipped by freight. Small shipments should be included with other goods, thereby effecting a saving.

We do not ship wall paper by express, C.O.D.

Wall paper is manufactured in 16 yard lengths, which are put up in one double roll.

Our prices are for double rolls of 16 yards each.

Hints on Hanging.

New ceilings and walls should be first given a coat of glue size before hanging paper.

Dissolve one pound of ground glue in one bucket of hot water. This makes a strong glue size.

Should the ceilings and walls be calcimined or whitewashed, wash off old calcimine or whitewash and size as above.

To make paste:—Use wheat flour made into a paste with cold water, then scald with boiling water, stirring same until the proper consistency is reached. Never boil paste.

Paste the length of paper you wish to hang, fold each end toward the center, being careful to have the edges exactly even, then trim. This insures paste up to the extreme edge, makes a better job and takes half the time, as you cut two thicknesses at once.

Full piece of about 50 yards.....11½c
Full piece of about 50 yards..... 9½c

Samples.

Always state what price paper you want. We will send samples of wall paper on request. We desire orders to be sent in as soon as possible, on receipt of samples, as we are unable to keep in stock very long any one pattern. If possible, send a first and second choice. Should you wish to us to send you wall paper at any time, without first selecting same, please state price, what room it is for, and whether light, dark or medium shades are desired.

Rules for Measuring a Room.

Measure the length and breadth of the room, then multiply by two; multiply the result by the height of the room in feet. To allow for doors and windows, multiply the height of each by the width; add same together and deduct from amount. Then divide by 60. The result is the number of double rolls required for side walls. This rule makes all necessary allowance for waste and matching.

EXAMPLE. Room 15 feet long, 12 feet wide, 9 feet high. One window, 6x4 feet; one door 7x4 feet; one window, 3½x4 feet:

15 plus 12 x 2 = 54 x 9 =	486	
1 window 6 x 4 = 24		
1 door 7 x 4 = 28		66
1 window 3½ x 4 = 14		
66	60)	420

7 d'b'l rolls.

The number of rolls required for ceiling is ascertained the same way, dividing the number of square feet by 60.

EXAMPLE. Room 15 feet long, 12 feet wide.
15 x 12 = 180 60) 180

3 double rolls.

Wall paper weighs about 1¼ pounds per double roll.

Always state what room paper is for.

We do not trim wall paper because the edges being exposed, if damaged in transit, would render perfect matching impossible.

Our Prices are for Double Rolls.

Wall paper is usually sold by the single roll.

All papers have match borders and ceilings.

We do not sell paper by the single roll nor sell half double rolls.

CARPET AND RUG DEPARTMENT.

IF YOU HAVE ANY DOUBT ABOUT OUR SAVING YOU MONEY ON CARPETS, SEND FOR SAMPLES AND COMPARE QUALITY AND PRICE.

OUR CARPET DEPARTMENT is now recognized as one of the best in the west, and is fast growing better. Greater sales give us greater purchasing power, experience teaches us how to avoid errors, how to present the matter plainer to you and also how to fill your orders more to your liking. Nearly all manufactured goods have advanced in price within the last two months, and **Carpets are sure to follow.** We have bought a very large stock of all grades for the spring trade, and are quoting them lower than the same grades were ever sold before. **Shrewd buyers will please take note of the above.** Carpets will not be sent C. O. D.

SAMPLES Our experience of several years teaches us it is not necessary to send for samples before ordering to be satisfied with your carpet; your giving quality, color, size of design, what the room is used for that it is to cover, etc., being all that is necessary to get what will suit, **(we have never failed to please our customers when the above instructions were given)**, but in some cases samples seem necessary; to such we say: We will send you small samples of carpet from which you can judge quality, color, etc., free upon request. Should larger samples be wanted we will send you ¼, ½ or one yard samples as ordered, to cover the amount of money you allow for their payment, in the design, coloring or quality wanted, and refund you what you paid upon their return if the transportation charges are paid. **We must know what price carpet you want sample of, also of design and color.** Make these points clear.

SEWING CARPETS **It will usually require a day or two longer to fill an order when carpet is ordered made.** Our charges for sewing carpets are: Ingrain and all yard wide carpet 3 cents per yard; Brussels and all ¾ yard carpet 5 cents per yard; fitting borders, 5 cents per yard extra; sewing borders, 5 cents per yard. When you want carpets sewed, write **"Make"** on the order and allow from one to two yards (according to size of room) for waste in matching. We always cut carpets to match with as little waste as possible. All ingrain carpets are sewed by professional carpet sewers with the herringbone stitch, which makes a flat, turnable, elastic seam. Brussels and all ¾ wide carpets are sewed with a machine made for the purpose. It sews them much better than can be done by hand, and then the seams are all ironed. All ¾ yard goods, especially, should be ordered sewed here, as it is often difficult to make them by hand so they will lie smooth. **In ordering** mention the predominating color wanted, and state whether a plain and fancy pattern is preferred, or whether you want large or small figure. We will use our best judgment in making selections. **Carpets cut and sewed to order cannot be returned if sent as ordered.**

RULES FOR MEASURING CARPETS Ascertain the **width of room** in inches; divide that product by the width of carpet (27 or 36 inches); the answer will give the number of breadths required. Multiply the number of breadths by the **length** of room (allowing 12 to 18 inches on each breadth for possible waste in matching), the answer will give approximate number of feet required. Divide that number by 3 to find the number of yards. Measures for bordered carpets must be very exact. Give diagram of all odd shaped rooms.

MILLINERY DEPARTMENT

WE TAKE PLEASURE IN DIRECTING THE ATTENTION OF OUR CUSTOMERS TO THIS VERY COMPLETE DEPARTMENT, including as it does a **line of trimmed and untrimmed hats patterned after the latest novelties imported from Europe.** Our buyers have been unusually fortunate in securing for the coming season a selection of millinery that has no equal in any ordinary retail store in the country. By importing in very large quantities, securing our goods from the leading manufacturers at home and abroad and selling on our one small profit plan direct to the consumer, we are able to in most cases sell to you a better class of goods than you can find in local retail stores, at about half the ordinary retail price. The illustrations in no instance do the goods justice, and we can only urge our customers to take advantage of our liberal terms and inspect any of the goods which they desire. We have every reason to believe that they will be delighted with the purchase and will be so well pleased with the goods that they will take pleasure in telling their friends where they have secured them and the unusually low price paid.

OUR LIBERAL TERMS. **ON RECEIPT OF $1.00 WITH ORDER we will send any trimmed or untrimmed hat C. O. D. subject to examination. You can examine it at the express office,** and if found exactly as represented, pay the express agent the balance with express charges and the goods are yours; otherwise return them at our expense and we will cheerfully refund your money. **Three per cent discount allowed if cash in full accompanies your order.** This discount will in many cases be sufficient to partially pay the express. It is well to consider the extra saving that may be affected by anticipating your wants, making up a freight order, and including millinery desired with other goods, and have them all shipped together by freight.

The Louette.

No. 23471 The cut shows one of the loveliest creations of the season. CORSET DEPARTMENT.

A Corset Weighs about 15 Ounces.

Our efforts to make the corset department one of the foremost departments of our vast establishment have not been in vain. We now sell several thousands of corsets weekly. Taking care to sell nothing but good corsets that we can guarantee, no matter how low the price, and at all times selling corsets at prices way down, has built up our business in this line.

We directly control the manufacture of a great many of the corsets we sell, and are in a position to see that the material is good, the fit perfect and the corset durable.

If you want to buy one Corset as cheap as your local dealer buys one or more dozens, send your order to Sears, Roebuck & Co.

Please order corsets by **waist measure only.** Corsets are numbered by actual waist measure. If measure is taken outside of dress, deduct two inches for dress, and this will give you the correct size to order. **Do not order by bust measure.**

Dress Trimmings.

We take pleasure in presenting to the attention of our customers the newest popular designs in dress trimming, patterns that have just been put on the market and which will not be found in any retail stores at the present time, as the manufacturers have just brought out the styles. **These are an inexpensive line of ornamentation, and will be exceedingly popular for the season of 1897.** We desire that our catalogue shall contain not only goods that are serviceable, but such as are strictly up-to-date and which we can offer at **very reasonable prices.** These are exceedingly stylish trimmings and such as will be found later on in the season only in the most fashionable retail stores. We **buy** them in large quantities and hence are able to offer them at **exceedingly low prices. All the new Parisian novelties** will be found below, stylish Braids, handsome Beleros and tasty Jets. **We import direct from Europe from first hands,** and thus save our customers all the profits of importers, wholesalers and retailers. The illustrations will give you some idea of the handsome appearance of these trimmings. Fashion A shows the elegant appearance of one of our handsome Boleros. Fashion B shows a striking effect of our up-to-date Loop Sets.

Fashion A.

Fashion B.

Our $2.56 Black Boleros.

25006 We show in illustration a very handsome and decidedly stylish black Bolero. This is a very handsome trimming for waists from the neck to the waist. An idea of its appearance can be gained from the figures above. This Bolero is made of a choice quality of silk braid and when found in any retail store will usually cost from $3.50 to $4.00 per pair. We are exceedingly anxious to please our customers in new fashioned goods, and can recommend our line of trimmings without reservation as the best the market of the world affords. On our factory to consumer system we are able to bring the prices down within the reach of the most limited means.

Our special price per pair.....**$2.56**

A $2.50 Bolero at $1.25.

25008 An up-to-date black jet Bolero. The illustration will give you some idea of the appearance of this handsome Bolero, which is 12 inches long, and will seldom if ever be found in the ordinary retail store. It is a very inexpensive addition to a lady's dress and adds wonderfully to the elegant appearance. Anticipating a very large sale of these handsome trimmings the coming season, we have imported from Europe a large quantity of this particular design, and shall be able to fill all orders promptly, and give better value in this line than can be secured from any other house.

Our special price, per pair.....**$1.25**

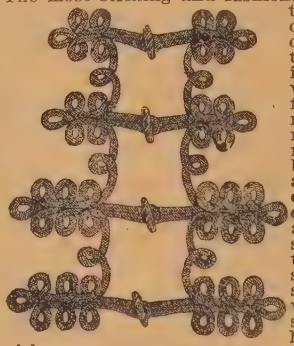
IT will be well worth your while to make up a freight order by getting what Groceries you need, and including such DRESS TRIMMINGS and other small articles. Freight is so much less than express or mail that you will find it . . . . . PAYS.

A $2.50 Bolero at $1.29.

No. 25010 Fancy Cut Beaded Jet Bolero. This Bolero for trimming dressess from neck to waist is beyond a doubt one of the most stylish and desirable patterns that will be sold. We are fortunate in securing a large bulk of the output of this particular pattern, and it is for this reason that we are able to make the price so exceedingly low. This trimming is made of fine cut beaded jet, a handsome pattern that presents an elegant appearance and adds very greatly to the richness of any dress. It will be all the rage for the coming season, and the pattern which we show in the illustration is one of the most stylish importations from Paris. By our one small profit plan we place our poorest customer upon the same footing as the one with much greater means, and enable him to secure new and stylish fabrics at an exceedingly low price.

Our special price.....**$1.29**

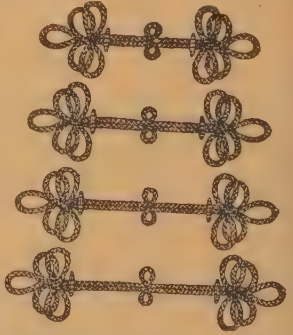
A Stylish Black Silk Military Cord Loop Set.



25014 The Loop Set shown in the accompanying illustration consists of 5 loops of graduated sizes and is used very largely for dresses. The fashion cut B shown above will give you some idea of the elegant appearance that this loop set presents, and at our low price of 90 cents we enable the customer with limited means to take advantage of the most desirable and fashionable patterns in dress trimmings which the market affords. These can be sent by mail at a very small expense, the postage being only 12 cents.

Our special price.....**$0.90**

A $2.75 Loop Set for $1.18.



25016 Our Special 4 Piece Mohair Loop Set. The most striking and fashionable article of dress trimming which you could possibly secure would be one of these handsome Parisian novelties which we have just secured from France. It is made of very fine mohair after a most desirable and beautiful pattern and is well worth the ordinary retail price of $2.75. It is such an article as you will seldom if ever see in the small retail stores. By our one small profit method we put you on the same footing as your local dealer and furnish you these goods at about what he himself would have to pay.

Our special price per set.....**$1.18**

Our $1.75 Loop Set.

25018 A Most Stylish Four-Piece Silk Military Loop Set. We guarantee that if you order one of these loop sets such as we show in the illustration you will be so well pleased with it that you cannot help reccomending us to your friends and neighbors. We look for increased trade by the values which we give old customers, and hence we take pride in showing this handsome military set, and urge the purchase of it, knowing the pleasure it will give you. It is one of the most handsome pieces of dress trimming that could be bought, and being made of silk cord with four graduated loops, it is especially rich and durable. We furnish this set at about half the retail price, and we feel sure that it could not be purchased even in the finest retail stores where it would be carried at less than $3.00.

Our special price, per set.....**$1.75**

Bead Garniture.

25022 A Beautiful Bead Garniture for 47c. The garniture which we show in illustration is such as you would expect to pay at least $1.00 for. It is a very handsome waist garniture and the style is one of the newest novelties which is on the market, in fact it is a pattern you will very likely not find in any retail store. It is made of fancy flat and round cut beads. The illustration can give you but a slight idea of its beautiful appearance. We recommend this article as one of the most desirable and best purchases which you can possibly make in the line of dress trimmings.

Our special price each..... .....**$0.47**

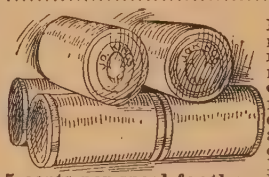
NOTIONS.

Small Wares.



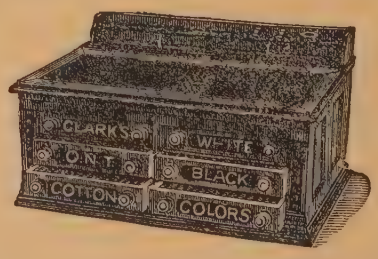
Little necessities, things that everybody needs and everybody **must have.** They seemingly amount to but little, but people buy them every day. Now it is a paper of pins, again it is a spool of thread, or a paper of collar buttons, or a dozen dress buttons, and so on down the list. You pay a few cents more on each article in buying from the retail merchants and these few cents thrown away daily in a year's time amount to a great deal—perhaps enough to buy a new dress, an overcoat or a sewing machine. **Do you want to throw your money away?** Of course not. **Look through our list,** carefully compare our prices, and notice the amount you save by buying a little quantity at a time. Below we give you a little illustration of the difference between our prices and retail merchants' prices.

	Retailers price.	Sears, Roebuck & Co.s price.	Saving.
Clark's O. N. T. Spool Cotton, per spool	$0.04	$0.03	$0.01
Hooks and eyes, per card	.03	.01	.02
Pins, per paper	.03	.01	.02
Sewing silk. Corticelli, 100 yards per spool	.08	.06½	.01½
	.18	.11½	.06½

It is seen by the above that 6½ cents is saved on a 18 cent purchase, or 33 cents on a purchase of $1.00, $3.30 saved on $10.00 worth. Do you use $10.00 worth of small wares a year?
NOTE—$3.30 buys two pairs of very good shoes.

Spool Cotton.

25150 Basting Cotton, (200 yards on each spool), a very superior cotton; the retail merchant gets 24 to 36 cents per dozen for these goods. Our special price, per dozen, **17c;** 3 dozen for **49c;** 12 dozen for.....$1.90



25152 J. O. King's MachineSpool Thread, nice and smooth, **will run on any machine,** full length, **200 yards on each spool,** made from the best of selected cotton yarns, black and white, all numbers, colors in No. 50 only. **Retail merchants ask 5 cents per spool for thread that in many cases is not as good.** Our price per spool, 2c; per dozen, 19½c; 12 dozen for.....$2.25
Note the saving in buying one or more dozens.
25154 500 yard sewing thread. Per spool, 4c; 12 spools.....43c.

The Magic Darner.

25404 The Magic Darner is a machine recently invented and patented for mending hosiery, silk, wool or cotton, all kinds of underwear, napkins, table linens and in fact everything in the household that needs darning. It is a boon to the overworked women, is an ornament to her work basket, is a time, labor and eye saver, is so simple in operation that children can do the darning, and it proves such a pleasure that they tease mamma for that which of all things mamma hates doing the most. One does not have to be an expert needle worker to mend lace curtains and other fine fabrics, the Magic Darner does it for you and saves you one-twentieth of your time. You can take 20 stitches on the machine while you take one in the old way. Well worth $2.50. Price each, 35c; 2 for 65c; 12 for.....$3.75

THE COMBS WE SELL DO NOT BREAK EASILY.

A word about combs; unreliable combs are expensive at any price. We handle only such combs as we can recommend (no matter how low the price); we are very large buyers of combs and are thus enabled to sell these goods for less than the average retailer pays for them. Note the inducements we make to purchasers of three or more combs at one time. **The money you can save by buying a few at a time, more than pays the transportation charges.**

Hair Brushes.

Wood Back Hair Brushes.

ALL of our Wood Back Hair Brushes, the cheapest number up, are made of one **solid piece of wood.** (Solid Back Hair Brushes.) Most hair brushes are made of two pieces of wood glued together, which, when wet, warps and comes apart. A **Solid Back Hair Brush will outwear three** ordinary hair brushes. We sell our solid back hair brushes at less than the price usually asked for ordinary goods. (Remember that a solid back hair brush will last two or three times as long as an ordinary brush.) Hair brushes weigh from 6 to 8 ounces.

Human Hair Goods.

Allow about 5 cents postage on hair goods.

Please do not forget to inclose a good-sized sample of the exact shade wanted, and cut it out as near to the roots as possible.

The prices quoted of **waves, bangs and switches** are for ordinary shades only, and on the basis of a 3-inch parting in the center. Gray and extra shades on larger foundations will cost additional.

There is a great diversity in the styles of hair dressing, according to the tastes of individuals, but none is more in demand than curly bangs, and when used in connection with a nice switch the hair can always be made to look nice, and suitable for any occasion.

There are a great many kinds and styles of "pieces" for the hair, designated by different names. We cannot show or describe them all in our limited space, but if there is any hair work, not here shown, which you may want, please send a description picture of it, **and we will guarantee to produce the article for you at the shortest notice.**

Any of the goods sent C. O. D., subject to examination, on receipt of $1.00, balance and express charges payable at express office.

Three per cent. discount for cash in full with order.

We Save You Money on Bicycles.

HUBBARD, OHIO.

MESSRS. SEARS, ROEBUCK & Co., Chicago, Ill.

GENTS:—Andrew's wheel arrived yesterday and I am happy to inform you that he is well satisfied in every respect—it is a better bicycle than some that was bought for $85. We are all well pleased with it, and if possible Andrew will try and get another order for you as the boys seem to be very much pleased. Thanking you all for your promptness and kindness, and hoping to soon have another order,

I am yours. MRS. F. E. RICHARDSON.

All Her Neighbors Think Sewing Machine is a Beauty.

WHITEHOUSE, CAL.

SEARS, ROEBUCK & Co., Chicago, Ill.

SIR:—Received "Cabinet Machine" all right, thank you for the same, and I will say that I am pleased so far with it and all my neighbors have been in to see it and think it a beauty as it is. Will try to sell one for you if I can. Yours, etc.,

MRS. C. F. LAYMAN.

Parlor Suit Perfectly Satisfactory.

BELLEFONTE, PA

MESSRS. SEARS, ROEBUCK & Co.

DEAR SIRS:—Parlor suit received to-day in good condition and is perfectly satisfactory.

Very truly yours,

E. NOLL.

WE ARE ALWAYS Glad to hear from our customers. If you want to buy anything give us a chance to put in a bid.

THESE TESTIMONIALS COME TO US VOLUNTARILY. WE HAVE THOUSANDS OF THEM ON FILE, AND ANY ONE CALLING AT OUR STORE CAN SEE THEM.

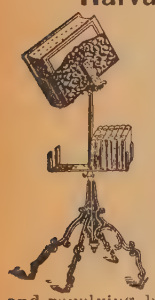
SEARS, ROEBUCK & CO. BOOK & STATIONERY DEPARTMENT

WE PRESENT TO YOUR NOTICE ONE OF THE MOST COMPLETE BOOK DEPARTMENTS IN THE COUNTRY, and if interested in anything in this line we believe it will pay you to carefully read the following pages, note the illustrations and descriptions and particularly the prices.

THIS DEPARTMENT, from a comparatively small beginning, has grown to one of the **first branches of our business.** We are able to make our contracts on the basis of very large quantities direct with the publishers and printers, and at such favorable prices that we can offer you **everything in books,** including all standard works and publications, at even less money than the average dealer is in the habit of paying.

WE HAVE ENDEAVORED TO MAKE EVERYTHING PLAIN by showing small illustrations of many books, stationery, etc., as drawn by our artists direct from the photographs, and to so describe that you can order as intelligently as if you were in our store selecting the goods from stock. **There is perhaps no class of merchandise** which bears a larger profit to the retailer than books and stationery. What his profit is you can readily ascertain by comparing our prices with the prices charged by retailers. **To save this profit** it is only necessary to send your orders to us, and your order and your correspondence will have the prompt and careful attention of either the manager or one of his able assistants.

TERMS. **We will ship books** by express or freight C. O. D. **subject to examination,** when a sufficient amount accompanies the order to cover transportation charges both ways. You can examine the goods at your freight or express office, and if found satisfactory pay the agent our price and transportation charges, less the amount sent with order.



A DISCOUNT OF 3 PER CENT. will be allowed if cash in full accompanies your order. **The best way** is to send cash in full, for you save express charges on return of money to us, and also the 3 per cent. cash discount.

ABOUT MAIL SHIPMENTS. When books are to be sent by mail be sure to enclose enough extra to pay postage. If you send too much we will immediately return the balance, but if you do not send enough we will be compelled to hold your order and write for the balance. **Do not overlook the necessary postage** in ordering books by mail.

OUR CLUB ORDER SYSTEM commends itself to book buyers, for you will observe in looking over this catalogue that we have been able to figure our prices so low on many of the books that we can quote them to you at but little more than the cost of postage. For example, **our Advance Series,** beautiful cloth bound books at 22c each, or 20c in lots of five; postage 10c per volume. It is therefore much cheaper to have books shipped by express or **freight, freight being preferable.** The transportation cost per volume is then reduced to next to nothing. **To take advantage of the lowest transportation rate** it is desirable to make up a freight order. This you can do by getting your friends and neighbors to join with you and make up a club order, which will also entitle you to our larger discount of 4 and 5 per cent. if the order is sufficiently large. **See "Discounts for Cash" on page 3.**

WE ALWAYS ADVISE OUR CUSTOMERS to make their book orders large enough that we may **ship by freight,** but if one or more books are wanted by mail **the postage must be included.**

Harvard Book Holders.

An ornament to the home, office and library. No wood-work used in their construction. A holder we highly recommend. The sides are operated by double acting springs, the book being firmly clamped while closed, and resting upon a level surface when open. The adjustment to books of different sizes and the inclination to any angle or slant are effected by a single screw. They are adjustable to different heights, and are easily set up. They are warranted not to break or get out of order with ordinary use, and after years of proper use will be as good as new.

52000 Complete with casters and revolving book shelf. Nickel Plated and highly polished or antique copper. **Price** **$3.85**

52002 Complete with casters and Revolving Book Shelf and finished in rubber, Japan or bronze. **Price** **$2.10**

52003 One same style as No. 52000 but no shelf or casters. **Price** **$1.85**

52094. How to Become a Successful Electrician. It is the ambition of thousands of young and old to become electrical engineers. Not every one is prepared to spend several thousand dollars upon a college course, even if the three or four years requisite are at their disposal. It is possible to become an electrical engineer without this sacrifice, and this work is designed to tell "How to Become a Successful Electrician" without the outlay usually spent in acquiring the profession. "Every young man who wishes to become a successful electrician should read this book. He will not be an electrician when he has mastered the book, but if he follows the advice there given he will become an electrician at some future time, if he is capable of becoming anything. It may be called a minimum book, for it tells the least that will be necessary, but it tells it in such a way that no worthy young man will be satisfied with the minimum, but will strive for that greater knowledge that will compel true and continually growing success. It is filled with good common sense, and is the clearest and most practical book on the subject we have ever seen."—Public Opinion.

Pictorial History of the United States.

52128. This work has taken rank as the **standard History of the United States.** Contains a clear, vivid and brilliant narrative of the events of our history, from the discovery of the American continent down to the present time. It gives a most interesting account of the **Indians of North America** from the time of the coming of the white men. Every step of our **colonial history** is traced with patient fidelity, and the sources of those noble and, we trust, enduring institutions, which have made our country free and great, are shown with remarkable clearness. Then follows a clear and succinct account of our great struggle for independence, and the establishment of the Federal Union, the events of our career from the close of the revolution to the administration of Harrison. 960 pages, 500 fine engravings. Bound in silk cloth, marbled edges.

Pictorial History of the Great Civil War.

52130. Its causes, origin, conduct and results, containing graphic descriptions of the heroic deeds achieved by armies and individuals, narratives of personal adventure, thrilling incidents, daring exploits, wonderful escapes, life in camp, field and hospital, adventures at sea, blockade life etc., by John Laird Wilson. It is printed from new clear type on fine calendered paper, made expressly for the work, and comprised in one royal octavo volume of 976 large double column pages. It is superbly embellished with numerous fine steel-plate engravings and with maps illustrative of the events recorded in the narrative, embracing battles and other historical scenes; portraits of the leading generals both north and south; maps and diagrams of battle-fields, etc. The work is bound in the most handsome and substantial manner.

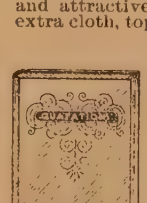
Dialogues and Recitations



WE GIVE YOU YOUR CHOICE of the best selections of Recitations, Dialogues, Humor, Minstrel Jokes, &c. **These books must not be confused** with the cheap trashy literature advertised by other houses. We have exercised **the utmost care** that only such as will meet the **approval of the best taste** should be listed, and you may be assured that you will be pleased. **Always send necessary** postage with book orders to be sent by mail. Remember 3% discount for cash.

52242. The Tuxedo Reciter. This new book contains only such original and selected recitations as have been approved and in many cases tested and received the sanction of the most prominent elocutionists in this country and Europe. Apart from the orignial pieces in the work, there are many rare and curious selections which cannot be found in any other publication. The popular recitations, "Lasca." "The Chariot Race" from "Ben Hur." "A Tuxedo Romance." "The Race Upon The Floor," "Kissing Cup's Race," and many other new and famous pieces are incorporated in this elegant work. "The Tuxedo" is the most complete and attractive book ever published. 317 pages, extra cloth, top gilt. Price.....**$0.60**
Postage, 12 cents.

52244 Quotations. By Alfred H. Morton, B. C. This [illegible] level compilation of pithy quotations selected from a great variety of sources and alphabetically arranged according to [illegible] sentiment. An important feature of the book is the characteristic lines from well-known authors. In it are hundreds of [illegible] sayings of widely varying [illegible] sation, accredited to [illegible] sources. It contains [illegible] popular quotations in [illegible] together with many [illegible] bits of prose and verse not generally found in similar collections. Cloth, price....**$0.40**

WE WANT YOU TO BE SATISFIED ABOUT OUR HONESTY BEFORE YOU GIVE US AN ORDER. WRITE TO THE METROPOLITAN NATIONAL BANK OF CHICAGO, ALWAYS ENCLOSING STAMP FOR REPLY.

52246 Hand-Book of Pronunciation. By John H. Bechtel. This work contains over five thousand carefully selected words of difficult pronunciation alphabetically arranged. Two forms of pronunciation are given. The first employs as few diacritical marks as possible and is designed for those to whom such marks are a stumbling block instead of a help. The second is a close phonetic analysis of the word, in which every vowel is marked, every necessary sign employed, every silent letter omitted and every accent, primary and secondary, carefully noted. Cloth, price.....**$0.40**

52248 Practical Synonyms. By John H. Bechtel. This volume avoids the tedious prolixity of the more scholarly works on the one hand and the fatal mistake of an insufficiency of related words on the other. It will be found to meet the wants of the busy merchant or lawyer, the thoughtful clergyman or teacher, and the wide-awake school boy or girl who is ambitious to express the thoughts of the mind in more fitting phrase than the crude slang that two often forms their sole verbal capital. Cloth, price.....**$0.40**

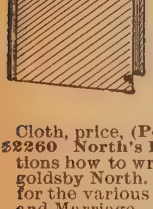
52250 Parlor Games. For the Wise and Otherwise. This complete and attractive volume contains a splendid collection of games for all kinds of amusement, entertainment and instruction, thus answering most happily that puzzling question, "What shall we do?" so frequently propounded on rainy days and long winter evenings. The games are not adapted to young people alone, but to older persons as well, for the most staid and sedate adult will find many of them both profitable and entertaining. Cloth, price.....**$0.40**

By mail, 8 cents extra.



52252 Etiquette. By Agnes H. Morton. B. O. Some manuals of etiquette treat almost exclusively of "state occasions," while others are made up of sundry rules, often illiterate in style and of doubtful authority. Both of these classes of manuals are obviously inadequate to the needs of the great mass "who dwell within the broad zone of the average." For this large class a book that gives information as to the essential points of correct behavior in social life,—points equally applicable to the rich and to the poor,—is the ideal manual. And such a book is this volume. Cloth, price.....**$0.40**

52256 Choice Humor. For Reading and Recitation. By Charles C. Shoemaker. As its name implies, the selections are chosen with the greatest care, avoiding the coarse and vulgar on the one hand, and the flat and insipid on the other. The repertoires of many of the best amateur and professional readers have been examined, and the choicest bits of humor have been carefully culled and bound up in this rich golden sheaf and are here offered to the public for the first time in book form. Paper bound. Price.....**$0.25**

52258 Humorous Dialogues and Dramas. By Charles C. Shoemaker. After the severe labors of the day every one enjoys that which will afford relaxation and relieve the mind of its nervous tension. The dialogues are humorous without being coarse, and funny without being vulgar. Many of them are selected from standard authors, but a number of others have been specially written for the book by experienced writers. Paper binding. Price.....**$0.25**

52260 North's Book of Love-Letters. With directions how to write and when to use them. By Ingoldsby North. This is a branch of correspondence for the various phases incident to Love, Courtship and Marriage. Few persons are able to express in words the promptings of the first dawn of love, and how to follow up a correspondence with the dearest one in the world, and how to smooth the way with those who need to be consulted in the matter. The hundred and forty letters and answers in this book, aided in many instances by the author's sensible comments on the specimen letters, and his valuable hints under adverse contingencies. Dean's Universal Bill File.

55461 Dean's Universal Bill File—A new double arch file. It does not require a perforator. When the bills are placed on the needle pointed post the tips of the arch form a guide, so that the bills are punctured the same distance from the top. The file is securely fastened with copper rivets to book binders, heavy tar board, covered with marbled paper, bound with heavy cloth. This is the strongest and most efficient file made.

Drawing Paper in Sheets.

Whatman's Hand-made.

The Whatman paper differs in surface as follows, viz.:

C. P. signifies "cold pressed," and has a slightly grained surface; used for general drawings and finely finished water color drawings.

H. P. signifies "hot pressed," and has a smooth surface; mostly used for very fine drawings and pen-and-ink sketches.

R. signifies "rough," and has a coarsely grained surface; used for very bold drawing and water color work (Torchon paper).

In ordering please specify which surface is desired, C. P., H. P. or R.

We furnish all sizes of Whatman's papers, but we list only the following ones, because they are most profitable to buy, as they are made of heavier paper, and cost no more in proportion to size than the smaller sheets. We cut the sheets up if desired, thus furnishing small sheets of heavier paper.

The Sketchette.

An Instrument based on thoroughly scientific principles that will enable anyone to **draw or paint a picture.** It is in use by many of the leading artists in the United States and Canada. Has been adopted by the German army for sketching fortifications and is invaluable to the amateur. With the **Sketchette** anyone can successfully sketch, in any size, draw in pencil, crayon, or paint in colors anything visible in nature or still life, in exact reproduction of figure, form or color.

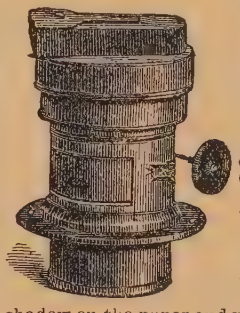
Objects, Pictures, Views from Nature, or anything that can be seen, can be reflected on any kind of working material and focused any size desired. The reflection will be absolutely perfect. All that that is required of the operator is to fill in the outlines and go over the colors (simply fixing the reflection on the working material), thereby obtaining a faithful reproduction of the subject, true perspectives in line and color and perfect in every detail. A result which would be impossible to accomplish by any other means.

CHINA AND TAPESTRY PAINTING.—For Oils, Water-colors, Crayons, Pastels, China and Tapestry Painting, anyone can make their own enlargements or reductions and use anything as a subject, as reproductions, books, flowers, animals, clippings from a magazine or a scene from nature. Color as well as form will appear on the working material.

53890 Sketchette Set up for Use.

53890 Sketchette. In designing this machine our object was to produce a first-class sketching device of neat appearance, that would pack compact, be perfectly light proof, weigh little, of almost indestructible nature. **All these qualities are combined in this machine.** The body is constructed of well seasoned wood, with dove-tailed or glued corners and securely nailed where needed, is covered with best quality of English book cloth imitation black grained levant morocco leather, has solid leather sliding strap handles, metal parts are japanned black with nickel trimmings, has first-class single lens with German plate reflector. Takes in a sketch block size 7¼x8¾ inches (or a picture of that size can be made) materials can be carried inside when machine is packed for carrying and can be readily carried on a bicycle. Size when condensed, 8x9¾x11 in.; weight, about 4¼ pounds. **This machine is not arranged for making enlargements.** Is best suited for outdoor sketching. Our special price.....**$1.75**

53893 Sketchette. This instrument is binnocular and intended for making larger pictures than No. 1, and for making enlargements and reductions, has a rack and pinion focusing arrangement that adds value to its convenience in adjusting (hand wheel is inside the box). The head can be set at right angles to the position occupied to that while in ordinary sketching, for the purpose of making enlargements, has a first-class single lens secured in position by a rubber washer that forms a rest for pasteboard diaphrams for cutting out the light (to make image appear sharp to the edges), has German plate reflector, body is iron japanned black with nickel trimmings, supporting rod is malleable iron, and nickel-plated; the box it packs in forms the table while in use is made of basswood and polished in the natural wood; size when closed 4x10x17 inches, forms a table size 14x17 inches; for making sketches size 12x14 inches or under and enlargements up to same size; has solid leather sliding strap carrying handle; the curtain is made of black gossamer rubber cloth and is fastened to the head by means of an elastic drawstring, forming a convenient and almost light-proof covering. The hand of the operator is inserted under the cover while sketching; he looks at his work through the hooded aperture in the body. Weight, 7½ lbs. Price.....**$3.00**



53894 Sketchette. This instrument has same head, curtain supporting rod, focusing arrangement and handle that No. 53893 has, is very carefully fitted and finished. The carrying case or table is longer and constructed of heavier lumber, is stained imitation walnut, has hard oil finish, rubbed and polished. The table is supported with Dean's improved folding knee tripod (unexcelled for its rigidity) constructed of hard maple and varnished, has japanned iron head with nickel-plated thumbscrew. Makes sketches and enlargements the same as No. 53893.

With each instrument is included one of Dean's improved three-leg folding camp stools, legs are white birch, round, with brass ferrules to prevent splitting, has heaviest quality striped Amoskeag ticking seat with wire cable hemmed in edge and is sufficiently strong to support the heaviest person. The above makes the most complete field for outdoor

sketching ever produced. Camp stool and tripod pack inside of case with ample room for other materials. Weight 9¼ pounds. Price.....**$6.00**

Note—We do not recommend Nos. 53893—53894 for professional portrait artists as only single lens is used in the instruments.

53896 Lens for Sketchette. For professional use, is the same in every particular as No. 53894 with the exception of an extra head, lens and window board or box for excluding light from room, while at the same time admitting it to the object to be reflected for the purpose of making enlargements (so necessary in crayon portrait work). This instrument dispenses with the necessity of having to have a "shadow" or a "bromide" made to work over, as is commonly done by crayon portrait artists. The instrument puts the shadow on the paper and you can "fix" it with either pencil or air-brush. The lenses are achromatic (four lenses in all), are mounted in a brass tube, and fitted to screw collar, has rack and pinion adjustment for focusing, and has leather cap (no diaphrams go with lens). Is imported from France and one of the strongest projecting lenses known, the manufacturer claims that under favorable circumstances it will project an image from diameter of lens to ten feet in diameter. To get good results, the room operated in must be absolutely without light when the lens is capped, all light entering room must come through the lens. The copy to be reflected must be lit up with a strong sunlight. The window board or box is made adjustable so it will fit any ordinary window and by drawing down the roller shade (commonly on windows) to edge of board, the room can be darkened, if not sufficient, hang some light proof substance over the curtain to get the desired result. If the object to be reflected is six inches long and the screen to receive it is two feet behind the lens it will be enlarged to twice the size, or at that ratio as the screen is run back from lens.

WHEN YOU SEND YOUR ORDERS DON'T FORGET THAT WE MUST HAVE SUCH INFORMATION AS WILL BE NECESSARY TO DETERMINE JUST WHAT YOU WANT.

WATCH AND JEWELRY DEPT.

WATCH AND JEWELRY DEPARTMENT.

The Watch and Jewelry Department wishes to thank our many customers for their very liberal patronage during the past year. We are glad to note the increase in the orders for very high grade watches, also a very large increase in the diamond trade, which indicates the appreciation of the higher class of watches and jewelry. Our shipments from the Watch Department throughout the year have averaged several hundred per day. Any one day's shipment would make a very large stock for the average retail jeweler. We think that our customers should be able to understand from this that a very small profit on each article sold will satisfy a concern whose aim it is to give the most value they possibly can for the money. We have undertaken to describe every article in the catalogue exactly as it is and to fill every order exactly according to description. By so doing our customers are always satisfied; in fact, it is the only way to retain their good will and constantly increase our trade. **We have devoted three pages** in the beginning of this department to a careful description of the different movements listed, how gold filled cases are made, etc., it being our aim to place our customers in position to decide intelligently what they should have, and know what they will get for their money before they order.

OUR GUARANTEE. With every gold filled, silver or solid gold watch, we give a certificate of guaranty. With gold filled watches the certificate guarantees the case to wear and keep its color for fifteen or twenty years, and the movement to be an accurate timekeeper for five years. This guaranty is given in addition to the guaranty which is fitted in the back of the watch case. As to the value of our guaranty, we will refer you to the first page of this book under the head of **OUR RELIABILITY.**

OUR PRICES. In watches and jewelry we buy nearly everything direct from the manufacturers in large quantities for spot cash, and as we sell for cash, having no bad debts, we are satisfied to sell at prices which the retailer pays, and on a large per cent of goods for much less money.

YOU CAN MAKE MONEY Selling watches, jewelry, silverware, etc., for when you can buy them for the same, or less money, than the retail dealer who sells on from 30 to 100% profit and has large expenses in the way of rent, clerk hire, fuel, light, etc., you can readily see that you could undersell him and still make a handsome profit for yourself.

DISCOUNTS For cash with order we allow a discount of 3 per cent. on orders amounting to $50.00 or under. Over $50.00 and under $100.00 4 per cent., on $100.00 and upwards 5 per cent. Do not ask for further discounts on quantities, as the margin of profit is based on the sale of large quantities, whether they be shipped to one or more persons. Our profits are so small that they will not admit of our making any further reduction.

OUR VERY LIBERAL TERMS We desire to make our terms of shipment as liberal as possible, consistent with safety and good business principles. Watches, jewelry, diamonds, silverware, clocks and optical goods will be shipped C. O. D. by express when desired, when a deposit of sufficient amount to pay the express charges both ways is sent with the order, the balance to be paid when goods have been received. Goods cannot be sent by mail C. O. D. When to be sent by mail the full amount of cash must accompany the order, also enough to pay postage. Be sure to enclose enough to pay postage, and if any amount remains it will returned to you. When goods are to be shipped C. O. D. we will require deposits as follows:

AMOUNT OF DEPOSIT REQUIRED For watches and jewelry 50 cents must accompany the order; for diamonds, optical goods, silverware, clocks and other heavy goods we require $1.00 with the order. Orders for surveyors' instruments must be accompanied by at least $5.00. We never consign goods to be sold on commission, nor do we sell goods on time. Our terms are strictly cash in full with order or C. O. D.

MAIL SHIPMENTS We recommend sending jewelry, watches, etc., by mail, as it is perfectly safe and far the cheapest. Postage is 1 cent per ounce. A watch packed for shipment weighs from 6 to 8 ounces; chains, rings and other small articles of jewelry about 2 ounces. Packages amounting to $1.00 or over should be registered, which costs 8 cts. extra. We guarantee the safe delivery of all registered mail packages. Be sure to send enough for postage, and if any balance remains we will return it to you.

ENGRAVING We charge for engraving in script on jewelry, watches, etc, 2½ cents per letter; in old English, small, 5 cents per letter; small script monograms on jewelry, etc., from 25c to 75c. Engraving on flat ware such as spoons, forks, etc., in quantities of 6 or more pieces 1½ cents per letter. Jewelry and watches to be engraved cannot be sent C. O. D.; the full amount of cash must accompany the order.

WATCH REPAIRING We have a thoroughly equipped Mechanical Department, which is fitted with all of the latest tools and appliances for the repairing of all kinds of watches. We have a large force of thoroughly skilled watch makers under the supervision of a very competent foreman, and any watch sent to us for repairs will command very careful and prompt attention. We do not solicit for watch repair work, but are willing to accommodate our customers who wish to have work done in a thoroughly first class manner. Our charges are about half what is usually charged by the retail dealers, but the work will be done in a very superior manner. We cannot give an accurate estimate of the cost of repairs without a thorough examination. Our charges are merely enough to cover cost of manufacture and labor. None but a thoroughly competent watch maker should ever take a watch to pieces for the chances are that he will ruin it.

PLAIN TALK FOR YOUR BENEFIT

WE BEG OF YOU TO READ IT ALL, IT WILL OPEN YOUR EYES.

Throughout this department we have referred in many places to the difference between **our** prices for goods and the prices charged by retailers. We feel that in order to make ourselves thoroughly understood, and to place the matter before our customers in such a manner that they will understand both sides of the question, it is necessary for us to thoroughly canvass the situation and give them a few pointers that will place them in a position to judge for themselves as to the merits of our argument. It is our intention not to make any statement in this catalogue that we cannot fulfill or prove to the entire satisfaction of anyone.

A few years ago such a thing as sending away for goods was almost unknown, but now the custom is becoming so popular that it bids fair to soon be the medium for purchasing the larger portion of goods the consumer uses. Some people, as we are aware, are afraid to send away for goods for fear of being swindled. It is true there are some individuals who advertise in a flashy manner goods which have but little value, using a firm name, and place on their advertising matter a picture of some large building, allowing the customer to draw the conclusion that they occupy the whole of it when probably the truth is they occupy only one or two small rooms. These concerns, however, are little known, and if the customer patronizes only those houses of well-known reputation there is no danger of being deceived.

Retail dealers, however, undertake to convince their customers that all advertising houses will swindle them. We shall take the position of fighting them with their own weapons. We will cut our argument short, but still undertake to give you the points and you can draw your own conclusions.

The retailer's hobby is to make himself socially as popular as possible, and if his town supports any secret or other societies he endeavors to make himself an influential member, using at all times the social garb to attract and bring him trade. He wins the confidence of his customers through personal acquaintance, and while he endeavors to sell goods that will give satisfactory results, it does not alter the fact that his customers pay from one-half more to twice what the goods are worth. There is probably no merchant who sells so few articles during the year and makes such large profits as the local jeweler. Step into his store at almost any time and you will find him gossiping with a neighbor merchant, reading the newspaper or both he and his clerks are cleaning up and polishing some of the old shop-worn goods that have been in the house for years, trying to make them look like new.

A large per cent of his sales are made **on time,** by reason of which he naturally loses a great deal, as every credit business does by selling on time, and in order to carry as large a stock as possible he is compelled to buy on time, and is almost always in debt to some wholesale house which places him in such a position that he cannot take advantage of a bargain if the market was flooded with them. Neither is his output for goods such as would put him in a position to buy in any quantity.

In addition to the losses which the retail dealer is compelled to stand by reason of bad debts, the wholesale houses who sell him have a great deal of the same experience, for every time a merchant fails from one to several wholesale houses lose a considerable amount, and in addition to these losses the wholesale houses have expensive traveling salesmen's salaries and expenses to pay (and many traveling salesmen's salaries and expenses amount to from $5,000.00 to $10,000.00 per year).

As the manufacturer sells to the wholesaler on time, and often wholesale houses fail, he too is subject to loss from that direction. The goods in each case must be sold sufficiently high to meet these losses, as there is a certain number of failures calculated on every year, and this is a strong reason why cash customers can always buy much cheaper than those who buy on time.

His store, in order that he may be successful, must be located on the best part of the best street in the town where the rent is very high; his fuel and lighting expenses are very large, besides clerk hire, care of the store, interest on the investment, profits, his own living (and he usually lives well), all of which must be included. Take into consideration all these expenses, then consider the small number of sales he makes during the year, and you can understand how he must have from 33⅓ to 100 per cent gross profit on every article he sells. If it is not fraud to sell goods for twice what they are worth, it is certainly the next thing to it.

The proprietor of such a store in small places usually **poses as a watchmaker,** when the fact probably is he has learned his trade by a service of six months to one year in a jewelry store, running errands and repairing jewelry and clocks. Where the trade is thoroughly learned it is customary to spend one year on jewelry and clocks, and then from two to three years on watches, and even then the person must have natural mechanical ability, and the circumstances must be most favorable in the way of having plenty of watch repair work to do. As only about one watch out of ten needs anything more than a thorough cleaning there is no opportunity for learning the watchmaker's trade in the average retail store short of ten years. Oftentimes you find some one with no previous experience at all collects some tools and starts to work. Do not be deceived even though he may have succeeded in starting someone's watch on which some watchmaker has worked; the chances are that he may not know himself how he did it.

The watchmaker's trade cannot be learned in that way. For example, there is a firm in London who will not employ a man as an apprentice until he has had three years of previous experience, and then they require an apprenticeship of five years additional. People who claim to have worked in watch factories, nine times out of ten are not practical workmen, because they know how to make but one part, and that is made by machinery. The kind of watchmakers above referred to usually **ruin every watch they undertake to repair.** We have had expensive high-grade movements returned to us a few months after they were purchased which had been in the hands of such a workman, and we found that the temper had been drawn from the pinions, the leaves of which were full of rust from contact with acids or careless cleaning, the wheels blackened and the temper drawn from the brass, and in fact, the movement in an utterly worthless condition. **Is this not fraud?**

The retailers are constantly **writing to the trade journals** urging upon them the necessity of taking some concerted and combined action in order to prevent the manufacturers from selling goods to us, claiming that it is ruining their business, and that when we are constantly sending advertising matter into their locality, offering goods at the prices they have to pay, and often less, that their trade is being killed. The American Watch Jobbers' Association has even gone so far on several occasions as to order special meetings, and send out orders to the different manufacturers not to sell us. Can you wonder that the dealer is compelled to misrepresent his goods in order to sell them under such circumstances.

In the matter of **taking your watch in exchange** the dealer usually turns a clever trick. He will offer you more for your old watch than it is worth, and you would naturally suppose that he would sell the watch to some one else for the same money, or even more than he allowed you for it. It is a very easy matter for him to allow you a good price for the old watch, for the profit that he has added to the new one is usually so large that after the exchange is made he owns your watch and a good cash profit on the transaction besides. If you are a clever trader you can catch him on this scheme. Ask him what he will allow in cash for your old watch, and if you insist you will find that he is not willing to allow you any more than the metal in the cases is worth, providing you give him no encouragement that you will purchase from him. It is a very exceptional occasion that the old watch taken in exchange is sold again for anything but old metal, and the movement is usually put in the scraps, for which it is of little value. Old gold is worth 56c. per pennyweight for 14 karat, and 40c. per pennyweight for 10 karat. Old silver is worth 56c. per ounce. These are the highest market values, and no one will pay you any more for it unless he is sure of making a sale to you in order to make it back.

NOW FOR OUR SIDE:

Our method of getting trade is to give the best goods at lower prices than they can be had elsewhere, and from one-third to one-half less than retail prices. We waste no time waiting for a customer to make a selection, for they do that at home by their own fireside, and when the order comes in the selections are all made, and all that is required for us to do is to take the goods from our stock, see that they are in good condition, make the necessary record, and ship them. Our clerks are as busy as bees from morning till night filling orders in this manner, and the work is so divided as to accomplish the best results. Our goods are not scattered about over valuable space for show, but are kept in regular wholesale style, requiring but little storage room to accommodate immense stocks of goods. Our sales are so large that our stocks are constantly changing from day to day, and even though our 110x170 feet, six stories and basement building is crowded with stock, on an average our entire stock changes often during the year. We buy for cash direct from the manufacturer, and sell for cash; hence, our customers pay for nobody's bad debts. We give the customer the advantage of being able to select from a line which represents everything made that is worthy of notice. Our sales are so large that there are no bankrupt stocks or forced sales that we are not in a position to take advantage of. With nearly 1,000 shipments daily going out from our jewelry department alone, we think you can understand that it takes but a small percentage of profit on each order to satisfy us.

As to monopolies and trusts we do not propose to be dictated to by them. We consider it wrong to uphold any action that will cause the consumer to pay more for his goods than they are worth. **Our course is honorable,** and we propose to pursue it to a finish. So long as we are equipped with cash we will have no trouble in buying all the goods we want, and our customers will get them at a very small percentage in advance of what we pay for them.

We will buy any old gold or silver that you may wish to dispose of, and will pay you the highest market price either in cash or trade. As to our mechanical department, would say that we have a large force of watchmakers who are every one skilled workmen, and each one is the possessor of a fine set of modern watchmaker's tools. Any work done by any of our workmen is done in such a perfect manner that as a rule even a mechanic cannot detect that the watch has ever been broken, and that is the only way repair work should be done on watches.

We do not cater for repair work, but when our customers want their watches cleaned or repaired we are always glad to accommodate them and do the work in the most thorough manner, and at the lowest wholesale prices, which cover only the cost of material and labor.

We have given you facts, and we feel sure that with what we have laid before you you will be in a position to pass a just decision for yourself. Yours for honorable dealing and strict business principles,

SEARS, ROEBUCK & CO. (Incorporated), CHEAPEST SUPPLY HOUSE ON EARTH

DESCRIPTION OF THE MOVEMENTS WE LIST.

To save space by avoiding repetition we have adopted the following as the best method of describing movements, because we are able to give a more complete and intelligent description than if inserted in a condensed form on each page.
On the following page will be found an explanation of the different terms used.

WE GUARANTEE FOR FIVE YEARS, ALL THE MOVEMENTS SOLD BY US.

This does not refer to the life of the movement, but that we will for five years from date of purchase, correct free of charge any fault which may occur from defective material or workmanship. Any well made movement will run a life-time if properly cared for.

DESCRIPTION OF 18 SIZE MOVEMENTS.

THE "TRENTON" Movement is made at Trenton, New Jersey, and will be furnished in full plate or ¾ plate, seven jeweled, nickel damaskeened, has compensation balance and patent pinion.

THE SETH THOMAS Movements are three-quarter plate, nickel damaskeened, and are quoted in the 7 jeweled grade only. They have safety pinion, compensation balance and are a good reliable movement. They are made by the old reliable Seth Thomas Clock Co., whose reputation for fine clocks is a sufficient guarantee for the quality of the watch movements they make.

THE SEVEN JEWELED Waltham, Elgin and Hampden Movements have compensation balance, patent pinions, and are finished in gilt only.

ELEVEN JEWELED Elgin and Waltham movements have recently been discontinued by the factories, hence we will be unable to furnish them hereafter. The Hampden Movement is still made in the eleven jeweled grade and can be furnished in nickel only. They have patent pinion, compensation balance, and are damaskeened. The train jewels in this grade are set in the plate instead of settings.

FIFTEEN JEWELED Elgin, Waltham and Hampden Movements have compensation balance, patent pinions, patent regulators, and plate jewels in settings. The Waltham and Elgin will be furnished in both gilt and nickel, but list only the nickel grade.

THE G. M. WHEELER Elgin Movement is now made with 17 jewels. Until this year it was made only with fifteen jewels. It has safety pinion, train jewels in settings; compensation balance, adjusted, patent Breguet hair spring, patent micrometer regulator and is furnished in either gilt finish or nickel damaskeened. Is stamped on the plate "17 jewels adj."

THE P. S. BARTLETT Waltham Movement is now made with 17 jewels; until this year made with fifteen jewels only. The train or plate jewels are in composition settings. It has compensation balance, adjusted patent pinion, patent regulator, and patent Breguet hair spring, hardened and tempered in form, double sunk dial, bright flat screws, and will be furnished in either gilt finish or nickel damaskeened.

THE APPLETON, TRACY & CO. Movement is a well known grade of the Waltham which is now made with 17 ruby jewels in gold settings, compensation balance, adjusted to temperature, isochronism and position, with patent regulator, patent Breguet hair spring, hardened and tempered in form, patent pinion and double sunk dial. It is furnished in either gilt finish, or solid nickel beautifully damaskeened.

THE B. W. RAYMOND Movement is a grade of the Elgin Watch Co.'s now made with 17 ruby jewels, in fine composition settings. It has compensation balance, adjusted, safety pinion, patent micrometer regulator, patent Breguet hair spring, double sunk dial and is furnished in gilt finish or solid nickel, beautifully damaskeened.

THE ANCHOR grade of the Hampden Watch Co., is made with 17 extra fine ruby jewels in solid gold settings, patent micrometer regulator, patent center pinion double sunk dial, compensation balance accurately adjusted, Breguet hair spring, Crescent hands and the Hampden back action main spring. This movement is furnished in solid nickel, beautifully damaskeened.

THE NEW RAILWAY HAMPDEN Movement has 17 extra fine ruby jewels in solid gold settings, 14 karat gold patent regulator, compensation balance accurately adjusted to temperature, isochronism and five positions, has Breguet hair spring, patent center pinion, double sunk dial, gilt screws, is solid nickel elegantly engraved and damaskeened, Fleur de Lis hands and the Hampden back action main spring.

THE NO. 150 ELGIN is made with 21 fine ruby jewels, compensation balance adjusted to temperature, isochronism and position, escapement cap jeweled, gold settings, patent regulator, Breguet hair spring, safety pinion, glass enameled double sunk dial, solid nickel with gilt letters and ornaments. The above is the latest production of the Elgin Watch Factory in 18 size movements, and has been on the market but about a year. It is a movement built especially to meet the demands of railroad men and others who require a very close time-keeper.

THE "VANGUARD" WALTHAM Movement is made with 21 extra fine ruby jewels in raised gold settings, double roller on balance staff, exposed pallets, embossed gold patent micrometer regulator, compensation balance adjusted to temperature, isochronism and position, patent safety barrel, exposed winding wheels, patent Breguet hair spring, hardened and tempered in form, elaborately finished nickel plates with gold letters, plate and jewel screws gilded, steel parts chamfered, double sunk dial. The balance wheel of this movement sets in a recess in the plate so as to make a thinner and better proportioned movement as well as adding very much to the appearance. This is the finest 18 size movement made by the Waltham Watch Company, and is intended to meet the requirements of those who want a very accurate timepiece.

NON-MAGNETIC WALTHAM Movements will be furnished in 18 size only at the following additional prices: For the 7 jeweled grade, non-magnetic, add $2.50 to the regular price. For the Crescent Street add $5.00. For the Vanguard add $5.00. A special grade 15 jeweled nickel, adjusted to temperature, isochronism and position, will be furnished for $7.00 more than the Bartlett.

THE HAMPDEN SPECIAL RAILWAY Movement is nickel, has 17 extra fine ruby jewels in solid gold settings, jeweled center, magnificently damaskeened and finished; bevel head screws, 14 karat gold; patent regulator, perfectly compensated and accurately timed to all positions and isochronism; double sunk glass, enameled dial, with red marginal minute figures; patent Breguet hair spring, steel work highly polished; patent center pinion, elegantly engraved and damaskeened; fine escapement; fleur de lis hands, and the Hampden back action main spring. This is the finest 18 size movement made by the Hampden Watch Company, and is especially adapted to the requirements of railroad men and others who need a very fine timepiece.

THE WALTHAM 16 SIZE MOVEMENTS are all made in ¾ plate. We quote them in five grades as follows;

THE "NO. 20" WALTHAM has 7 jewels, compensation balance, with Breguet hair spring, hardened and tempered in form, exposed winding wheels, and is finished in gilt.

THE "NO. 28" WALTHAM has 15 jewels in settings, patent regulator, compensation balance, safety pinion, patent Breguet hair spring, hardened and tempered in form, exposed winding wheels, and is made in solid nickel.

THE "ROYAL" WALTHAM has 17 jewels in settings, center setting raised, exposed pallets, patent regulator, compensation balance, adjusted, patent Breguet hair spring, hardened and tempered in form, exposed winding wheels, and is solid nickel damaskeened.

THE "RIVERSIDE" WALTHAM has 17 ruby jewels in gold settings, exposed pallets, patent regulator, compensation balance, adjusted to temperature, and position, patent Breguet hair spring, hardened and tempered in form, safety pinion, exposed winding wheels, solid nickel plates, finished in gilt and damaskeened.

THE "AMERICAN WATCH CO." WALTHAM has 17 fine ruby jewels in gold settings, exposed pallets, patent regulator, compensation balance adjusted to temperature, isochronism and position, patent Breguet hair spring, hardened and tempered in form, safety pinion, exposed winding wheels and fine solid nickel damaskeened plates. The above is a very fine movement, designed to meet the requirements of those who want a very accurate time piece, such as railroad men, etc.

THE ELGIN 16 SIZE MOVEMENTS are now made only in the new (1895) models, which are very thin and are fitted in a much neater and more symmetrical case than the old model. They are all made with exposed winding wheels, which adds very much to their appearance. As none of these movements are named, we quote them under the manufacturers numbers, which do not appear on the movements, but are used by the manufacturers and dealers to indicate the grade.

THE "NO. 151" ELGIN is ¾ plate, has 7 jewels, Breguet hair spring, compensation balance, safety pinion and dust band, and is finished in gilt only.

THE "NO. 152" ELGIN is ¾ plate, has 15 jewels in settings, patent micrometer regulator, compensation balance, safety pinion, Breguet hair spring and dust band, and solid nickel damaskeened plates.

THE "NO. 154" ELGIN is ¾ plate, has compensation balance, adjusted to temperature, 17 jewels in settings, patent micrometer regulator, Breguet hair spring, moon hands, dust band, thoroughly well finished, and is made with solid nickel damaskeened plates.

THE "NO. 155" ELGIN is ¾ plate, has compensation balance, adjusted to temperature and position, 17 ruby jewels with gold settings, micrometer regulator, patent Breguet hair spring, double sunk dial, dust band, first quality moon hands, finely finished throughout and has solid nickel damaskeened plates.

DESCRIPTION OF SIX SIZE MOVEMENTS.

THE TRENTON and SETH THOMAS movements are ¾ plate, nickel damaskeened, and will be furnished in the 7 jeweled grade. They have patent pinion and compensation balance.

THE SEVEN JEWELED grade of Elgin, Waltham and Hampden has compensation balance, patent center pinion, and is furnished in gilt finish only.

THE FIFTEEN JEWELED grade of Elgin and Hampden, has compensation balance, patent center pinion, jewels in settings, and is solid nickel, damaskeened. This grade is not now made by the Waltham factory.

THE "NO. 168" ELGIN has 16 ruby jewels, raised settings, compensation balance, Breguet hair spring, fine oval finished patent micrometer regulator with gold index, safety pinion and solid nickel damaskeened plates.

THE "ROYAL" WALTHAM has 17 fine ruby jewels in raised settings, exposed pallets, patent regulator, dust band, compensation balance, adjusted, patent Berguet hair spring, hardened and tempered in form, patent center pinion, and is solid nickel, beautifully damaskeened.

THE "RIVERSIDE" WALTHAM has 17 fine ruby jewels, raised gold settings, exposed pallets, patent center pinion, patent regulator, compensation balance, adjusted, patent Breguet hair spring, hardened and tempered in form, and is solid nickel, beautifully damaskeened.

THE HAMPDEN 17 jewcled grade is solid nickel and has 17 fine ruby jewels, raised gold settings, patent center pinion, highly polished center and escape wheels, is beautifully damaskeened in gilt and nickel, Hampden back action mainspring, finest grade hair spring, gilt bevel screws, fine gilt hands, adjusted to five positions and very accurately timed.

THE DESCRIPTION OF O SIZE MOVEMENTS is the same as for six size. The Hampden and Trenton are not made in 0 size.

CAUTION:—During the past year several grades of movements that formerly were made with 15 jewels are now made with 17 jewels, and in most cases the prices have remained the same or been reduced. Retail stocks are made up of the old 15 jewel movements and we warn intending purchasers against paying more money for an old style movement than we ask for clean fresh goods with all the latest improvements.

We can furnish any movement or case made. Our catalogue is very complete, but if you do not find what you want, write us.

Explanation of the Terms Used in the Description of Watch Movements.

To assist our customers in making an intelligent selection of a movement best suited to their requirements, and that they may know exactly what they are buying, we give below an explanation of the terms used on the opposite page.

Remember That the "numbers" which are always engraved on watch movement have nothing to do with our catalogue number, or the manufacturer's number, which indicates the grade. Every movement is numbered consecutively, and you will find no two movements made by the same factory that have the same number.

Jewels Are not used to add to the intrinsic value of a movement, as is supposed by many, but for the purpose of equalizing and reducing friction, which will reduce the variation, and cause the pivots and bearings to wear much longer, and thus retain the good qualities of the movement for an indefinite length of time. They are made of garnet or ruby. The ruby, being harder and more expensive, is used only in the higher grade movements. A great deal depends on the quality and perfect finish of the jewels.

In movements of lower grade than fifteen jewels, the jewels are used in places where there is the most friction.

With the seven-jeweled grade, the pivots of the balance wheel each run in a jewel and, in addition to this, is used what is called "cap" jewels, which serves as a bearings for the ends of the balance pivots, which are made with conical instead of square shoulders, and the ends of the pivots rest on the cap jewels, instead of the shoulders resting on the hole jewels. By this method the friction can be equalized, and the watch will keep the same rate, whether on its edge, face or back. Two jewels are used in the pallet, which operates on the 'scape wheel, and one, called the "roller" jewel, is set in the roller table, which is under the balance wheel on the balance staff.

In the eleven-jeweled grade, seven are used in the escapement as above indicated, and in addition to this the four top pivots, viz.: The third wheel, the fourth wheel, the 'scape wheel and pallet are jeweled.

In the fifteen-jeweled grade, seven jewels are used in the escapement and eight plate jewels are used, four of which are set the same as in the eleven-jeweled movement, and the other four on the opposite pivots in the lower plate.

In the seventeen-jeweled grades, the jewels are distributed as in the fifteen, with the addition of one for each pivot of the center wheel.

In the twenty-one-jeweled grades, the jewels are distributed as in the seven-jeweled grade, with the addition of two cap jewels each for the pallet and 'scape wheel.

The Compensation Balance Is made of a combination of hammer hardened brass and steel, in such proportions as to compensate for the variations in temperature. The brass is used on the outside and steel on the inside. The brass being softer than steel is more sensitive to changes of temperature, and as the rim of the balance wheel is cut in two places, and the balance wheel has but two arms, it leaves each half of the rim attached at one end and leaves the other ends of the rim free to be influenced by the expansion or contraction of the brass on the outside of the rim. A small balance wheel used with the same hair spring would run much faster than a large balance wheel. At a high temperature the entire balance wheel would naturally expand in bulk and consequently run slower. But, with the compensation balance, while the entire bulk of the balance wheel expands, the expansion of the brass on the outside of the rim is greater than the steel on the inside, consequently it throws the loose end of the rim of the balance wheel in toward the center of the wheel, thus making the circumference enough smaller to compensate for the increased volume.

By the results of experience it is possible to make these wheels by machinery, so nearly correct, that the rate is sufficiently close for all ordinary purposes. For closer rate the balance wheel must be adjusted to temperature.

Adjustment. There are three kinds of adjustment which affect the rate of a watch. These are used in the finer timepieces, such as those for railroad men, sailors and others, who require a timepiece which can be depended on for a very close rate. The adjustment of a movement requires the most skill at the hands of a workman of any of the departments of watchmaking. Adjustments are perfected only by experiment and a great deal of careful hand labor on each individual movement. The first adjustment is that of heat and cold. Every compensation balance is provided with screws in the rim of the balance wheel, by the use of which the adjustment to heat and cold may be changed by the workman. The movement is tested in an ice box and in an oven, and if it does not keep the same rate in both extremes of temperature, as well as the average temperature, the screws in the balance wheel are shifted to or from the loose end of the balance rim, so as to bring about the desired results.

The second adjustment is that of position. The watch must keep the same rate when lying on its face, on its back, or on the edge with pendant up, pendant down, three up and nine up. This adjustment is accomplished by having the jewels in which the balance pivots rest, of the proper thickness in proportion to the diameter of the pivot, and at the same time it must equal the surface on the end of the pivot, which rests on the "cap" jewel; also the balance wheel, as well as pallet and 'scape wheel must be perfectly poised. A wheel is perfectly poised when the pivots can be supported on two flat surfaces, perfectly smooth and polished, and the wheel placed in any position, when it will remain exactly as it is placed. If it is not perfectly poised, the heaviest part of the wheel will always turn to the point immediately under the lines of support.

The third adjustment is that of isochronism. This is the result of careful calculation and experiments in the way of selecting a hair spring of the exact proportions as to length, strength, etc., which will cause the balance wheel to give the same length of arc of rotation, when the main spring is wound full up, as it does when nearly run down. The natural tendency is for the watch to run slower when nearly run down than it does when wound full up. This is why your watchmaker will sometimes tell you to always wind your watch at the same time every day. This adjustment overcomes that serious difficulty. While the variations from that cause is not sufficient to be of any consequence in a watch for ordinary use, it is very important with very fine timepieces.

The Patent Regulator Is a device which is used on all gents' watches of high grade, for the purpose of assisting in the finer manipulation of the regulator. It is so arranged that the regulator can be moved the shortest possible distance, without fear of moving it too far. They always have a fine graduated index attached, which makes it possible to see just how much the regulator has been moved.

The Hair Spring In general use on the ordinary and medium grade watches is known as the flat hair spring. A great deal depends on the form and temper of any style hair spring, in order that it may retain its elasticity and give the best results. The Breguet hair spring is an improvement over the flat hair spring and is used on high grade watches. The inside coil of any hair spring is attached to what is called a "collet" on the balance staff, and the end of the outside coil of the hair spring is attached to a stud, which is held firmly by a screw in the balance wheel bridge. Two small pins, with the end of each fastened to a projection in the regulator, clasp the outer end of the hair spring a short distance from where it is fastened in the stud. If the regulator is moved toward "S," these pins, called guard pins, are moved toward the stud, which lengthens the hair spring and allows the balance wheel to make a longer arc of rotation, which causes the watch to run slower, because it requires a longer time for the wheel to perform the longer arcs. When the regulator is moved toward "F," these pins are moved from the stud, which shortens the hair spring and makes shorter the arcs of the balance wheel, thus causing the movement to run fast. It sometimes happens that the next coil to the outside one, from a heavy jar, will catch between these guard pins, which will shorten the length of the hair spring just one round, causing a gaining rate of about one hour per day. When such does occur, the hair spring can be easily released, and it will resume its former rate. Under such conditions your local jeweler is very apt to tell you that the watch needs a new hair spring, which is not true.

The Breguet Hair Spring Is a recent improvement, which accomplishes two objects. It prevents the liability of the hair spring catching on the guard pins, and at the same time there is no lateral or side motion given to the balance wheel, as the expansion is equal all around, owing to the fact that the outside coil of the spring is bent up and turned around, so as to pass near the center and across to the opposite side and is attached to the stud above the level of the body of the spring.

The Patent or Safety Pinion Is now used in most of the American watches, and was invented for the purpose of protecting the train from reaction, caused by breakage of the main spring, which is liable to happen in any grade of watch at any time, without apparent cause; sometimes from over-winding. It is the pinion of the center staff with which the barrel (the hollow wheel which contains the main spring) engages.

In case the mainspring breaks, the recoil and backward action given to the main wheel disengages the pinion from the center staff and allows it to turn freely on the staff.

When solid pinions are used, balance staffs, jewels, teeth of wheels and other serious damage has resulted from the breaking of the main spring. The patent pinion prevents all such accidents.

Full Plate Movements are those on which usually the **balance wheel** only is exposed to view; with some the flat steel winding wheeler are also on top of the upper plate.

Three-Quarter Plate Movements are those which have a portion of the upper plate cut away, so as to expose a portion of the train wheels, pallet, etc. Three-quarter plate is used mostly on 16, 6 and 0 size movements. The Seth Thomas movements quoted by us are made in three-quarter plate.

Non-Magnetic Movements Have the balance wheel, hair spring, roller table and pallet made of non-magnetic metal, which is a composition of iridium, paladium and other metals. (Both of the above named metals are four times as valuable as gold). The balance wheel and escapement (except in the non-magnetic watches) is made largely of hardened steel. If hardened steel comes in contact with a strong electric current, it is liable to become magnetized, a portion of which will be retained, and will be very detrimental to the time-keeping qualities of the watch. The non-magnetic metal will not in any way be influenced or attracted by electricity or magnetism. It is a comparatively recent discovery, and is especially valuable to those who work about electric cars, electric light plants, etc.

In non-magnetic movements we list only those made by the Waltham Watch Company; the Elgin Watch Company do not make them.

We Guarantee for Five Years All the movements sold by us. This does not refer to the life of the movement, but that we will for five years from date of purchase, correct free of charge any fault which may occur from defective material or workmanship. Any well made movement will run a lifetime if properly cared for.

Remember That your watch should not run longer than one and one-half years without having the old oil cleaned off and fresh oil applied. This must be done at the expense of the purchaser.

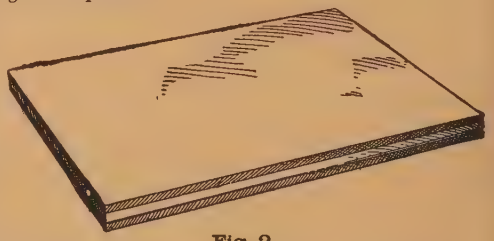
The balance wheel of all modern watches makes 18,000 beats or revolutions per hour; 432,000 per day, or 157,788,000 per year. An engine or sewing machine will be oiled several times per day, but we have known people to carry a watch for ten years without having it cleaned or fresh oil applied.

Usually, a movement thus treated is of no value, being entirely worn out. Take good care of your watch if you wish it to perform its duty properly, for it is a very delicate machine. Our charge for cleaning and oiling is 75 cents. The regular retail price is $1.50.

We can furnish any movement or case made. If you do not find in our catalogue what you want, write us.

HOW GOLD FILLED CASES ARE MADE.

AS GOLD FILLED CASES have become so popular in the past thirty years, and there is so little known by the general public of the relative proportions of the different materials that enter into their construction and the methods employed in making them, we feel that it will be interesting to our customers and their friends to know more about such an important industry. With every line that we handle and list in our catalogue, we make ourselves thoroughly familiar as to the manner in which the goods are made, and the quality and proportion of each kind of material which enters into their construction. It is very necessary for us to do this in order to protect the interests of our customers, for their interests are our own. We employ men in each department who are thoroughly familiar with the construction of the goods they handle, know where to look for weak and strong points, and are thoroughly competent to judge and to protect the interests of both our customers and ourselves from being imposed upon by fraudulent concerns whose only object is to make up cheap, showy goods and market them to the unsuspecting public in competition with goods of real merit, which, if bought right, can be owned for the same or even less than the shoddy goods. We can say without fear of contradiction that the average merchant does not employ competent people and even himself is not a practical man. Let us repeat that we leave nothing undone to thoroughly understand and know the merits of everything we sell.



There are at the present time eleven watch case factories in the United States, with a daily average of about 4,500 filled cases, or 1,498,500 per year. Most of the watch case factories in operation at the present time are reputable makers who have been established a great many years, and have proven by the experience of over a quarter of a century that gold filled cases, when properly made, are not only theoretically, but practically, a success, and have given their owners entire satisfaction. We might say that it has been our good fortune and pleasure to have had the privilege of examining a great many gold filled watch cases which have been in constant use from 20 to 30 years, and, without exception, we found all of those which were made by reputable concerns to be in good condition, and to all appearances equal to a solid gold case. (Of course, the joints were somewhat loose from wear, which is a natural consequence with any watch case.) Even though the first filled cases were satisfactory as to wear and appearance, improved machinery and years of experience have made it possible to turn out cases at a very low price, which for style and appearance are far superior to a solid gold case and for wear are all that could be wished for. The following article, together with accompanying illustrations, will give the reader a good general idea of how gold filled cases are made.

The first operation is to prepare a sheet of material which is composed of two plates of gold with a plate of hard composition metal between. Instead of rolling all three plates out to the required thickness before soldering them together, which would be a very difficult operation and attended with unsatisfactory results, such as uneven thickness of the plates, not being soldered well together, etc., the material is made ready, as shown in Figure 1, by taking one piece of gold about 4 inches long by 2 inches wide, and another of the same width and length but thinner for the inside of the case, as there is no wear on the inside. Now, a hard piece of composition metal of the same width and length is placed between the two pieces of gold, and after placing a few bits of hard gold solder between the plates the three are put into a furnace kept at a very high heat by a charcoal fire and a hot air blast. The solder soon melts, and all three of the original pieces of metal are in one solid piece as seen in Figure 1.

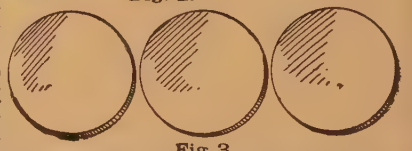


Fig. 1.

This piece is passed between adjustable hard steel rollers, which are brought closer together by a set screw after each time the plate has been passed through until it is reduced to a thin sheet a little less than 1-16 of an inch in thickness. Figure 2 represents a plate after having been passed through several times. By this method all three of the original sheets are reduced proportionately equal so that neither the gold nor the composition metal will be thicker in one place than another.

Fig. 2.

The next operation is to cut the plate into strips of such width as to accommodate the different parts of the case, which are to be stamped out by large automatic rotary presses. The back, front and cap of the cases are stamped out in a circular plate as shown in Fig. 3, and the piece of the strip that is left is represented by Fig. 4. Cuts are about one-third size.

Fig. 3.

By a single operation these round plates are forced into a steel die in a large rotary press which turns up the edges all round so as to give it a bowl shaped appearance, as shown in Fig. 5. In another operation the edges are turned down as shown in Fig. 6, which is called the snap.

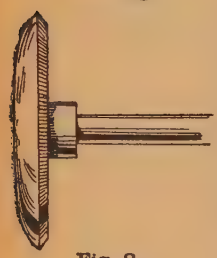

Fig. 4.

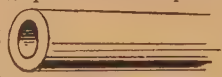

Fig. 5.

Fig. 6.

Fig. 7.

The next step is to place the piece thus shaped into a sectional hard steel concave die. On the inside is operated with very heavy pressure a small hard steel polished roller (see Fig. 8) which forces the metal into the die in all parts, which shapes the piece to conform to the style of case which is being made. If the case is to have corrugated edges, or Star vermicilli work, or heavy engraving, it is formed in this die. This operation also shapes the inside edges of the piece so as to form the snap as seen in Fig. 7.

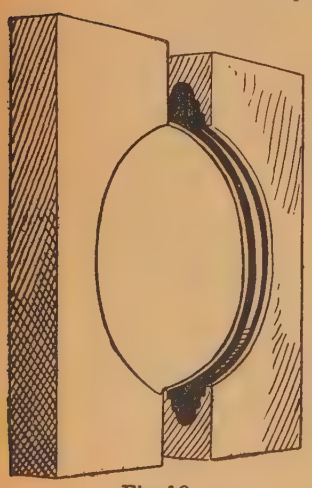
Fig. 8.

This Cut Shows a Section of Joint Wire Enlarged.

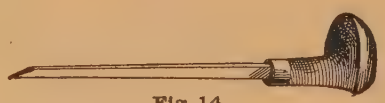
The piece thus shaped is put on the head of a lathe and the inside edge turned out a little with a sharp tool to make it snap and fit perfectly on the center of the case. After this is done a rotary cutter propelled at a high speed is run across one edge to cut the seat for the joint (hinge). Two pieces of gold joint wire about ⅜ of an inch in length (joint wire is made in sticks about 4 inches in length with a small hole running the entire length, and is cut into pieces of the required length with a saw), is placed in the seat cut by the tool and bound in place with fine wire. Some bits of fine hard gold solder are then laid over the crevice and the pieces are held in a gas jet which is stimulated by an air blast. The solder is melted and secures the joints, after which the binding wire is taken off. A piece of solid gold is soldered on in the same way on the edge of the back of case to form the thumb piece.

The center of the case is made by taking a strip of stock (prepared in the same way as described in the first part of this article) about ¾ of an inch wide by about 7 inches long (see Fig. 9), which is bent in a circle and the ends soldered so as to form a band or ring a little over two inches in diameter. This piece is placed in a sectional die (see Fig. 10), which is held securely in a very heavy frame. A small hard polished roller is rolled on the inside of the ring with very heavy pressure until the metal comes in contact with every part of the die. The inside of the die is made in the exact shape of the outside of center of case so that when the metal has been well pressed in, it is shaped complete as seen in Fig. 12. The rough edges on the inside are now turned out (on the lathe) to the standard size to fit the movement.

Fig. 9.



The seats for the joints are milled out and joints soldered on as described above, except that one piece of joint wire instead of two are put on. The pendant (see Fig. 13) is made by forcing a small piece of stock into a die. A small concave seat is cut in the center (Fig. 12) to receive it, and it is bound in place and soldered on with gold solder.



The pendant bow (usually called the ring) is made of solid gold. The bezel (crystal ring) is made in much the same way as the center. All the joints (hinges) are now filed and broached so as to fit perfectly, the case springs are secured in their places and the different parts of the case are fitted together.

The next operation is to engrave the case, which is done by hand with a small tool about five inches in length (see Fig. 14), which is held as seen in Fig. 15. Engraving is very fine work and requires years of practice as well as natural ability to master the art. After the engraving is done the case is polished inside and out on cotton buff wheels from one to five inches in diameter, which run at the rate of about 3,000 revolutions per minute and are saturated with alcohol and red rouge (very fine powdered oxide of iron). The case is now washed carefully, put in a soft cotton bag and is ready for the market.

See description under Nos. 4018 to 4023, which explains how electro gold plated cases are made.

GRADES OF GOLD. For the benefit for those of our customers who are not familiar with what is meant by 10, 14 or 18 karat gold, we make the following explanation: 24 is taken as a basis. For 14 karat gold, fourteen twenty-fourths of the composition is pure gold and ten twenty-fourths is alloy. For 10 karat, ten twenty-fourths is pure gold while fourteen twenty-fourths is alloy.

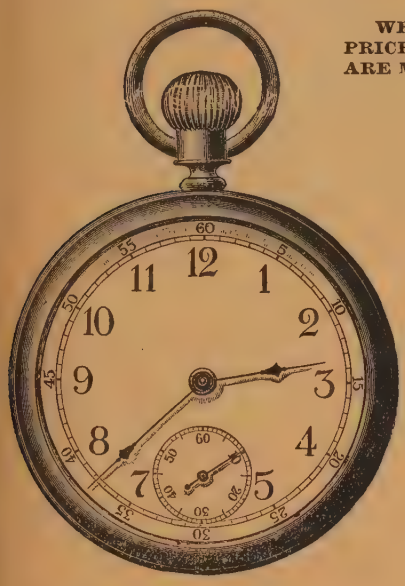
RAISED COLORED GOLD ORNAMENTATION is mentioned in different parts of our Watch and Jewelry department. Gold can be made in many different colors by using different kinds of metal for alloy. Pure Gold is Bright Yellow; Gold of a Reddish color is made by using Copper for alloy; very Light Colored Gold is made by using Silver for alloy; Green Gold is made with light alloys and colored by a chemical treatment. A white metal is also used in raised colored decorations which is Platinum, and when pure it will not tarnish or corrode.

WATCHES ALMOST GIVEN AWAY.



Don't go without a watch and continue to ask your neighbor the time of day when you can have one of your own for a little money. The Boys, the Girls, the Rich and the Poor can all carry watches at the prices we ask. By our one-small-profit plan, from manufacturer to consumer, you can own a watch at a very few cents advance on cost to manufacture, and by the use of improved and automatic machinery, watches can now be made and sold for **$2.00** or **$3.00** which are a credit to those sold fifty years ago for **$25.00** to **$40.00.**

Those illustrated and quoted on this page are all complete in every detail, and are warranted to be as represented. **Our terms are most liberal.** We want you to see for yourself. **Any of these watches will be sent to any address C. O. D.,** by express, subject to examination, on receipt of **50 cents,** in stamps or cash, as a guarantee of good faith. **The watch can be examined** thoroughly at the express office, and if not found to be as represented, or even more, you can refuse to accept it and we will refund the amount you have deposited.

We advise you to send cash in full with your orders and save the 3 per cent. cash discount. **It is perfectly safe,** and, if you are not in every way satisfied with the watch when it arrives, you can return it and your money will be refunded. **Most of our customers send cash in full.** It saves return charges on the collection, and the goods go by registered mail if 14 cents extra is sent to pay postage.

WE LEAD ON LOW PRICES. OUR TERMS ARE MOST LIBERAL.

Our competitors, the manufacturers, and our customers all wonder how it is possible to build up such an enormous trade **in every corner of the United States** as well as nearly all foreign countries. It is very easy to explain. Our customers are always so well satisfied with their purchases, by reason of our sending them the **best** goods on the market for from one-third to one-half less than they can be purchased at home, that one sale makes another, and one customer makes another customer. **We try** to treat our customers as we would like to be treated were we in their places. This is the only way. Send us a **trial order** and be convinced.

OUR MOTTO: Good goods far below all competition. Make one article sell another and treat our customers as we would like to be treated were we in their places.

MOST OF OUR CUSTOMERS send cash in full with their orders and save the discount and return charges on the collection. YOU RUN NO RISK. We will refund all your money if you are not satisfied with your purchase.

Any of the above will be sent C. O. D. on receipt of 50 cents (cash or stamps) with order as a guarantee of good faith on your part. The 50 cents will be refunded if goods are not satisfactory.

THE CELEBRATED DUEBER SILVERINE WATCHES.

Down! Down!! Down!!! Down with prices, and every reduction that we succeed in getting from the manufacturers, with the assistance of cash, experience and a reputation as the largest buyers of watches in the world, our customers always get the benefit. You ask, why do we not keep on selling at the same high prices and make more money? We answer, we have built up a reputation as the **Cheapest Supply House on Earth**, and we must sustain it by continuing with the same methods as those which have built up our business. Even though we have the reputation for the best goods at the lowest prices, it would be very easy for us to lose it were we to adopt any other policy. We think we need offer no other argument than the fact that **we are selling** on an average of **over 5,000** of this one kind of watch per month to convince you that we are in a position to place them in your hands at a very small per cent above cost of manufacture.

The **John C. Dueber Silverine Cases** have a world-wide reputation, and are known to be the only genuine and reliable silverine case. It is solid through and through, weighs about 3½ ozs., is a very dense and tough metal, takes a beautiful polish, holds a color almost as white as coin silver, and is warranted not to tarnish. A certificate of guarantee, a fac simile of which we give below, accompanies each case.

Fahay's Screw Back and Bezel or Crescent Screw Bezel, dust proof cases if desired, 25 cents extra.

All American movements are now made in stem wind and stem set only.

Our Catalogue numbers have nothing to do with the consecutive numbers which are always engraved on both case and movement.

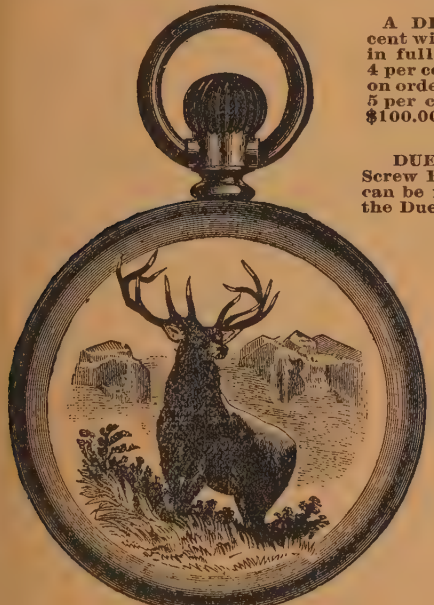
GOLD ONLAID DUEBER SILVERINE CASES.



Below we illustrate **two very pretty designs** of gold onlaid work on silverine cases. The **Stag** and **Locomotive**, as well as some other parts of the picture, on the back of the case, is in solid gold plate. The contrast between the gold and the silverine metal creates a very beautiful effect. The cases are the same as described above, with the exception of the gold inlaying, which is very heavy, and will wear an indefinite length of time.

All of the Dueber open face cases are **fitted with extra heavy beveled edge glasses**, and being made extra heavy and strong throughout, they make an excellent watch for anyone who is engaged in any kind of heavy work. Many people prefer a fine movement and a cheap case. This case fills all the requirements. We cannot recommend them too highly. For prices on the gold inlaid cases add 75c. to the prices listed above.

A DISCOUNT of 3 per cent will be given for cash in full with your order; 4 per cent will be allowed on orders over $50.00 and 5 per cent on orders over $100.00.

16 cents will carry a gents' watch to any point in the United States by registered mail; 25 cents to almost any point by express.

DUEBER CASES are not made with Screw Back and Bezel, but Fahy's Screw Back and Bezel, or the Crescent Screw Bezel DUST PROOF Cases can be furnished when desired for 25 cents more than prices quoted for the Dueber.

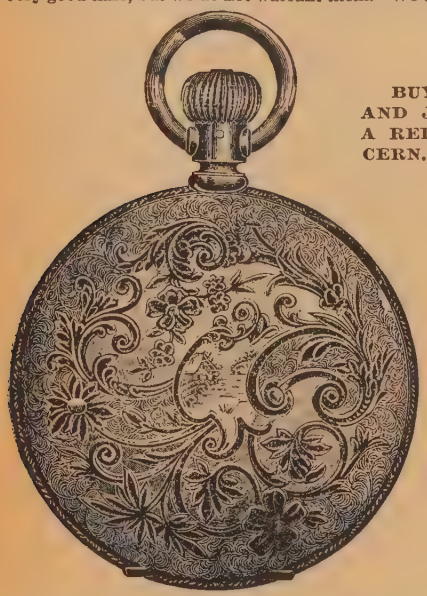
GOLD PLATED WATCHES.



Do not be deceived by this class of goods. We sell them for what they are. They are handled largely by Newspaper Advertising concerns as Premium Offers with newspapers; by Jewelry Auction Houses, Peddlers, and by unprincipled Retail Dealers, and sold under various descriptions, such as Gold Filled, Solid Gold Plated, Heavy Gold Plated on composition metal, etc. To make our line complete, and to satisfy the wants of those who wish to buy them, we must list them. But to protect our customers against fraudulent representation, and that they may know the difference between these and reliable goods, we have resorted to this method of caution.

In the introductory pages of this department we have given you a brief article on **"How Gold Filled Cases are Made."** That you may be able to understand the difference between Gold Plated and Gold Filled Cases we will explain **How Electro Gold Plated Cases are Made:** The material of which these cases are made is Sheet Brass. The different parts are stamped out and shaped in dies similar to those in which gold filled cases are made, with the exception that they are made with less care, and as the joints and different parts do not fit properly they do not even protect the movement thoroughly from the intrusion of dust and dirt. They are made largely by small boys and girls. After the case is finished and put together it is then hung on a wire hook and suspended in a gold plating solution, through which a current of electricity passes and causes a portion of the gold in the solution to adhere to the case. There are several methods of saturating the solution with gold. One is to dissolve chloride of gold (gold in very fine powdered form) in a solution of cyanide of potassium. Another is to hang in the battery a piece of solid gold, by which the action of the battery eats off a portion of the same, carries it over to the article being plated and deposits it thereon. The film of gold deposited is very thin, the thickness of which depends on the length of time it is allowed to remain in the battery and the strength of the electric current. In any event, however, but a very light plating can be put on by this method.

The plating on all cases offered on this page will wear from thirty to ninety days. It is not possible to put on a plating by the electro-plating process that can be depended upon to wear more than three years, and is much more expensive than filled work in proportion to the cost. To those wanting goods that will wear longer than those offered on this page we recommend the five-year filled cases. **The movements** in these cases are all cylinder escapement, imported, either key or stem wind. They will keep very good time, but we do not warrant them. We do, however, guarantee that they will reach the purchaser in good condition.

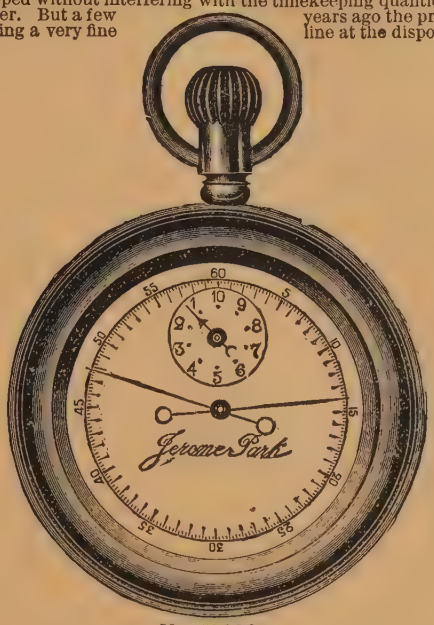
TIMERS AND CHRONOGRAPHS.



Do not entertain the idea that these watches are intended only for timing horses, etc. While they are indispensable for timing horses, bicycle races, foot races, etc., **there is no watch that is more interesting and useful as a regular pocket timepiece than a Chronograph.** Thousands of people carry them who have no desire to time race horses. There is no watch so handy and useful to a doctor for counting the pulse as a Chronograph. The sweep second hand which goes once around the dial every minute, and can be started, stopped at any point on the dial, or made to fly back to the figure 12 by simply pushing the crown, makes it an easy matter to count, and at the same time makes the watch very attractive and interesting. In addition to the sweep second hand they all have the regular small second hand. The sweep second hand can be allowed to run all the time or stopped without interfering with the timekeeping qualities of the watch. They are good timekeepers, are comparatively simple in construction, and not liable to get out of order. But a few years ago the prices on Chronograph Watches were such that but few people could afford to own one. Now we have succeeded in placing a very fine line at the disposal of our customers, at prices within the reach of everyone.

AMERICAN COIN SILVER WATCHES.

Do not be lured into paying your retail jeweler one-third to one-half more than our prices for a watch because he poses as a personal friend of yours. Business is business, and if you do not look after your own interests, we assure you that other people will not look after them for you. **Do not have so little confidence in your own judgment,** that you are afraid to buy of anyone but your local merchant. Any person of ordinary intelligence can, with a little inquiry and attention, post themselves sufficiently that there is no reason for being deceived. Keep in mind the old adage, **"a dollar saved is a dollar earned."** We propose to save you many dollars.

Our silver watches are made by the very best, oldest and largest manufacturers of silver watch cases in the world. They are all perfectly fitted, are dust proof, and **warranted solid coin silver.** In open face we can furnish you either jointed cases with gold joints, or screw bezel, patent crescent, dust-proof cases, as shown in the open engraving below. Both the jointed and screw open face cases listed below are fitted with **heavy, thick, flat, bevel-edge glasses,** and weigh 3 ounces. The hunting cases listed below have **gold joints** and weigh 3 ounces. Jointed or screw open face cases can be furnished in 4 ounce when desired for $1.10 additional on prices quoted below; hunting 4 ounce, $1.60 extra. Jointed open face in 5 ounce, $3.00 extra; hunting, $3.50 extra. Jointed open face in 6 ounce, $5.00 extra; hunting, $5.50 extra. Screw open face cases cannot be furnished heavier than 4 ounce.

FOR 50 CENTS you can see and examine watches at your express office. If not satisfactory we will return the deposit.

GOLD INLAID SOLID COIN SILVER CASES.

The contrast between the solid gold and the coin silver creates a **most beautiful effect.** The **Stag** and **Locomotive,** as well as a portion of the scenery on cases Nos. 4032 and 4033 are made of a plate of solid gold laid in a recess cut in the silver and soldered with fine silver solder. They are then finished and engraved by hand, and are fully warranted. They will be furnished only in open face at above prices. For prices on gold inlaid, open face, dust proof, screw bezel watches, add $1.10 to prices quoted in list above. Hunting gold inlaid cases can be furnished to order for $3.00 on prices listed above. Cash in full must accompany orders for hunting inlaid cases.

The best protection to a movement is a screw dust and damp proof case, with a tight case the oil will be preserved much longer.

A TWENTY-YEAR, GOLD-FILLED, SCREW BACK AND BEZEL, DUST-PROOF WATCH FOR $6.60.

Let competitors undertake to meet our prices. It will be of no use. They cannot do it. The reasons why they cannot do it are many. **Never before was a gold filled, screw back and bezel, dust-proof case offered at anywhere near such prices.** We have for several years consumed **the entire product of the factory** that makes this line of cases; **not one is sold to anyone else.** The manufacturers are under contract not to sell any of these cases to anyone else. The fact of the matter is, it keeps them busy to supply us. In making arrangements with them we figured the cost of material, the cost of making, etc., added only a reasonable percentage for manufacturers profit, and these figures established the prices we pay for the goods. We realize that this is a snap, and that if we desired we could just as well make more money, only for the fact that we **must sustain our reputation** as the **cheapest supply house on earth,** and on just such deals as this it affords us an excellent opportunity to sell far below any competitors. Of this one kind of watch **we sell several thousand per month,** all of which have given the most excellent satisfaction. These cases are made of **two plates of solid gold** over an inner plate of fine composition metal, and **are warranted** by special certificate **to wear** and retain their **color for twenty years.** We show in the accompanying illustration a fac simile of the guarantee. These cases are made in the best possible manner; the designs are the very latest, the material is heavy, but still they are made in the new thin model, and are beautifully engraved and finished in the most perfect manner. There is no case made which affords better protection to the movement from the intrusion of dust, dirt or dampness than this one. We invite you to most carefully investigate this watch. Look where you may and get prices on twenty-year gold filled, screw back and bezel and dust-proof watches. **Your own judgment** in the matter is all we ask. You will find that you will be compelled to pay from 50 per cent. to 100 per cent. more than the prices we ask. **You run no risk whatever,** for if you are not thoroughly satisfied upon receipt of the watch you can return it to us at our expense and we will refund all your money. We will be glad to send these watches on our regular terms C. O. D. by express, subject to examination, when desired. Watches can be sent to almost any point in the United States by express for 25 cents; by registered mail to any point, 14 cents. We allow for cash in full with order a discount of 3 per cent.; on amounts over $50.00, 4 per cent.; amounts over $100.00, 5 per cent. Most all our customers send cash with their orders.

Nothing like it ever advertised before. Something entirely new. Our stock is always fresh with new and up-to-date goods. We allow no shop-worn or old goods to accumulate on our hands. Step inside a retail store and you will find goods that have been in the house for ten years, if the store has been in existence that long. In our establishment you will seldom find a piece of goods that is six months old, and the majority of our stock changes every few weeks. No concern can carry a full line and always have fresh and new goods at the lowest prices except that they have an immense trade that will keep their stock moving all the time. Let us say here that **our trade is simply enormous.** You could have no idea unless you could call on us and see for yourself. When you come to the city you must not fail to **give us a call.** It will be the strongest argument we can present to convince you that we are in a position to do as we say.

These cases are made of solid 14 karat gold over fine composition metal; are beautifully finished, elaborately engraved, and are made and warranted by the celebrated **Bates & Bacon Watch Case Company** to wear and retain their color for fifteen years.

WE FIT THESE CASES WITH THE FOLLOWING 18 SIZE MOVEMENTS.

16 SIZE, 14 KARAT, GOLD FILLED.

Manufactured by the same concern as the 18 size cases listed above, and are the same quality. These cases are made in the **new thin model for Elgin or Waltham** 16 size movements. They can be furnished in a variety of the very latest and most desirable shapes.

We fit these cases with the following 16 size movements:

7 jeweled, Trenton or Standard, nickel.....$13 10
7 jeweled, Elgin or Waltham, gilt..... 14 15
Full 15 jeweled, Elgin or Waltham, nickel..... 16 75

Watches will be sent C. O. D. on receipt of 50 cents (cash or stamps), with order as a guarantee of good faith on your part. The 50 cents will be refunded if goods are not satisfactory.

SOMETHING NEW. Class On Both Sides.

You can see the movement in your watch at any time without opening the case. Nothing about a watch is more fascinating or interesting than to see the movement, with its different parts, such as train wheels, the pallet, hair spring and the balance wheel which makes 18,000 beats per hour, 432,000 per day or 157,788,000 per year. As the ordinary cases are constructed, you cannot see the movement except that you open the cases, which exposes the movement to dampness in the atmosphere and to the intrusion of dust and dirt.

With the case we offer here it is different. The body of the case is made of **solid silverine metal by the Dueber Watch Case Co.,** whose reputation for the manufacture of fine watch cases is too well known to need any further comment. **The metal very closely resembles solid silver** and is warranted to retain its color. They have a very heavy bevel edged crystal glass fitted on both sides.

Don't be afraid that they are not strong enough for we believe that if they were placed on the floor, they would support the weight of an ordinary man without breaking.

We have sold a large quantity of these watches which have, without one exception, given entire satisfaction. **We can furnish them only with Trenton, Seth Thomas or Hampden Movements. The Seth Thomas Movement** will be found to be the most satisfactory, as it has ¾ plate which exposes to view the most of the wheels. **The Seth Thomas** movements are very carefully made, are well finished and are good timekeepers. We guarantee all movements for 5 years. **You run no risk** in ordering one of these watches, for if you are not satisfied with it it can be returned (if not too much worn) and exchanged for anything you may select from our catalogue or money refunded as you desire. **Prices for complete watch as follows: With 7 jeweled Trenton nickel movement, $3.00; with 7 jeweled Seth Thomas nickel movement, $3.50; with 7 jeweled Hampden movement, $4.25.**

All of these movements are stem wind and stem set and are warranted for 5 years

A 20-Year, Hunting Case, Gold Filled, 18 Size Watch for $7.95

We are always at war with high prices. We care not for any kind of opposition. Dealers are constantly writing the trade journals to make some effort to stop us from ruining their business. They say they cannot sell goods when we are constantly sending advertising matter into their vicinity and offering watches and jewelry at **wholesale prices and less. Monopolies and Watch Trusts** have undertaken many times to stop us from getting certain lines of goods. This has been done in the interest of the retailer; but **still we go on pounding down prices. Our course is honorable** and we propose to pursue it to a finish. We consider **that it is wrong** to uphold any monopoly or trust that will cause the consumer to pay more for goods than they are worth. We believe in putting goods on the market at **a** very small per cent of advance on cost of manufacture; this we are doing. On this Watch, as well as our screw No. 4036, dust-proof cases and ladies' special 6 size cases, Nos. 4194 to 4199, we are controling the production of one of the largest factories in this country. To do this means to sell **several thousand of their cases every month.**

We have handled these goods for many years, and it is not only from a thorough knowledge of the quality and proportion of material that goes into their construction, but also from practical experience that we can speak of their merits. The cases are made of **two plates of fine solid gold,** over fine hard composition metal, are well finished, beautifully engraved in a variety of styles, as illustrated on this page, and are warranted by special certificate to wear and retain their color for twenty years. They are very beautiful watches, are thoroughly up to date, and one that any man can justly be proud of. In addition to the certificate on the inside of the case **a** large certificate of guarantee for both case and movement is furnished by us.

Any of these watches will be sent on our regular terms to any express office, subject to examination, provided 50 cents accompanies the order, as guarantee of good faith. Most of our customers send cash in full with their order and take advantage of the 3 per cent discount. If goods are to be sent by mail, send extra money for postage and registering, and state how much you enclose for that purpose.

DUEBER 16 SIZE, GOLD FILLED CASES AND HAMPDEN MOVEMENTS.

The Dueber Case and Hampden movements. Factories are three stories high and have a frontage of 1,400 feet.

No. 65110. 10 Karat.

We are the first and only concern to sell watches to the consumers at and below wholesale prices.

No. 65111. 10 Karat.

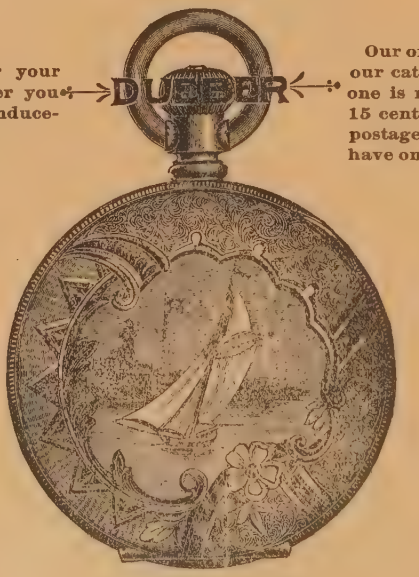
No. 65112. 10 Karat.

The **Dueber cases** and **Hampden movements** have a reputation for quality, finish and durability that is **excelled by none.** Both factories are among the **oldest** and their goods are known the world over. We list on this page 16 size cases and movements complete. This size is becoming more popular year by year as being the **most desirable gentleman's size,** where their work does not make it necessary for them to have a very heavy case. These cases, however, are made very strong and there is not much difference, so far as strength is concerned, between these and the 18 size.

These cases are **made of two plates of solid gold** over hard composition metal, and both the 10 and 14 karat **are warranted to wear for twenty years.** The Dueber Watch Case Company has a reputation for the **finest engravings,** and they finish all their cases in the most thorough manner. The **Hampden 16 size movements** are made to fit Dueber cases only, and cannot be furnished in any other. They have several special features in their mechanical construction which has assisted them in building up such an enviable reputation as fine timekeepers. They are all well made, and are warranted by both the factory and ourselves. The two highest grades are especially adapted to the requirements of railroad men, where a fine timekeeper is essential, and where it is necessary to have a certificate of inspection from the railroad company.

WE FIT IN THESE CASES HAMPDEN MOVEMENTS ONLY, AS FOLLOWS:

	With 10 Karat Case.	With 14 Karat Case.
7 Jeweled, Hampden, gilt	$11.90	$13.90
11 Jeweled, Hampden, gilt	12.90	14.90
13 Jeweled, Hampden, nickel	14.40	16.40
17 Jeweled, Hampden, nickel, patent regulator	17.90	19.90
17 Jeweled, Hampden, nickel, patent regulator, adjusted, with Breguet hairspring	19.90	21.90
17 Jeweled, Hampden, nickle, patent regulator, adjusted, double sunk dial, and Breguet hairspring. A fine movement for railroad use	22.90	24.90
17 Extra fine ruby Jewels, in gold settings, gold bevel head screws, patent Breguet hairspring, double sunk dial, patent micrometer regulator, compensation balance, accurately timed and adjusted to temperature, position and isochronism. Especially adapted to railroad use	$42.90	$44.90



The above is the highest grade 16 size movement made by the Hampden Watch Co. The Dueber Watch Case Co. and the Hampden Watch Co. are both located at Canton, Ohio. The factories are three stories high and occupy a frontage of 1,400 feet.

All of the above movements are warranted for five years.

We speak for your trade and offer you every possible inducement to get it.

Wadsworth, Boss and Elgin 16 Size, Gold Filled Watches.

Our line of 16 size filled cases is very complete, and represents all of the best manufacturers. For want of space we illustrate but three each of the 10 and 14 karat, but will furnish any style or make desired. Those illustrated are the latest and most popular patterns. They are made in the new thin model for the latest Elgin and Waltham 16 size movements. Thin watches are growing in favor very rapidly, as they do not disfigure the clothing like a heavy thick watch. While we only illustrate one each of the Wadsworth cases, we can furnish them in any design and pattern of engraving listed on this page. The engravings on these watches are of the very finest done by hand, and the cases are finished in the highest style of the art. They are made by the Wadsworth Watch Case Company of Newport, Ky., and the Keystone Watch Case Company (makers of the Boss case), of Philadelphia, Pa. They are constructed of two plates of solid gold, over fine hard composition metal. The 10 karat cases are warranted to wear for fifteen years, and the 14 karat cases for twenty years.

No. 4121. Case is satin finished, and is especially adapted when desired for the engraving of a large monogram.

GOLD FILLED, SCREW BACK AND BEZEL, DUST-PROOF, 18 SIZE CASES.

Prices lower than ever before. Anybody can own a gold filled watch at our prices. Screw dust-proof cases have become very popular, and are being **so much appreciated** by all who desire an open faced watch that the sales have grown to an enormous number. They are symmetrical in design, have no joints to wear out the pockets, and they afford the movement the most perfect protection from intrusion of dust or dampness, and retain the oil in a fluid form for a greater period of time. They are especially adapted to the requirements of millers and others exposed to dust. For street car men, they preserve the movement from exposure to dampness.

The cases illustrated on this page are manufactured by the celebrated **Joseph Fahy's Watch Case Company** of Brooklyn, N. Y. They are made of **two plates of solid gold** over fine hard composition metal, are very strong, **beautifully engraved,** thoroughly finished in every respect, and warranted by certificates from both the manufacturers and ourselves. The 10 karat cases are guaranteed to wear for fifteen years, and the 14 karat cases for twenty-one years. They can also be furnished in engine-turned engraving, and with antique or plain pendants, as desired. They are all fitted with **heavy bevel edge glasses.**

SOLID GOLD, 14 KARAT, NEW THIN MODEL, 16 SIZE CASES.

In **Solid Gold Cases** we handle nothing but **the very best solid gold through and through,** and made only by the oldest and most reputable case makers. You will not find cases of such high grade and finish as we offer you in the average retail store. They are only to be found in the largest and finest retail stores in the large cities, such as Chicago and New York. We give you the advantage of having the largest and most complete stock to select from, and at the same time **save you from 33⅓ to 50 per cent** on your purchase. Our line is very complete, and if you do not find here what you want, write us, giving an idea of what you wish and we will be pleased to quote you. We illustrate here three of the latest and prettiest designs, which are all very popular. No. 4150 can be furnished in satin finish instead of engine turned, if desired. Furnished in that style it is especially adapted for monogram work. (Large monograms engraved on watch cases can be furnished at from $2.00 to $6.00, depending on style, quality, etc.) We carry in stock and can furnish **raised colored gold and diamond set solid gold cases,** in either 16 or 18 size when desired. Prices furnished on application. **Open Face Cases, $1.00 less.**

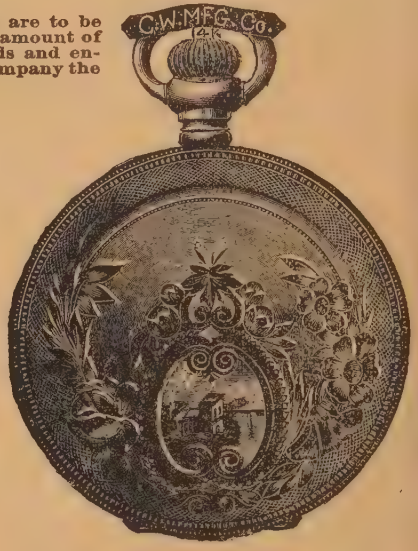
SOLID 14 KARAT GOLD, 18 SIZE CASES.

If you want the best that money will buy, get a solid gold case, but don't pay the retail prices for it. Your jeweler will say you cannot buy a good solid gold case at our prices, or your friends who have been accustomed to buying at retail may say the same. **But do not be deceived.** We will give you a pointer. If you have any doubts ask your dealer what he will pay you in cash per pennyweight for old 14-karat gold. **Do not accept a trade proposition,** but talk on the basis of cash, and not with the promise that you will buy a watch from him. The market value of 14 karat gold is 56 cents per pennyweight. After it is refined it is worth about 10 cents more. The average gent's solid gold case weighs from 30 to 45 pennyweights. **To the cost of gold we add cost of making and engraving, and our small per cent. of profit for handling, and there you have it. Figure for yourself.** You need take the statement of no one for it. It has always been our disposition to place everything before our customers in a plain and concise manner, then they can understand what they are buying, and are easier to satisfy.

Our solid gold cases are the best to be had, are **solid 14 karat gold through and through,** and made by the best makers in the watch case business, concerns who furnish the largest and finest stores in New York City, Chicago, and other large cities. They are all stamped inside, "**14 karat solid gold,**" warranted United States Mint Assay. We do not handle anything below 14 karat in solid gold cases, as the difference in the cost of gold is but a few cents per pennyweight and would not justify the purchaser in making a sacrifice on the quality. We furnish with each gold watch a certificate of guarantee, warranting the case for a lifetime and the movement for five years.

Engraving on watch cases, script 2½ cents per letter, old English 5½ cents per letter.



When watches are to be engraved the full amount of cash for both goods and engraving must accompany the order.

GENUINE GOLD FILLED, 6 SIZE, LADIES' WATCHES.

Never before were genuine gold filled watches offered at such prices. We are bound to be at the head of the procession in establishing low prices, and we do not forget that the ladies appreciate a bargain as well as the gentlemen. The prices at which we are selling these genuine gold filled watches makes it possible for ladies to wear a beautiful watch which cannot be told from solid gold, who have been compelled to do without one or wear something that they were not proud of.

These watches are genuine gold filled; made of two plates of solid gold over composition metal, and warranted by certificates from the manufacturers to wear for five years. Do not think because they are cheap that everybody would know that you were wearing a cheap watch, for it is not true. We will defy anyone who is not thoroughly familiar with the different grades and makes of watch cases to detect the difference between one of these watches and any of the high priced watches, so far as outward appearance is concerned. They are perfectly fitted and finished, elaborately engraved, and for beauty are not surpassed by anything on the market.

20-YEAR GOLD-FILLED WATCHES, LADIES' 6 SIZE FOR $7.75.

Your retail dealer will not sell you one of these watches because he cannot get them except of us, and if he did sell them would want two prices. On these, as well as two special gents' watches, **we control the entire production** of one of the **largest Watch Case factories in the world.** They are made under contract for us according to our own specifications and designs. We have figured the cost of material, the cost of making and engraving, and allow the manufacturers a small per cent of advance for their profit. This enables us to place the goods in your hands at a small per cent of advance on **cost to manufacture,** instead of your having to buy the goods in the regular way after a large profit has been added by the manufacturer and a profit for the general selling agent, still another for the jobber or wholesale dealer, and then a large profit for the retail dealer, after which you would have to pay twice the price for a watch of the same quality as the one we offer you. Your jeweler will naturally make every effort possible to induce you to buy at home, and if persuasion will not do he usually resorts to trickery by trying to intimidate you by saying that if you send away for goods you will make a mistake; but **he can produce no argument** to substantiate it. We have given you all the argument we think necessary to the contrary. **You run no risk whatever,** for you can see the goods before you pay for them, if you desire. Besides this, you have **a certificate of guarantee** from us and an agreement that if the watch is not satisfactory and does not fulfill the requirements of our guarantee that we will refund your money. This is all that is necessary when you are dealing with a thoroughly reliable concern.

These cases are made of **two plates of solid gold** over fine hard composition metal, are thoroughly well made in every respect and beautifully engraved. They are warranted by certificate to **wear and retain their color for twenty years.** So far as finish, quality and design is concerned there is nothing made that will surpass them. You must not get the impression that on account of the low price at which they are sold that they would have an appearance of cheapness, for it is not true. We can lay them side by side with any of the other best grade of cases on the market and you cannot tell the difference.

12 cents will carry a ladies' watch to any point in the U. S. by registered mail; 25 cents to almost any point by express.

14 KARAT SOLID GOLD 0 SIZE LADIES' WATCHES.

The finest goods made at the lowest prices. We have absolutely no competition on solid gold cases. No concern is willing to meet our prices. They say they will have a good profit or they will not sell them. **Our solid gold cases** are the very best made. They are made of **solid 14 karat gold through and through,** and are manufactured by the best makers, who supply the largest retail stores in the large cities and whose reputation is a sufficient guarantee for their goods. We carry a full line of the latest and prettiest patterns of **engraved, satin finished, engine turned, escalloped and beaded centers, raised colored gold ornamented and diamond set cases.** We will put your monogram or name in plain or fancy engraving, raised colored gold ornamentation or in diamonds or semi-precious stones when desired. If you do not find here what you want, please advise us, stating what you desire, and we will be pleased to quote you prices. **Our stock is very large,** but for want of space we illustrate here only the latest and most popular designs. We claim that **we can save you from 33⅓ per cent to 50 per cent** on prices charged by retail dealers **for solid gold watches,** and in addition to this we always furnish strictly up-to-date goods. See what we have to say about gold watches on gents' 18 size page. **A certificate of guarantee accompanies each solid gold case, warranting it for a lifetime.**

SOLID 14 KARAT GOLD, 6 SIZE, LADIES' WATCHES.

If you are hard to please and want the best that money will buy, get a solid gold watch, but do not let your retail dealer fool you on an exchange. He is most always willing to take your old watch in exchange, and apparently allow you a good price on it. He may allow you more than the market value IN TRADE. We think you are broadminded enough to see how he could do that if he has the price for his goods set high enough. Then he will sell your case for metal and put the movement in the scrap (which is worth very little). See what we have to say about this in "Plain Talk" on third introductory page of this department.

All of our solid gold cases are 14 karat, solid gold through and through, and warranted for a lifetime. In fixing the price on gold watches we figure the value of the gold, add the cost of making and engraving, a small per cent for the manufacturers' profit, and **offer the cases to you at only a slight advance on cost to manufacture. We do not ask you to take our statement. You can figure it for yourself.** Refined 14 karat gold is worth about 66 cents per dwt., the average 6-size case weighs from 16 to 20 dwt.; but let us say here that you will often find cases in retail stores that, with the springs taken out, there would hardly be sufficient material in the case to resist the least pressure, and will not afford the movement the protection it needs. All of our cases are made very heavy, from 17 to 20 dwt. We list here only a few of the most popular and stylish designs, but **we can furnish anything that is made.** We handle a very fine line of raised, colored, gold, ornamented, and diamond-set cases. We wish to direct your attention especially to No. 4318, which can be furnished with any name to order, but it will require about ten days after the order is received to make shipment of this watch. Watches with names or engravings on cannot be sent C. O. D., but they must be accompanied by the full amount of cash.

Our lifetime guarantee accompanies each solid gold case.

HIGHEST GRADE GOLD FILLED CASES MADE.

RAISED COLORED GOLD ORNAMENTATION AND GENUINE DIAMOND SETTINGS.

The first four cases following represent the highest art in watch case making, and will certainly satisfy the desires of those who wish to obtain the best filled case that money will purchase. Nos. 65340, 65350 and 65351 are made by the Wadsworth Watch Case Company of Newport, Kentucky; and No. 65352 is made by the Crescent Watch Case Company, formerly a part of the Waltham Watch Company; both concerns are among the oldest watch case makers, and are noted for the manufacturing of the finest goods, and as they are old in the business their reliability is established beyond a doubt. They are all made of two plates of solid 14 karat gold over fine hard composition metal and are warranted by certificates from the manufacturers to wear and retain their color for 20 years. In addition to this certificate **we add our certificate of guarantee, which warrants the case to wear for 20 years and the movement an accurate time keeper for 25 years.** They are all decorated with raised colored gold ornamentation in the most beautiful and handsome floral designs. For the benefit of those who do not understand how the raised ornamentation is made, we will say that the ornaments are all composed of solid gold laid on to the case after it has been finished, firmly secured and then engraved. Deep yellow flowers and ornaments are composed of pure gold, 24 karat fine, while the light yellow colored ornaments are composed of gold alloyed with silver. Reddish colored ornaments are alloyed with copper, the same as rings, watch cases, etc. The white ornaments are alloyed with platinum and silver, while the green gold is alloyed with silver and colored with chemicals. The prices for either 0 or 6 size are the same. Cases Nos. 65340, 65350 and 65352 are 6 size, while 65351, as illustrated, is 0 size. Please state when you order which size is wanted.

For 50 cents you can see and examine watches at your express office. If not satisfactory we will refund the deposit.

12 cts will carry a ladies' watch to any point in the United States by registered mail; 25 cents to almost any point by express.

ALL AMERICAN MOVEMENTS ARE now made in STEM WIND and STEM SET only.

PHOTOGRAPHS ON WATCH CASES AND DIALS.

An ever-present reminder of your relatives or friends, in the form of **a photograph on the dial or back cap of your watch,** at a trifling expense. **The** work is done by the Photographic Enamel Process, and is as perfect in detail and finish as the best cabinet photographs, and with ordinary care will last forever. It is an excellent place to carry a **picture of the baby, your wife or husband, or your sweetheart.** No extra charge for group if the pictures are all on same photo. When group picture is wanted and pictures are on separate photographs, add $1.50 for each extra figure. Send us your watch by mail or express, carefully packed in a small strong box, well wrapped in some very soft material (cotton batting or similar substance is best), together with a photo to copy from (size makes no difference). As soon as the work is done we will return the watch and picture uninjured. It usually requires about a week after we get the watch and picture to complete the work.

We are doing a great deal of this work, which has in every case given most excellent satisfaction. We have received many letters of testimonials speaking in the highest terms, and that the work was far nicer than they could have expected, and that they could not find words to express their appreciation and thanks. The work can be done on any kind or size of watch. Gold or gold-filled are the best for cap work, but it makes no difference

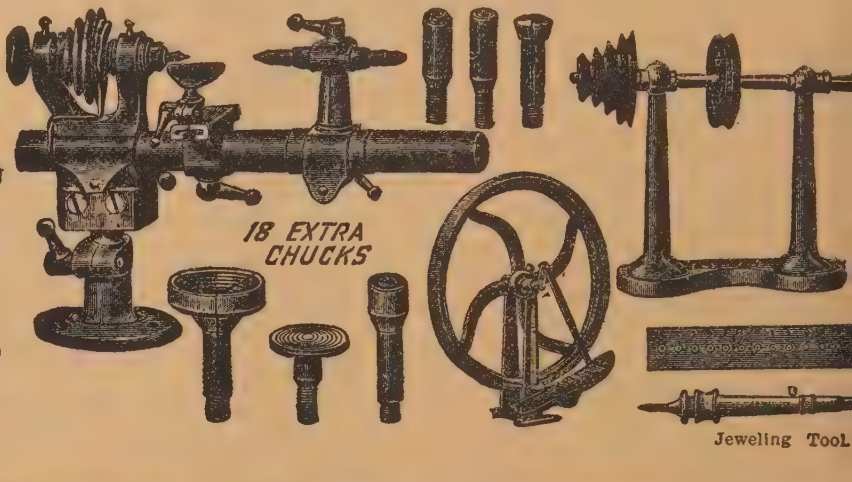
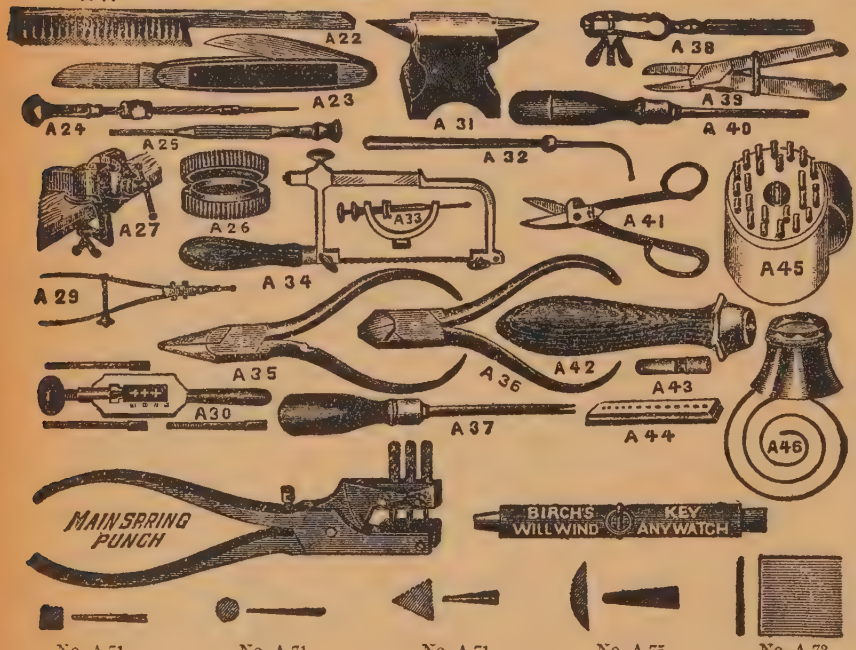
No. 65349.
The above is a sample of work on the cap in back of watch. Price $2.25.



WATCHMAKERS' TOOLS AND MATERIALS.

The numerous inquiries we have received from time to time have induced us to list a line of watchmakers' and jewelers' tools. For want of space we can illustrate only the most useful and desirable, and have been compelled to reduce the cuts in order to illustrate what we do. The goods, however, are all of standard make and size, and of the best quality. If there is anything that you want that you do not find illustrated, send us your order, enclosing market price for same, and give an accurate description. If you do not know what the cost is, be sure to enclose enough, and we will return what is left.



We guarantee our prices to be as low as any, and you will find that we always furnish goods at lowest wholesale prices. We will be glad, however, to quote you if you desire prices before ordering.

When ordering material for repairs, always send a sample if possible. If not, fully describe the size and make of watch or clock for which parts are intended. When ordering materials you will save both time and trouble by making a remittance of sufficient funds to cover all possible charges for cost of goods and mailing. We will always refund any balance left after paying cost of goods and mailing.

OUR IMPROVED WATCHMAKERS' LATHE,

WITH INDEX POINTER AND LATCH.

Length of bed, 10 inches; bed to centers, 1½ inches; will swing a wheel or plate up to 3 inches in diameter.

This is the best watchmakers' lathe in the market for the money. The bed is made of turned steel, slightly flattened on one side. It is very rigid, is well finished, and perfectly true. The spindles and bearings are hardened, and carefully ground to insure them running true. Cone pulley is made of steel, with three steps for different speeds; with index pointer and latch at cone, as shown in cut, with rubber knob on end of draw-in spindle. The tail stock is provided with taper center, hardened and ground. The bed can be raised to suit the operator, or can be removed from the pedestal entirely by simply loosening the small lever on same.

The lathe is beautifully nickle plated and has 18 extra chucks, including a complete assortment of split chucks, wheel chucks, and one cement chuck, with brasses.

Price of lathe complete with 18 extra chucks.....$22.00
Counter-shaft (as shown in cut), extra.....3.00
Foot wheel (as shown in cut), extra.....3.50

A WORD OF CAUTION.

In ordering mainsprings all that is necessary is to enclose a piece off the outer end about one inch in length, and state what kind of watch it is for.

Watch glasses cannot be fitted from any measurement that you can give or statement of the kind of watch it is for, as the sizes vary so much, as also do the kinds. It requires a very large stock of glasses for a proper assortment and even then sometimes they have to be ground to fit. We cannot fit glasses except that we have the case.

In sending for any kind of materials always be sure to state kind of watch it is wanted for and enclose the piece as a sample.

Watch or clock materials cannot be exchanged. We will do any kind of watch work at jobbing price, which is about one-half the price charged by retail dealers.

When goods are to go by mail be sure to enclose money enough to cover postage. Any balance will be returned to you.

Genuine Diamonds and Solid 14 Karat Gold Mountings.

On diamonds we have absolutely no competition. No concern has ever offered diamonds at anywhere near our prices. Our diamonds are **pure white, clean and well cut.** The value **of a diamond** depends largely on the cutting, for if it is not well cut the stone will not be brilliant. We import our diamonds direct from Europe in large quantities and pay spot cash, thus securing them at the lowest possible figure. Our Buyer is an expert in his line and buys nothing but perfect goods. We buy our mountings in large quantities and do our own setting. Every stone is carefully weighed on fine diamond scales before it is set, and you will be charged only for the actual weight of the stone and value of the mounting. The stone we send you will sometimes vary a small fraction from the one ordered but the price will be changed accordingly. Diamonds are as good as gold. They never wear out and if bought of us you can realize very near, if not more than you paid for them.

We send with each diamond a **Guarantee and Refund Certificate** in which we guarantee the stone to be a **genuine perfect diamond** and we agree to take it back at any time within one year from date of purchase and refund the purchase price less 10 per cent. Where is there another concern that will do this? Don't buy diamonds at retail and pay two prices for them.

Diamonds **will be sent C. O. D.** for examination at your express office, providing $1.00 accompanies your order as a guarantee of good faith. If goods are not found to be as represented the deposit will be refunded to you

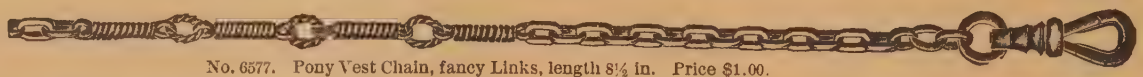
Finest Quality Rolled Gold Plated Gents' Vest Chains.



Chains known to the trade as "Fire Gilt" and "Electro Gold Plated" are handled largely by retail dealers and some advertising concerns. We wish to warn our customers against such goods, as they will not hold their color but a short time, and are usually sold for more than the prices we ask for genuine Rolled Gold Plated goods. All of the Chains listed on this page are the best quality Rolled Gold Plated and warranted to wear and retain their color for five years.

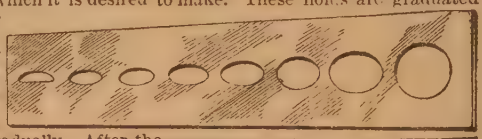
GOLD-FILLED RINGS.



How Gold-Filled Rings Are Made.

We have given in the front part of this department an article explaining the manner in which gold-filled cases are made, and as we offer you here a page of gold-filled rings, we believe it would be interesting to you and much more satisfactory before making a purchase of a gold-filled ring to know just how they are made. It would seem to the average person and even a mechanic that it would be a difficult problem to completely envelop a piece of hard composition metal with solid gold, and at the same time turn out and place the goods on the market at such a low price. The operation, however, is very easy when it is understood. To start with, a piece of solid gold tube from 1½ to 2 inches in diameter is taken and the hole on the inside made perfectly smooth, after which a piece of hard, fine composition metal is placed on the inside of the tube so as to fit the opening perfectly. Some fine gold solder is now placed in the crevice and the whole is inserted in the furnace. As soon as the two pieces are heated sufficiently the solder flows into the crevice, after which it is removed from the furnace, and after it is cold the two original pieces are one. You will see a section of such a piece illustrated in Fig. 1.

One end of this piece is then hammered and drawn out, so as to make it a little smaller, after which it is inserted in what is called the draw plate, which is a long steel plate with a number of holes in it of such shape as the pieces which it is desired to make. These holds are graduated in size, at one end being very large and at the other end small. The piece of material to be worked on is inserted in the large hole first and with a pair of tongs it is drawn through; this reduces the piece, when it is again hammered at the end to make it small enough to be inserted in the next smaller hole and in turn drawn through this. (All kinds of wire for whatever purpose it may be intended is drawn in the same manner. Sometimes a wire will be drawn in this manner to a mile or more in length). The edges of the holes are all polished so as not to scrape, but to press the metal. This drawing hardens the metal to such an extent that after drawing it through several times it would break easily. It is then annealed by inserting it in the fire and allowing it to cool gradually. After the piece has been drawn out to the required shape and size, one end is bent around a steel mandrill until it has formed a circle of the size the ring is to be made. It is then cut off at the proper place and both ends are carefully surfaced in order to bring them together and make a perfect joint, and on this joint is placed some fine gold solder and the ring inserted in a furnace sufficiently heated to cause the solder to flow into the joint. The ring is then polished carefully on a cotton buff wheel with tripoli and rouge, after which it is ready for the market. Solid gold rings are made in the same manner with the exception of the composition metal on the inside.

The market is flooded with cheap brass rings which are electro-gold plated, and are called rolled plate or rolled gold plate, and which are utterly worthless. In gold-filled rings we handle nothing but the very best. The gold used is 14-karat, will wear an indefinite length of time, and is guaranteed to give entire satisfaction.

RULES FOR MEASUREMENT—SCALE SHOWING SIZES OF RINGS.

BE SURE TO FOLLOW THESE INSTRUCTIONS in ordering rings, whether Gold-Filled or Solid Gold; we must know the size from this scale. Take a narrow slip of paper and measure around the finger, making sure that when both ends meet it will fit exactly as ring should. To get number of size measure slip on gauge by placing one end of the slip even with the left end of the gauge here illustrated. The figure which the other end meets will indicate the size required. When ordering always write number of size, as slip is sometimes lost and order delayed until another is received.

Use a slip of paper about the width of the above gauge.

BEFORE YOU SEND YOUR ORDER, PLEASE REFER TO OUR INSTRUCTIONS ON THE FIRST PAGE OF THIS DEPARTMENT.

FINE SOLID GOLD BOHEMIAN GARNET AND AMBER JEWELRY.

The jewelry listed under this heading if manufactured in this country could not be sold for twice the prices at which we offer them. These goods are made in the forest regions of Germany by poor peasant families who realize from 15 to 25 cents per day for their work. If you will stop and think that every one of the stones must be cut, ground and polished, besides the cost of material and the work of mounting you can get some idea of the amount of labor required to make these goods.

FOUNTAIN PENS.

Before listing a line of Fountain Pens we have taken every possible precaution and spared no pains to place at the disposal of our customers the best Pens made. There is probably nothing more annoying than a Fountain Pen of poor quality. We wish to direct your attention especially to the very simple manner of construction, and at the same time they have all the latest improvements. Every one of our Fountain Holders are fitted with a solid gold 16-karat Pen, (except the Globe, No. 62451, which has a solid gold 14-karat Pen.) They all have genuine iridium points (called diamond points), which will last with proper care for a lifetime. They have the latest improved feeds, both over and under, which insures a good flow of ink. The Holders are made of the very best quality of rubber, in a variety of styles, as shown in illustration, and are finished in the best possible manner. We have carefully investigated and thoroughly tested every line of Fountain Pens on the market, and we now feel that in offering you this line of Pens we can give you more value for the money than would be possible for us to do with any other line. Every one is thoroughly warranted by both the manufacturers and ourselves, and we will make good at any time any Pen which is found to be in bad order from defective material or workmanship. Of course, we cannot be responsible for accidents.

The market has been flooded with Pens of poor quality, and still sold at higher prices than we ask for the best goods. The Pens are of low grade, and will turn black or of a brownish color after being in use for a short time. They have poor points, which will soon wear out, and the material is so thin and poorly tempered that they have not the necessary elasticity. The holders are poorly constructed, the feeds fitted hurriedly and not of proper shape, which has been the means of many a person becoming disgusted with a Fountain Pen.

No. 62451. Globe Fountain Holder, fitted with a No. 2 solid gold, 14-karat Pen. All the material used in this Pen is thoroughly first-class, and it is warranted to give perfect satisfaction. Our special price, 65c.

No. 62452. Windsor, vulcanized rubber Holder, chased, fitted with No. 2, 16-karat, solid gold Pen. Price, $1.25.
Larger size Holder, fitted with No. 5 solid gold, 16-karat Pen, $2.50.

No. 62453. Windsor, black vulcanized rubber Holder, hexagonal shape, tapered cap, vented, fitted with No. 2 solid gold, 16-karat Pen. Price, $1.50.
Larger Holder, fitted with No. 5 solid gold, 16-karat Pen. Price, $2.75.

No. 62454. Windsor, black vulcanized rubber Holder, spiral finished, with tapered cap, vented, fitted with No. 2 solid gold, 16 karat Pen. Price, $2.35.
Can be furnished with black and brown variagated Holder at 25c extra, when desired

No. 62455. Ladies' Windsor, black vulcanized rubber Holder, chased finish, mounted with two gold-filled bands, taper cap, vented, fitted with No. 2 solid gold, 16-karat Pen. Price, $2.50. This Pen is made especially for ladies' use, and has met with enormous sales.

No. 62456. Columbian, vulcanized rubber Holder, chased finish, mounted with fine gold-filled bands and taper cap, vented, fitted with No. 2 solid gold, 16-karat Pen. Price, $2.75.
Larger holder, fitted with No. 5 solid gold, 16-karat Pen. Price, $3.25.

All of the above Fountain Pens are guaranteed to give satisfaction. Any that fail to do so can be returned to us for exchange, or money will be refunded, as desired. Do not question the quality of these goods because the prices are low. We guarantee them, without any exception, to be unsurpassed by any goods on the market.

FINEST QUALITY GOLD PENS AND HOLDERS.

Our Pens are all mounted with the best quality of gold filled stock, and are warranted not to tarnish. The pearl used is all of first quality, and is beautifully finished. Our gold Pens are all of the finest quality, solid gold through and through, heavy and well tempered, with genuine iridium points (called diamond points), perfectly finished, and with ordinary care will last a lifetime. The market has been filled with cheap, trashy gold Pens of low grade, which will soon turn brown, are not properly tempered and have not sufficient material to hold their elasticity; by reason of which they are of no value to write with, and certainly are not an ornament. The Holders are cheap plated goods, which will soon tarnish, and the pearl of third or fourth grade, which has no lustre; and even though they are sold for as much as we ask for first-class goods, they are of little value.

We take particular pride in offering you a line of solid gold Pens and gold filled mounted Holders, which is not surpassed by any on the market. These goods are largely sold for presentations, and as there is nothing more embarrassing than to make your friend a present of a worthless article, we advise you to buy none but the best. These goods are made by one of the best and most reputable manufacturers of this line of goods, and are fully warranted to us. We guarantee them to our customers, and will gladly make good any Pen or Holder that is not fully equal to our description, or money will be refunded if you desire it.

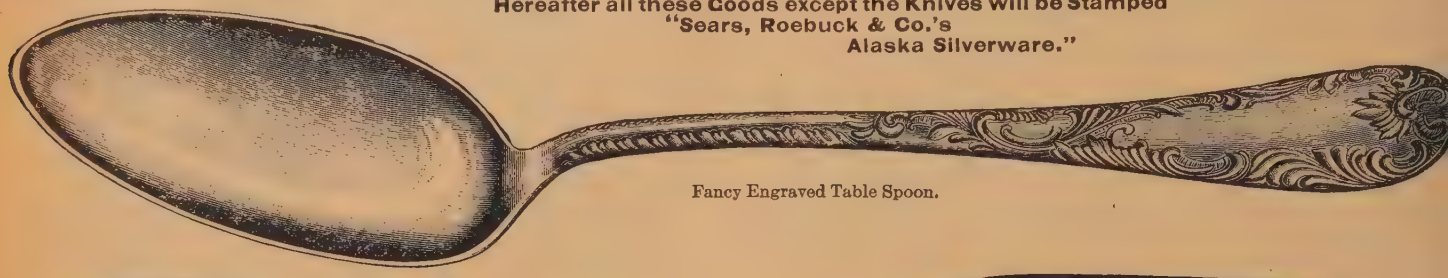
ALASKA SILVERWARE.—A New Discovery.

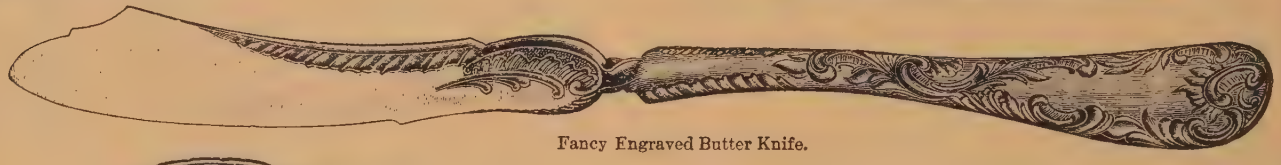


The cheapest and best flat ware made. The Alaska Silverware is not plated, but is the same solid metal through and through, and will hold the same color as long as there is any portion of the goods left. Do not be deceived by any dealer who undertakes to sell you any of the numerous imitations of this ware that are sold on the market for more money than we ask for the genuine. The genuine Alaska Silverware can be had only of us.

Before taking hold of this new discovery we left nothing undone to thoroughly investigate the properties of this metal, and to test the same in every conceivable manner to satisfy ourselves that it was all that it was represented to be. After having made all sorts of experiments, and it stood all tests, we made a contract with the factory to handle the goods. It has now been about two years since we began to handle this line, and it has not only proved from experiment to be as represented, but with two years of actual service in the hands of many thousands of our customers, who send us the most flattering recommendations in praise of these goods, and with the rapidly increasing sales, we feel that we cannot recommend it too highly.

The metal is very dense and tough, is almost as white as genuine silver, takes a beautiful polish and requires no care as does silver plated ware. You can scrape kettles or pots, or subject it to any kind of service without fear of damage.

We have this year added a beautiful engraved pattern, which is equal in appearance and artistic finish to any of the best silver plated or solid silver goods on the market. The engravings are as fine as can be made, the handles of an oval shape, and will be furnished at only a slight advance over the prices of the plain pattern. The immense quantities of these goods we handle, and the condition of our contract direct with the factory, puts us in position to furnish this genuine Alaska Silverware at a slight advance over cost to manufacture.



Hereafter all these Goods except the Knives will be Stamped "Sears, Roebuck & Co.'s Alaska Silverware."

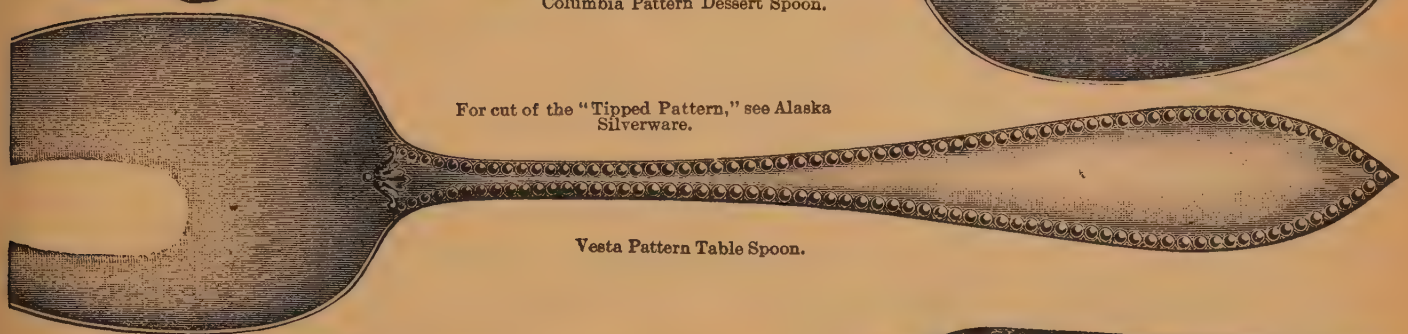
"ROGERS BROS. 1847," SILVER PLATED WARE.



THE "ROGERS BROS. 1847" GOODS ARE AND ALWAYS HAVE BEEN THE BEST SILVER TABLE WARE MADE.

Do not be deceived by allowing any dealer to sell you any other Rogers' goods, claiming that they are the same or as good. These goods are all stamped "**Rogers Bros. 1847.**" and no goods without that stamp are genuine. They are made by the **Meriden Britannia Company**, of **Meriden, Conn.**, who are one of the oldest and most reliable manufacturers in the silverware business. The goods are all made of fine **solid white metal** and **heavily plated with coin silver.** The **Knives** and **Knife Handled Forks** are **made of fine solid case steel,** first plated with Copper then with **coin silver.** We have this year placed a very heavy contract direct with the manufacturers on a spot cash basis, which enables us to sell the goods to the consumer for the same or less money than the retail dealer pays for them. You may wonder how this can be, but it is plain enough when you understand it. In the regular way the manufacturer sells the general agent, the general agent sells the jobber or wholesale dealer, and the wholesale dealer sells to the retail dealer. Each one of these concerns employs expensive traveling salesmen, and has other very heavy expenses, in addition to a liberal allowance which must be made for losses by failures, etc., all of which must be added to the price the retail dealer pays for his goods.

We handle a very complete line of the **Rogers Bros. 1847 goods**, but our limited space will not permit us to list but a portion of the same. We, however, have represented one of each of nearly all the styles in which these goods are made, which includes all of the very latest and best patterns. We list these goods in two grades, namely, what is known as the **extra plate** and the **triple plate**, the latter of which is the best and highest grade of silverware ever made.

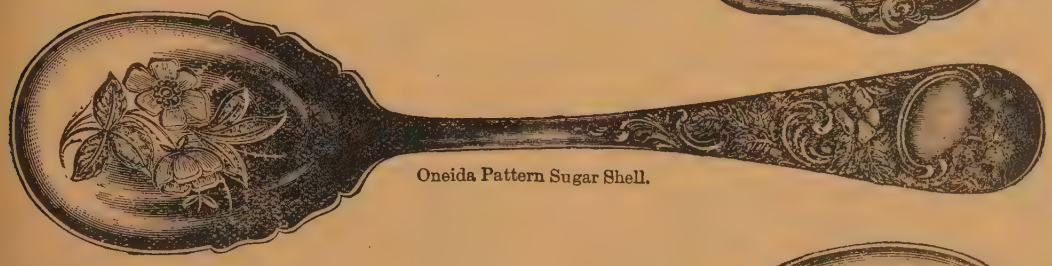
SOLID STERLING SILVER FLAT WARE.

In Solid Silver Flat Ware we recognize no competitors, nor do we care for combinations or trusts. Recently there has been formed a combination by the manufacturers of solid silverware in order to keep up the prices. They have pledged themselves not to sell any concern who will cut the prices and interfere with the dealer, who must have larger profits, and by reason of the many hands through which the goods pass before he gets them, he pays as much for them as the consumer should pay. We repeat, we do not care for such combinations. We have fought them for years, and we will always find some way to get the goods at the right prices, and will not be dictated to as to the prices at which we sell them.



We illustrate and handle a complete line, with the prettiest and latest patterns on the market, and at prices from one-third to one-half less than you will have to pay your retail dealer. Our solid silver goods are all guaranteed to be solid sterling silver through and through, 925-1000 fine. We guarantee that there is nothing better on the market, and never before has such a complete and beautiful line been offered to the consumer direct. We illustrate one or more pieces of each pattern and list them below, in all the patterns.

SPECIAL DRIVE IN QUADRUPLE SILVER PLATED CASTORS.

As Castors are the best selling pieces in hollow silverware, we have made special preparations for this year's trade by contracting for an immense quantity of these goods direct with the manufacturers on a spot cash basis. These goods are made by the best silverware manufacturers, whose reputation is a sufficient guarantee for their goods. They are all made of a fine grade of solid white metal, are quadruple plated with pure silver, beautifully engraved, and are warranted in every respect. The bottles are all made of fine quality of flint glass, the stoppers ground in so as to insure their fitting perfectly, and nothing is left undone to make them the best goods on the market. They are guaranteed by the manufacturers to us, and we in turn guarantee them to our customers. We are prepared to furnish you with these goods at from one-third to one-half the prices you would have to pay for them at retail. We ask you to investigate, compare prices and see for yourself. We want your orders, and if low prices and good goods will secure them, they are ours. If you have not dealt with us before, and are in need of anything of this kind, lose no time in sending us a trial order, and be convinced that we are indeed the Cheapest Supply House on Earth.

We sell everything on a basis of the lowest possible cost of the goods. Retail dealers don't fix their prices that way. They sometimes sell what they call a very staple article as low as they can. Then on goods with which the public is not familiar with values they make long profits. That is deception. Another bad feature is that he pays too much for his goods.

OUR CLOCK DEPARTMENT.

In clocks we represent all of the oldest and most reliable makers, those who have built up a reputation for their goods by making only such clocks as they could guarantee.

We list clocks made by the following concerns, viz.: The Waterbury Clock Company, of Waterbury, Conn.; New Haven Clock Company, of New Haven, Conn.; Ansonia Clock Company, of Ansonia, Conn. and the Seth Thomas Clock Company, of Thomaston, Conn.

(We wish to state that the Waterbury Clock Company has no connection whatever with the Waterbury Watch Company, but is a much older concern.)

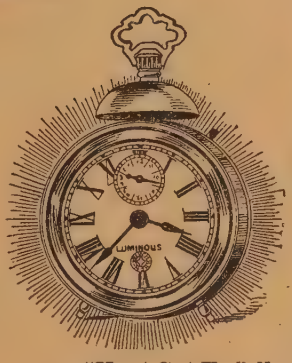
Every clock we sell is warranted to us by the manufacturers, and we warrant them to our customers. Any clock bought of us that is not in every way satisfactory can be returned, and it will be exchanged or money will be refunded. We sell clocks at astonishingly low prices, but do not get the idea that the grade is correspondingly low, for we cover almost the entire line of each of the best makers. Do not think that the shipping charges would advance our prices to anywhere near the prices you would have to pay your retail dealer, because he would have to pay the same freight or express rate as you, and therefore you would be on an equal footing with him, and at our prices you are in position to buy as low and even lower than he. We wish you to investigate for yourself, and be convinced that we can save you from 30 to 50 per cent on clocks.

We give at the bottom of each page the approximate weight of the clocks represented on that page, boxed ready for shipment, from which you can estimate the cost of the shipping charges if you desire.

It is not necessary for you to pay the shipping charges in advance. The best way is to pay them when you get the goods.

Clocks will be sent to any address by express C. O. D. when desired, providing a deposit of $2.00 is sent with order. The balance can be paid at the express office after examination. If the goods are not satisfactory the goods can be refused and the money advanced will be refunded.

When cash in full is sent with order you are entitled to a discount of 3 per cent.; on orders over $50, 4 per cent.; over $100, 5 per cent.



You run no risk by sending cash in full, for if the goods are not satisfactory they can be returned at our expense and your money will be refunded.

Clocks take first-class freight and express rates. For further instructions on rates, etc., see front of this book.

PORCELAIN CLOCKS.

Porcelain Clocks have of late become very popular and are having a wonderful sale. The cases are made of one solid piece of porcelain, in irregular and fancy shapes, beautifully ornamented with raised work and colored gold decorations. The porcelain case is especially desirable in addition to its beauty for the reason that it will never become soiled. The finish is indestructible, and can be cleaned without any fear of damage. They have always been sold at very high prices, but we have made special arrangements by which we are able to sell them at a price which brings them within the reach of anyone. In fact, everything considered, they are the cheapest clock made. The cuts do not do these clocks justice. They must be seen to be appreciated.

No. 62982. Cuckoo Clock. These Clocks are largely in use in Europe and have of late years become very popular in this country. The clock is quite a **novelty**, but is thoroughly practical and is certainly a **very interesting and pretty ornament in any home.** The little door above the dial opens every half hour; a bird appears, flaps its wings and **calls Cuckoo**, once for half hours and as many times as it is necessary to denote the time on the hours. Before the cuckoo has called the hours the clock strikes the hours in the regular way. The clock is fitted with a **solid brass movement**, cut steel pinions and has two copper finished fancy iron weights. The height of the case is 19 inches, width 13 inches, made of fancy carved German walnut ebonized ornaments, has white bone hands and figures.

No. 62983. Calendar Eight Day Clock with Thermometer and Barometer. A most wonderful and complete clock for a little money. This clock has been one of the greatest bargains that we have ever been able to offer to our customers, and the best evidence that they have appreciated the same has been demonstrated by the very large sales. It has been one of the **best selling clocks** we have ever offered. We buy them in immense quantities for spot cash, and the price at which we offer them will save you, we believe, fully 50 per cent. over the prices asked by retail dealers. The clock will be furnished with solid black walnut or antique oak case, as desired, **beautifully carved, ornamented and decorated.** The picture really does not do it justice, for it is a work of art. The height is 24 inches with dial 6 inches. The **movement** is one of the **best made**, and is **warranted** to be an **accurate time keeper**; has a complete **calendar attachment** which works automatically and always **indicates correctly** the **day of the month.** It has a perfect thermometer on one side and on the other side a barometer. The barometer always **indicates the condition of the atmosphere** and always correctly foretells the probabilities of the weather; both are artistically set and add very much to the appearance and beauty of the clock. It is eight day and strikes the hours and halves on a beautiful gong bell. We cannot furnish it with alarm; in fact, an alarm should not be used on a cabinet clock. This clock will last a life time if properly cared for and we will guarantee satisfaction in every respect. Weight of clock, boxed ready for shipment is 17 lbs. Price..... **$3.65**

OPTICAL GOODS

In this Department we carry a most complete line of all kinds of optical goods. While we are compelled to carry some cheap goods to supply the demand for such, our specialty is the best quality of goods. You will find every article described exactly as it is and any goods which are not satisfactory to the purchaser can be returned to us for exchange, or if desired the money will be cheerfully refunded. Optical goods as well as watches and jewelry are sold by retail dealers and local merchants at enormous profits, while we are satisfied with our usual small per cent in advance of net cost to us. Opticians make a practice of imposing on their customers by charging from $3.00 to $12.00 for spectacles and eye glasses and give as an excuse for the prices charged, "that the lenses were ground to order." Grinding to order is necessary only in cases where one or both eyes are affected by what is called astigmatism, which is of very rare occurrence. Do not get the idea that it is necessary for you to have a personal interview with an optician, and that instruments called optimeters are necessary to fit you with glasses.

We have during the past year fitted many thousand people to their entire satisfaction. Many people think that the longer they put off wearing glasses the better, but this is not true for often irreparable injury is done by such neglect. The wearing of glasses is made necessary by a defect in the shape of the eyes and not until the strain on the muscles (in their vain effort to adjust the defective vision) is relieved, will the injury cease.

If you will carefully follow our instructions, we will have no trouble in selecting glasses which will fit you perfectly.

State your age; state whether glasses have been worn or not; if so, state whether for reading or distant objects or both. State whether glasses are wanted for reading or distant objects or both.

State the distance from the center of one eye to the center of the other. You can take the measure with a rule or tape across the nose. State whether the bridge of the nose is prominent or flat.

The proper reading distance is from 12 to 14 inches from the eyes, and when it is necessary to hold the book nearer, spectacles for near sight are required. When farther away spectacles for far sight.

TO TEST THE EYES FOR ASTIGMATISM.

If some of the arms of the above figure appear more distinct than others, it is evident that your eyes are affected with astigmatism. This difficulty can be corrected only by having cylindrical lenses carefully ground to order from an oculist's prescription, or by personal fitting. The presence of astigmatism is, however, very rare.

TEST FOR NEAR SIGHT.

State the greatest distance from the eyes at which paragraph 24 in the test type below can be distinctly seen. The number of inches between the eyes and this page will indicate the number of concave lenses required.

TEST FOR OLD OR FAR SIGHT.

Hold this page in a good light at 12 to 14 inches from the eyes and state the finest print that can possibly be read at that distance. The number of the paragraph will indicate the number of convex glasses required for reading, sewing, etc.

No. 48.

The smallest size letters on this card should be read easily at fifteen inches from the eye. If you cannot do so you should wear spectacles. It does not pay to buy cheap spectacles.

CAUTION.

There is a demand among pedlers and cheap dry goods merchants for a very cheap class of spectacles, and to satisfy such trade and meet competition we list them in our catalogue, but do not recommend them, on the contrary we caution our customers against buying anything in spectacles or eye glasses which we do not recommend, for the lenses are not made of good material, are not perfectly cut and polished, and are liable to do untold injury to the eyes. If you injure your clothing it can be mended or repaired, but if you injure your eyes the injury may never be cured.

FREE.

With all spectacles costing 50 cents or more we furnish a neat leather case without charge.

When spectacles or eye glasses are to be sent by mail, please send 5 cents extra to pay postage.

Remember that convex or plano convex lenses are for far or old sight, while concave lenses are for near sight.

Our line of Opera Glasses will be found to be very complete and prices guaranteed to be far below all competitors. As a rule this class of goods is sold on very long profits, but we are satisfied with our usual small per cent. By the use of lines in the description of opera and field glasses is meant the diameter of the largest lens. The system of measurement is of French origin. 13 lines are equal to about 1 5-32 inch and 15 lines 1⅛ inch, there being about 11 lines to the inch.

We carry in stock a very large assortment of field glasses at prices on which we defy competition. Our cheap field glasses are fitted with good lenses and are most excellent value for the money. Unlike other concerns we sell our better finished and higher grade glasses on the same small margin of profit. Our field glasses are all guaranteed to give entire satisfaction. The size of field glasses is indicated by the diameter of the largest or the front lens, which is measured by the French ligne system, one inch being equal to about eleven lignes. A lens measuring thirteen lignes is equal to about 1 5-32 inches and fifteen lignes 1⅜ inches.

READING GLASSES

Are very desirable for reading fine print and as they are strong magnifiers and give a large range of vision they are very restful to the eyes and especially desirable for old people, enabling them to read the finest print with ease. They are also used for sun glasses and for photographs, as they bring out the details and add a great deal to the beauty of the picture. The principle is the same as the graphoscope. The lenses are well finished, the frames of metal nickel plated and the handles of wood enameled in black.

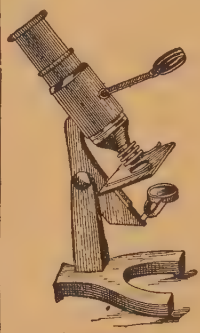
MICROSCOPES FOR STUDENTS, HOME EDUCATION, AMUSEMENT AND PROFESSIONAL USE.



No. 69790.

No. 69790. Gem Miscroscope. This is a neatly finished instrument, designed for the use of those who wish to pursue their investigation beyond the powers yielded by a simple microscope. The low price at which it is sold, its simplicity and compact form has made it a very popular instrument. The lenses are accurately ground and are of such power as to render minute objects, animal, vegetable and mineral distinctly visible. The Gem Microscope is substantially made with a vertical brass body 6 inches high. It has one eye piece and one objective giving a power of 40 diameters or 1,600 areas; has a mirror beneath the stage for the illumination of transparent objects, two glass slips, one prepared object and one pair of brass tweezers, all packed in a nice French polished case. Each.....$2.25
Postage, 25 cents.

No. 69791.

No. 69791. **Household Microscope.** Many years of experience in the sale of microscopes has demonstrated that the public appreciate a microscope of not too complicated construction of moderate price, but still well made, easily managed, capable of affording instruction and to supply this demand a Household Microscope has been designed. It is a compound Microscope having all the essential parts of a first-class instrument. It is a model of the most approved and modern pattern with a range of magnifying powers affording an opportunity for investigating the minutia of animal and vegetable life by which we are surrounded and which are to so many an unknown world. The animalcules commonly present in stagnant water, the pollen of flowers, etc., can be well observed and studied with it. It is 7 inches high, as shown in the engraving. The base is of bronzed iron, has hinged joint allowing the instrument to be used at any convenient angle. The body is brass, finely finished, stage large and steady with brass springs for holding the object; has a mirror beneath the stage for the illumination of transparent objects; two crown glass objectives affording magnifying powers of every range from 30 to 75 diameters (500 to 7,500) areas); one glass slip, plain, one glass slip with concave cell for holding liquid or insects, one prepared object, all packed in a neat box, weight 1½ lbs. Price.....$4.50

No. 69792.

No. 69792. **Household Microscope,** same as 69791 but has three objectives which are separable, giving three powers from 30 to 125 diameters, or 500 to 10,000 areas, and has condensing lens for the illumination of opaque objects, weight 1¾ lbs.

No. 69793. **Students' Microscope.** American model mounted on substantial, well japanned, iron base and has inclination joint for adjusting to any angle, has a fine rack and pinion movement, one eye piece and one dividing objective giving power from 80 to 350 diameters, has revolving diaphragm with adjustable mirror under stage for illuminating transparent objects with two rings for holding steady in position. It has a society screw which permits the use of other objectives that can be purchased when needed. The instrument is very attractive in appearance, substantial in construction, powerful but low priced, which brings it within the reach of all, weight 5 lbs.
Price complete packed in neat wood case, each.....$15.00

No. 69794.

No. 69794. **The Continental Professional Microscope.** This microscope is of new construction, the coarse adjustment being accomplished by diagonal rack and pinion, while the fine adjustment is by micrometer screw giving very delicate movement. The draw tube is adjustable for the tube length. This instrument is particularly adapted to American requirements and is very complete, of high grade workmanship, simple and is offered at a price far below other instruments of equal grade. The base is made of japanned iron of the horse shoe form with rounded corners and of ample size for stability. The pillar is of lacquered brass with joint for inclination of the body. The stage is of brass oxidized and with removable spring clips. The mirror bar switches to an obliquity below the stage and is provided with both plain and concave mirrors. This instrument is especially recommended for high school laboratories, as it fully meets all the requirements for the scientific work prescribed, and on account of its moderate cost it is brought within the reach of all. The height is 12 inches, weight about 12 lbs, has strong and well finished case with handle, lock and key, furnished with one eye piece and ¾ in. and 1-6 in. objectives with power of from 75 to 540 diameters and can be fitted to 2950 diameters. Price complete.....$34.50

No. 69795. **Continental Microscope,** same as above but with double nose piece (as shown in cut) to which both objectives are attached and which enables either one to be instantly shifted into use.

STEEL TAPE MEASURES.

The general favor with which these tapes are received show that in the future they will take the place of the heavy chains with their hundreds of wearing places and inconvenience on account of bulk and weight. These tapes are intended for use wherever the chain can be used, and can be used in many places where the chain cannot. They are not intended to take the place of the light fine graded ones, but are especially designed for convenience and durability, and to take the place of the chain in all land surveying, railroad and canal work and town platting. They are made of the best tempered spring steel ½ inch wide. Each consecutive foot is graduated by a brass rivet and each 5 or 10 feet have plates with figures stamped thereon. For country and field work these tapes have given excellent satisfaction, and if they are nickel plated (with dull finish) they are much less liable to rust and do not require oiling or cleaning after use. The tape is not easily broken by fair usage, but should an accident of that kind occur it is easily mended by brightening the surface near the ends, then clamping them with a sleeve of thin brass or tin and letting a little solder flow in, being careful, of course, to keep the ends butted together and keep it straight while cooling. The handles are made to detach, that when drawing the tape through the brush it is not liable to catch anywhere.

STEREOSCOPES.

Stereoscopes and Views never were more popular than at the present time. With the large assortment of views which we list, there is an endless amount of entertainment to be obtained from an outfit of this kind, at a very small expense. We do not list the cheapest line of stereoscopes made, for we cannot conscientiously recommend them to our customers. The prices on what we list are so low that there would be no advantage whatever for us to offer anything of poorer quality. We offer a good quality of stereoscope for less money than others ask for the cheapest goods made.

STEREOSCOPIC VIEWS.

In Stereoscopic Views we do not list the cheap, trashy printed views, but only those which are printed on the regular photographic paper from a negative. When seen through the stereoscope the value of these views will readily be appreciated on account of their superior quality. We have made arrangements with a first-class stereoscopic view artist who does only the best class of work. We list under each number several different subjects, and if you do not state your selection from that number we will send them assorted.

Postage on stereoscopic views size 3½ x 7 in. 6 cents per dozen; sizes 4 x 7 in. 9 cents per dozen.

The above view was taken among the Dells of the Wisconsin, showing a man in the act of leaping across a chasm 9 feet in width and 60 feet deep. This is given only as a sample

We cannot furnish any special pictures. You must take them as they come of our own assortment (except as to subjects.) The profit on these goods will not permit of any extra expense in making special selections.

There are several subjects listed under most numbers. Please state which are wanted.

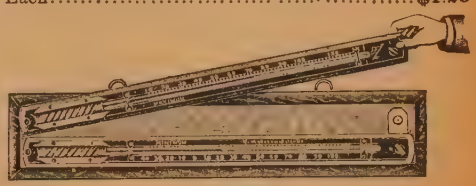
SELF REGISTERING THERMOMETER.

Self Registering Thermometers are a very great convenience, inasmuch as the highest and lowest temperature will be registered and it is not necessary to watch the thermometer from time to time to know the highest or lowest point which has been reached. The tube in the Minimum Thermometer is filled with red spirit. It also contains a small float which follows the spirit to the lowest point but remains when the spirit advances with rise of temperature until it is again set. The Maximum Thermometer is for registering heat. The tube is filled with mercury which has a cut-off near the bulb. The mercury rises to the highest point, but when the temperature begins to decrease the mercury separates, thus leaving the column in the tube standing at the highest point reached until it is set for use again.



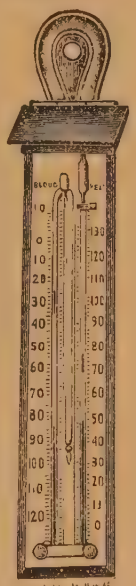
No. 69960.

No. 69960½ **Minimum Thermometer,** boxwood, self registering, for cold from 40 degrees below to 120 above, 10 in., with red spirit. Each.....80c

No. 69961½ **Minimum Thermometer,** boxwood, same as above, but registers to 50 degrees below zero; very accurate. Each.....$1.60

No. 69962½ **Maximum Thermometer,** boxwood, 10 in., mercury tube self registering for heat.
Each.....$1.20

No. 69963.



No. 69963½ **Maximum and Minimum Thermometer,** boxwood, 10 in., for registering both heat and cold, same as two described above. Each.....$1.75

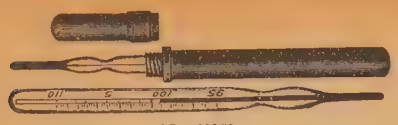
No. 69964.

No. 69964. **Standard Maximum Thermometer,** self registering, 12 in. long with brass insulated strap to fasten in position, graduated on metal plate.
Each.....$2.50

No. 69965. **Standard Signal Service Minimum Thermometer,** self registering with brass insulated strap to fasten in position, graduated metal plate.
Each.....$3.50

No. 69966.

No. 69966. **Maximum and Minimum Thermometer** combined (Six's patent) for registering both heat and cold, boxwood, with a long continuous tube filled with mercury, creosote and compressed air; each side of the tube contains a small steel index which remains at the highest point reached until it is drawn to place by a magnet which accompanies each instrument; scales read from 50 below to 150 above zero; 8 in. Each.....$2.85
10 in. Each..... 3.75



STORM GLASS AND THERMOMETER.

No. 69967. **Storm Glass and Thermometer** combined. The barometer will foretell the weather with a fair degree of accuracy for 24 hours in advance; polished wood case (like cut) 3x9 in.; a very popular instrument. Each.....20c

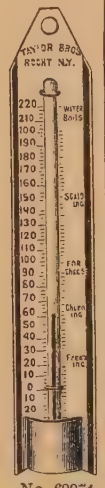
No. 69968. Antique oak barometer and storm glass combined, size 3¾x8¼ in with fancy beaded edge, silvered metal scale to thermometer with brass mountings, large barometer tube; a very fine instrument.
Each.....90c

No. 69969. **Weather House.** This is a simple and interesting little instrument, which indicates the changes of the weather by two small figures. The man comes out before the approach of stormy weather and a lady appears when the indications promise fair weather. The case is made of tin, handsomely decorated in different colors, and has thermometer attached. Each.....$1.35

No. 69970.

No. 69970. **Clinical Thermometer,** for physicians' and nurses' use, self registering, 4 in. long in a neat hard rubber case, straight pattern with bulb very accurate. (The two cuts represent the thermometer in and out of the case.) Each.....**$1.00**

No. 69971. **Clinical Thermometer,** for physicians' and nurses' use, self registering, 4 in. long, in plain enameled case with gilt band, safety chain and clasp to prevent it being lost from the pocket; a certificate of accuracy is furnished with each one of these thermometers. Each.....**$2.00**



No. 69972. **Chemical Thermometer,** all glass, with graduations etched on tube with scale up to 300 or 600 degrees Each.....**$1.75**

No. 69973.

No. 69973. **Churn Thermometer** with flange scale, tested at 62 degrees for churning. Each.....**15c**

No. 69974. **Dairy Thermometer** with flange like cut for general dairy use.

BAROMETERS.

For the benefit of those who do not know, we will explain that barometers are scientific and practical instruments, used to fortell the indications of the weather by the varying pressure of the atmosphere. They are of inestimable value to farmers, gardeners, mariners, etc They are also used by tourists in the mountain regions to determine the altitude or distance abovethe sea level. Full instructions accompany each instrument.

Nos. 69990-91.

No. 69990. **Aneroid Barometer,** in nickel plated case, open face, with card dial, 2½ inches in diameter. Each.....**$2.00**

No. 69991. **Aneroid Barometer,** brass case, with metal dial, 4 in. in diameter, open face. Each,....**$3.50**

No, 69992. **Aneroid Barometer,** lacquered, brass case, entire open face dial etched on plate glass front, beveled edge; a very fine little instrument, 4 inches in diameter. Each..**$5.50**

No. 69993.

No. 69993. **Anerold Barometer,** lacquered, brass case, open face, silvered metal dial, with Fahrenheit thermometer, 4½ in. in diameter. Each.....**$9.60**

No. 69994. **Holosteric Barometer,** in lacquered brass case, open face, with silvered metal dial, 6 inches in diameter, with two thermometers representing the Fahrenheit, Centigrade and Reaumur scales. This instrument is a standard of very fine quality. Each, **$15.50**

MOUNTAIN POCKET BAROMETERS.
For Measuring Heights.

These instruments are now made nearly as portable as an ordinary watch, and yet are fully as accurate as the larger sizes. They are of great service to engineers and tourists, as well as to scientific observers, especially in mountain districts, as they indicate correctly the the distance above the sea level.

No. 69995. **Pocket Aneroid Barometer,** watch size, 1⅞ inches in diameter, nickel case, metal dial, open face, without thermometer, reading to 10,000 feet. Each.....**$7.65**

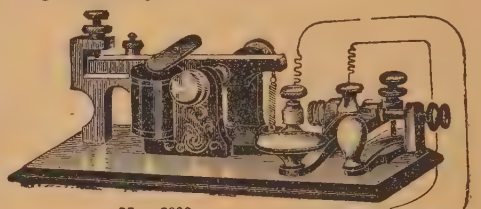
No. 69996. **Pocket Aneroid Barometer,** watch size, 2 inches in diameter, nickel case, open face, metal dial, with revolving ring, reading to 15,000 feet, compensated for temperature, thermometer and compass on the reverse side; a very complete and accurate instrument. Each.....**$10.35**

MERCURIAL BAROMETERS.

No. 69997. **Mercurial Barometer,** 39 in. long, with porcelain scales, light and dark frame. Each...**$5.00**

No. 69998. **Standard Mercurial Barometer,** same principle as those used by the weather bureau, 36 inches long, ivory scales, oak frame; a very complete and practical instrument. Each.....**$10.35**

TELEGRAPH INSTRUMENTS AND APPARATUS.



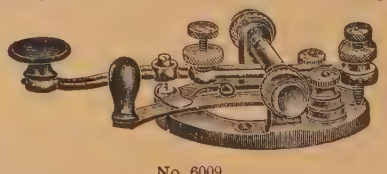
WE can furnish anything in telegraph instruments and apparatus that may be desired. We list herewith a complete line which will fill all ordinary requirements. If, however, there is anything special that is wanted kindly advise us and we shall be glad to make quotations. Our prices will be found to be far lower than the manufacturers, and we believe that a trial order placed with us for anything that may be needed in this line will convince the purchaser that we can save him much money and that we shall be able to merit his future patronage. In addition to our Learner's Instrument, we wish to call special attention to the fact that we list the high grade Standard Western Union instruments, which need no further recommendation.

TERMS OF SHIPMENT.

Electrical goods will be sent by express C. O. D. when desired, providing $1.00 accompanies the order as a guarantee of good faith. The balance can be paid at the express office after examination.

It is best to send cash in full with your order and save the discount of 3 per cent. also return express charges on money.

No. 6000.



No. 6000. **Learner's Outfit,** complete, for telegraphy, consisting of full size sounder and key, mounted on polished cherry base; has full sized battery, with wire, chemicals and complete book of instructions, with everything necessary for operating for private practice, complete weight about 10½ lbs. Price.....**$3.00**

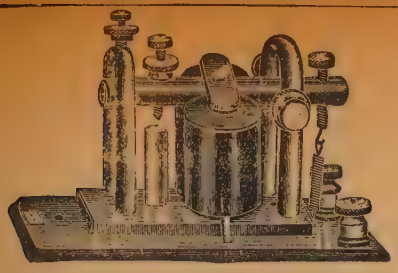
No. 6001. **Learner's Instrument,** same as above, without battery, weight about 2 pounds. Each.....**$2.25**

No. 6002. **Learner's Instrument,** mounted on base, as above, but has sounder wound to 20 ohms. for long distance and should be used on line of ¼ mile or more, as it will give better results, weight 2 pounds. Each.....**$2.90**

No. 6006. **Private Line Instrument,** the highest grade, made with steel lever, key and tubular sounder, same style as Western Union, but one size smaller, on polished cherry wood base, with polished rubber covered coils, wound to 20 ohms resistance. Each..**$3.90**

No. 6009.

No. 6008. **Steel Lever Key, Standard Western Union,** with legs to go through the table. These keys are of the latest and most improved type, the lever and trunions being made of solid steel, nickel plated, instead of brass, as in the old type of instrument. The same strength is secured with much lighter weight and the liability of loose trunions completely avoided. This is without doubt one of the most handsome and best working keys on the market. Its adoption by the Western Union Company is certainly a sufficient recommendation for it. Price, each.....**$1.50**
Postage 10 cents.



No. 6009. **Steel Lever Key, Standard Western Union,** legless, with two binding posts to receive the wires. This key is the same as the one described above, with the exception of not having the legs. It is more desirable for screwing on the top of a table. Price, each.....**$2.00**
Postage 10 cents.

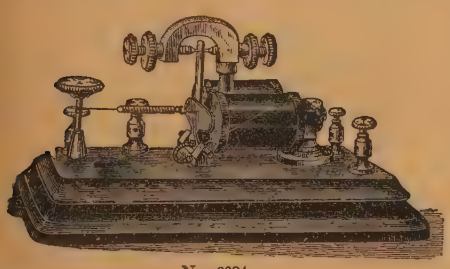
The Graphophone—the wonder of the Centure and heretofore only bought by the wealthy is now within the reach of limited means. Special Catalogue free.



No. 6012.

No. 6012. **Pony Sounder Tubular,** same style as Western Union, but a little smaller; a very fine instrument for short lines or local practice; has polished cherry base with heavy metal sub-base; fine polished rubber covered magnets: a very loud and clear sounder wound to 4 ohms resistance. Each.....**$2.25**
Postage 17 cents.

No. 6013. **Pony Sounder, Tubular,** same as above but wound to 20 ohms resistance for lines up to 15 miles in length. Each.....**$2.50**
Postage 17 cents.

No. 6014. **Giant Sounder, Tubular.** Standard Western Union size, otherwise same description as above, very loud and clear sound, wound to 4 ohms resistance. Each.....**$2.40**
Postage 20 cents.

No. 6015. **Giant Sounder, Tubular,** Standard Western Union size, same as above but wound to 20 ohms resistance, for main line use. Each.....**$2.80**

No. 6024.

No. 6024. **Pony Relay,** made of bronze metal, hand finished, mounted on solid mahogany base with metallic sur base; a thoroughly reliable and practical instrument. Price, with magnets wound to 20 ohms resistance.....**$3.40**
No. 6025. **Pony Relay,** same as above, but wound to 50 ohms resistance. Each.....**$3.90**
No. 6026 **Relay, Standard Western Union,** tubular mountings, mounted on solid mahogany base, wound to 150 ohms resistance, with rubber covered coils, adjustable magnets and finished in a most thorough manner. Price.....**$4.85**

No. 6027.

No. 6027. **Box Sounding Relay, Western Union** pattern, both box and base made of polished mahogany; all metal parts nickel plated, with complete adjustments for increasing or decreasing the sound at will, wound to 50 ohms resistance.
Price, without key.....**$5.90**
For the benefit of those who do not know we wish to say that for local practice, or for short lines up to ¼ or ½ mile in length, and where only two instruments are used on lines, a sounder of 4 ohms resistance will give very good results, especially if a complete metallic circuit be used, which is recommended for very short lines. For lines longer than ½ mile, or where more than two instruments are to be used, unless the line be very short, the magnets should be wound to 20 ohms resistance.

No. 6035.

No. 6035. Pocket Galvanometer, for testing the strength of electric currents; a well finished instrument. Each.....**$5.75**
No. 6035½. Pocket size, little different in construction, hard rubber case. Each.....**$4.60**

ESTIMATE FOR A HALF MILE PRIVATE LINE.

No 6036. Two instruments the same as 6002 wound with fine wire to 20 ohms resistance.

Each	$2.90	$5.80
½ mile of No. 14 BB galvanized iron wire about 50 lbs. at	$0.06½	$3.25
14 pony glass insulators at	.04	.56
15 oak brackets at	.03	.45
5 cells of gravity battery at	.50	2.50
2 pounds of office wire at	.32	.64
10 pounds of blue vitrol at	.06	.60
Complete,		13.80

The above estimate is for a complete and practical working line.

We shall be glad to furnish information to any who are anticipating the building of a private line. It is a very popular practice where there are several students in telegraphy within a reasonable distance of each other, to build a line connecting each of their homes. In this way they have practical experience in telegraphy and the distance makes the study very pleasant as well as more valuable. Complete instructions for building private lines, together with diagrams accompany each set of instruments free of charge.

GRAVITY BATTERY.

The Gravity Battery is a closed circuit battery which is used for telegraph work, or can be used for operating electric bells, but is not so desirable for bell work on account of evaporation and the necessity of renewing the battery more often.

FOR CUT OF SAME SEE LEARNER'S OUTFIT, No. 6000, SEE PAGE 470.

OPEN CIRCUIT BATTERIES.

For electric bells, burglar alarms, telephone work, etc.

No. 6048.

These batteries are intended for use where the circuit is closed only a small portion of the time. If placed on a continuous closed circuit they will soon be exhausted, but for open circuit work such as bells, telephone work, etc., they will last from 12 to 18 months without renewal.

DRY BATTERIES.

Dry Batteries when first introduced were not very successful, but now they are largely displacing the wet batteries of La Clede and Le Clanche type for nearly all kinds of work. The principle is the same as the Le Clanche. They are clean in every respect and will last from 4 to 18 months, depending largely on the amount they are used. They require no attention to keep them in order. When they have run out they are not to be recharged, but must be replaced by a new one. These batteries are largely used for electro medical work also.

ELECTRIC MOTORS.

We list the Porter electric motors which are so well known that we believe a lengthy description is unnecessary. They are arranged to be run with batteries. Almost any cell or battery will suffice where the work to be done is not too heavy, but where the motor is to perform heavy and continuous work they should be operated by the Edison La Lande Battery.

No. 6235.

No. 6235. Porter Motor No. 1 size, small but develops a considerable amount of power, can be operated with one cell of battery and will furnish power for mechanical toys, revolving window show, etc.; weight about 1¾ lbs.
Price, each, without battery.....$2.90

No. 6236. Porter Motor No. 2 size, same construction as above but larger, weighing about 3 lbs and has a capacity of about 1-20 horse power. Price, each, without battery.....$4.75

No. 6237. Porter Motor No. 3 size, 5½ in. long by 4½ in. high by 4½ in. wide. This motor will run a small ventilating fan, a dentist's buffer, a grinding machine or other light work. The normal speed is about 2,200 revolutions per minute, and when using 4 cells of battery it will generate about 1-15 horse power, weight about 6 lbs. Each.....$9.00

No. 6238. Porter Motor No. 4 size, built same style as No. 3 but is a much larger and stronger motor. It is wound for from 2 to 10 volts, and with 8 volts and 10 amperes will develop about 1-6 horse power. It is mounted on a ¾ in. cherry base, has brass binding posts and a two point switch for regulating the speed by changing the number of batteries in the circuit; weight with base about 12 lbs., clears an 8 in. fan.
Price, complete.....$13.50

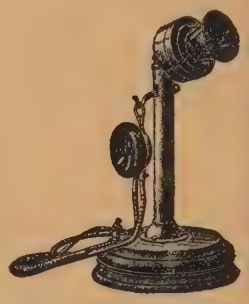
TELEPHONES.

The demand for telephones has so largely increased of late that we have been induced to give the matter special attention with a view to selecting a 'phone which is strictly up-to-date, and at the same time one which can be furnished at a moderate cost. Until within the past year the telephone patents have been so closely guarded that a strictly first-class and up-to-date instrument could not be furnished for the use of private individuals or telephone exchanges except the Bell and a few others. Many of the most valuable patents have now expired and others have been introduced to take the places of those which have not as yet expired. We are now prepared to offer telephones which are not only suitable for private use, but are being furnished for the use of corporations for city exchanges. The telephone as now made is very much simplified, and while it is a delicate instrument we have taken particular care to select one which we can guarantee to give entire satisfaction. We caution buyers of telephones against purchasing instruments of concerns who have not an established reputation, as there are many 'phones on the market which cannot be depended upon and are practically worthless.

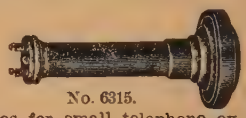


No. 6310.

No. 6310. The Improved long distance battery telephone of the regular Bell telephone style with solid oak or walnut case, magneto call with 10,000 ohm generator, double bells, compound pole receiver with end nickel plated to prevent rust; a very sensitive granulated chemically treated carbon transmitter, and box on case for two batteries. The chemical treatment of the granulated carbon prevents it from packing, which has been a very fatal objection with granulated carbon transmitters.
Price complete including 2 cells of dry battery.
Each.....$13.50

No. 6311.

No. 6311. Improved long distance telephone, with transmitter and receiver, same as above but with a battery call instead of the magneto call, the connection is to be made with a push button, and is a thoroughly reliable instrument.
Price with case complete as shown in cut, made of oak or black walnut.
Each.....$7.00



No. 6312. **Desk 'phone**, one of the neatest and most artistic desk 'phones made; has neat pedestal with nickel plated standard. Our regular type of long distance transmitter with the small new style receiver.

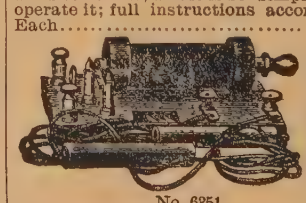
ELECTRO MEDICAL BATTERIES

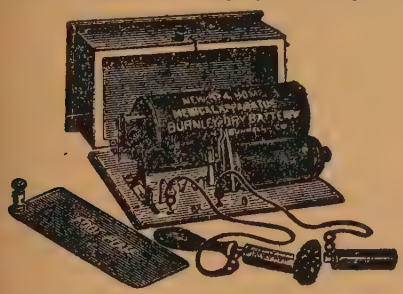


For Home or Physicians' Use.

The Electro Medical Battery as a curative agent is becoming more appreciated from day to day. In cases of nervous trouble and partial paralysis it has brought about phenomenal results. The best physicians prescribe its use even when all else fails, and even under such adverse circumstances it often cures. For rheumatism, neuralgia, paralysis and all nervous disorders it seems to be nature's own cure. There need be no fear from the use of these machines, as there can be no bad results derived. An invalid may use them with perfect safety. There are a great variety of electrical machines and batteries on the market, from which we have selected of each kind those in which we can furnish our customers with the best value for the amount of money expended.

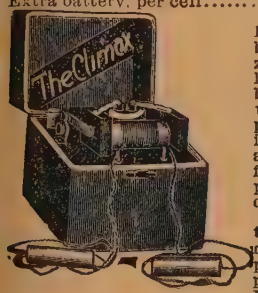
No. 6350.

No. 6350. **The Little Wonder.** A complete and perfect working little battery, neat, portable, and powerful, and produces an electric current from a small cell of zinc and carbon. This is a small machine that embodies all of the features of the larger ones and produces an electric current of great tensity and long duration with a very small charge of chemicals. There are no dangerous acids to handle, and it is so simple that any child can operate it; full instructions accompany each battery.
Each.....$1.35



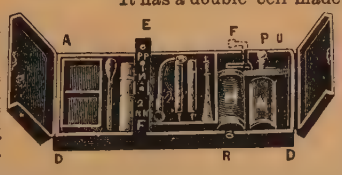
No. 6351.

No. 6351. **Induction Coil** without battery. This instrument is very strong and is practically the same as the next following, except that it has not the battery included, and consequently a smaller case. It can be used with any acid battery, or with one or two cells of dry battery which are listed further on in this department. This instrument is especially desirable for the use of travelers, inasmuch as it is very small and portable; size of base 5¾x2¾, but still it has all the power of the larger instruments. Price of instrument complete, including pair of hand electrodes, cords and sponge holder of the best quality.
Each.....$3.50



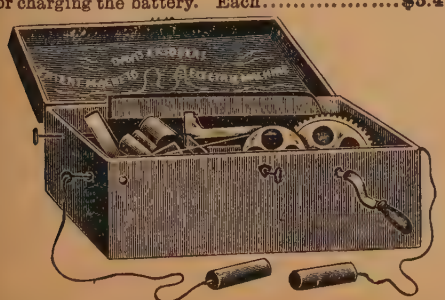
No. 6352. **The "Capital" Battery,** imitation mahogany case made of cherry and well finished with rounded corners, handle and catch, height 7¼ inches, width 6½x5¾. One of the principal features of this battery is that it uses a Mesco dry cell, which will last from four to nine months, depending largely on how much it is used. It develops a very strong current, is well made throughout, with parts nickel plated and is one of the best batteries on the market for the price; weighs a little less than 5 pounds. New cells of battery can be furnished at 70 cents each. Price complete.....**$4.50**

No. 6353. **The Gem Electro Medical Battery.** This battery, like the one preceding, uses a dry cell, but the entire apparatus is made in a much more compact form and has a very fine polished oak case which is better proportioned than the one represented by the cut and has a nice carrying handle. The size is



4½x4¾x7¾ inches and weighs 5½ pounds. The great advantage to be derived from these batteries is a strong and even current combined with the entire absence of acids of any kind, which are liable to be spilled and injure clothing, furniture, etc. This instrument is furnished complete with cords and handles, one foot plate and two sponge electrodes with wood handles. Price complete.....**$5.75**
Extra battery, per cell.....**70**

No. 6354. **The "Climax" Faradic Battery.** This battery uses a regular zinc and carbon cell of liquid battery, which can be renewed from time to time at a very small expense. In other respects it is practically the same as the Capital battery; full instructions accompany each one. Price, complete.....**$4.00**

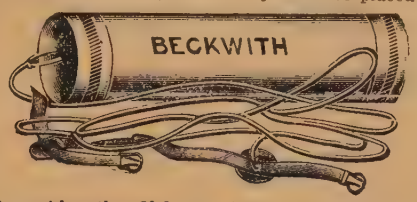


No. 6355. **Gaiffe's Battery.** The electric current in this instrument is produced with a bisulphate of mercury battery. It has a double cell made of hard rubber, each cell having a carbon and zinc plate. The double battery cell can easily be removed from the case for cleansing or recharging. The currents produced by these batteries are as follows:

1. Primary current.
2. Secondary current.
3. The current of the first two combined in tensity.
4. Shocks slow or fast according to the use of the contact breaker or lever.

This is the celebrated Gaiffe system for physicians and family use. It is very compact, is all enclosed in a polished mahogany case 4x1¾x7½ inches, and weighs 1¾ lbs. Complete with full instructions. Each..**$6.50**

No. 6356. **Gaiffe's Battery** with same sized coil as in the preceding, but produces two currents only instead of three, is mounted in single cover, polished mahogany case, size 4x1½x6½ inches, with two insulated handles and one vial bisulphate of mercury for charging the battery. Each.....**$5.40**



No. 6357. **Magneto Electric Battery.** This battery is of the celebrated Davis & Kidder type; is operated without the use of chemicals or batteries of any kind. The electric current is produced by the revolving of fixed electro magnets by turning a handle from the outside of the case. This machine produces a very powerful current and will last a lifetime if properly cared for. Size of case 4x4½x8¼; weight about 5¾ lbs.
